
Pressure-proof and completely weather-proof miniature connectors. Widely used in instrumentation and miniaturized electronic equipment. These highly reliable connectors are available in both small and large shell sizes providing enough variation for a wide range of applications. Contacts are gold over nickel plating. Aluminum shells feature quick bayonet coupling. Small receptacles mount in $\frac{13}{16}$" hole; secure through four $\frac{1}{8}$" holes on $\frac{25}{32}$" centers. Large receptacles require $1\frac{1}{16}$" hole with four $\frac{1}{8}$" holes on $1\frac{5}{16}$" centers. Plugs are $2\frac{1}{16}$" long. Small plugs are $\frac{57}{64}$" dia.; large plugs are $1\frac{9}{64}$" in dia. Rated 500 volts rms, except *600 volts. All have strain relief clamps. Shells are aluminum with gray anodize chromium finish. Dielectric material is diallyl phthalate. All have "O" ring seals. **Av. Shipping Wt.:** 3 oz.

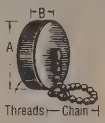
*UL Recognized

On Allied Stock Numbers marked with †, the part is available in the following finishes: Standard — (no code), cadmium plate with drab olive chromate finish; (639) — cadmium plate with clear chromate finish; (621) — zinc with black zinc finish; (689) — electroless nickel. For finishes other than drab olive, add the finish identification to the end of the part number. *Finish (639) has been replaced with finish (689) in 3057 clamps.

Type 97-60 Dust Caps

For Receptacles



Provides protection against live circuits and keeps out dirt and dust when connector is not in use. Has internal threads especially designed for use with Series 3100A, 3101A and 3102A receptacles. Beaded chain. A soft rubber disc sits on the connector shell forming a watertight joint. **Average Shipping Weight:** 2 oz.

Series C016-1

Full plastic connector. Screw locking. 4 or 7 contacts. 9.5 mm cable opening. Silver-plated contacts. **Dielectric Material:** Polyamide 6.6. **Flammability Rating:** UL 94 V0. **Protection to IEC 529**: IP 67 (water resistant). Plastic shell resistant to UV, solvents, oil and gas. **Wire Sizes:** 26-12 AWG. **Current Rating:** 5-16 amps. **Voltage Rating:** 250-600 V.

Contact Configurations

44 Series high-performance environmentally-sealed connectors feature a resilient, one-piece design incorporating crimp contacts, in six insert configurations. Primary and secondary mating seals and discrete wire seals resist liquids. Ideal for auto/truck, marine, industrial, traffic control, security and mining ventilation systems. 250 VAC RMS at 8 A continuous. **Temperature Range:** –40° to +125°C. Order contacts and tooling separately.

Introduction
The cost of EMI/RFI control has dropped dramatically with the introduction of Amphenol Canada's new FCC Series of filtered modular jacks, D-subminiature and Micro-Ribbon. At less than half the cost of previous industry levels, the FCC Series products have already solved EMI/RFI problems for a host of electronic equipment designers. These filtered connectors are useful for dealing with the two main EMI/RFI control issues.

FCC Compliance
FCC Docket 20780, Part 15, Subpart J imposes electromagnetic radiation emission limitations upon manufacturers of both Industrial (Class A) and Commercial (Class B) products. The FCC Series of filtered connectors are instrumental in passing these requirements because the chief cause of noncompliance is traceable to noise radiated from the I/O cables. A filtered connector at the I/O port removes the noise before it exits the system.

Noise Protection
Unwanted EMI/RFI noise or electrostatic discharge can be removed from an I/O cable if a filtered connector is used at the I/O port. This prevents false signals and protects the equipment from damaging voltage spikes thereby greatly enhancing device immunity from external effects.

FCC17 Series — Filtered D-Sub Connectors

Designed to provide EIA RS-232 and RS-449 compatibility. Intermateable with standard non-filtered Amphenol 17 Series D-Subs and connectors meeting MIL-C-24308. **Materials. Shell:** High strength zinc diecast or stamped steel. **Contacts:** Phosphor bronze. **Inserts:** High strength thermoplastic material (complies with UL flammability requirements of 94V-O per UL-STD-94). **Finish. Shell:** Bright tin plating per MIL-T-10727. **Contacts:** 15 μ" gold plating per MIL-G-45204 on contact area over 100 μ" nickel plating. **Operating Temperature:** –40°C to +85°C.

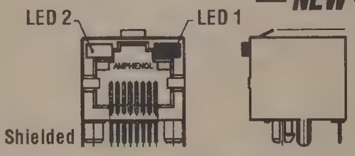
RJ Vista™ High Speed RJ-45 Modular Jacks

— *NEW* —



RJ Vista™ is a family of RJ-45 Modular Jack Connectors with built-in LEDs, designed for Category 5 performance. This product is ideal for LAN applications such as adapter cards and routers. Shielded and non-shielded versions are available, with a variety of LED colors, and ports. U.L. File #E135615, CSA File #LR68598.

Materials. Shield: Copper alloy/tin-lead plated. **Contacts:** Phosphor bronze; 30 μ" gold over nickel. **Insert:** Thermoplastic (complies with UL94V-0). **Current Rating:** 1.5 amps. **Voltage Rating:** 125 VAC.

Non-Shielded — 8 Contacts

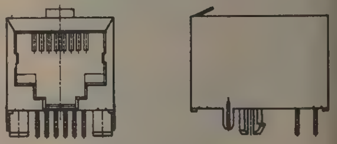
Filtered and Shielded Modular Jacks

The FRJ series of Shielded and FIltered Modular Jacks offers low cost and effective EMC control within standard RJ-45 connector footprints. EMC control is offered by a completely shielded connector and/or with the use of a high resistivity, high impedance ferrite block. No board layout changes are required for its use. Simply replace the standard non-filtered connector for superior EMC performance.



Materials. Shield: Copper Alloy. **Contacts:** Phosphor Bronze, Gold over 20 μ" Pd. over Ni. **Insert:** Thermoplastic (Complies with UL 94V-0). **Filter:** High Impedance, High Resistivity, Ferrite Block. **Electrical. Current Rating:** 1.5 Amps. **Voltage Rating:** 125 Volts AC. **UL and CSA File No.:** LR68598-11.

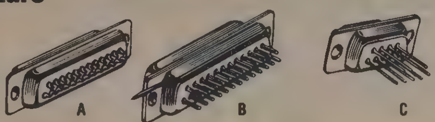
17 Series D Subminiature



Conforms to NFC 93-425, EIA standard RS-232-C — RS-449. Two-piece black thermoplastic insulator. UL94 V0 rated. Nonremovable contacts. **Shell:** Steel yellow chromated over zinc. **Contacts:** Screw machined (male brass). **Plating:** Gold over nickel. **Normal Voltage:** 300 Vrms 50 Hz at a current rating of 7.5 A.

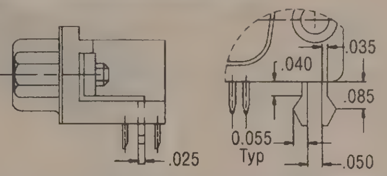
Right Angle — Front Metal Shell D-Subminiature Connector



Amphenol's 617 series right angle connectors are a state of the art design. The front metal shell helps reduce EMI/RFI emissions. Contacts are selectively plated for high performance at a low cost. **Specifications. Temperature Range:** –55°C to +105°C. **Voltage Rating:** 1000 VAC at sea level. **Current Rating:** 5 amp. **Dielectric:** Glass filled thermoplastic, black, UL 94 VO. **Shells:** Steel/tin plated. **Contacts:** Precision formed copper alloy. **Contact Plating:** Goldflash over nickel. **Contact Forces:** Engagement — 18 oz. max.; Separation — .75 oz. min. **Mounting Feature:** #4-40 threadhole with female screwlock. .318 Footprint.

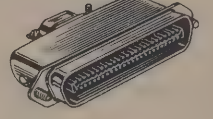
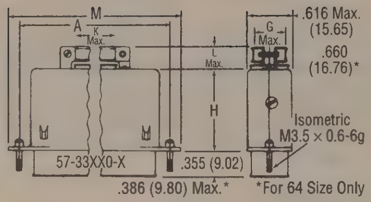
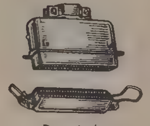
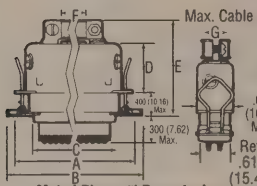
57-Series Connectors





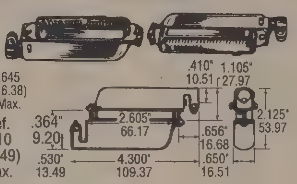


Cable-to-Panel



Mated Plug and Receptacle

Cable-to Cable



Copper alloy contacts, selectively plated gold-over-copper for excellent current carrying characteristics. UL94 VO rated diallyl phthalate dielectric per MIL-M14G Type MDG, for operation at up to 700 volts DC (sea level) without shorting or flashover. Zinc-plated steel outer shell, with clear chromate finish, for corrosion resistance. Trapezoidal-shape shell assures correct polarity. **Current Capacity:** 5 amps per contact. **Voltage Rating:** 700 volts DC at sea level. **Operating Temperature:** –55°C to +105°C (–67°F to +122°F). **Wire Sizes:** Solid — 22 gauge, max.; Stranded — 24 gauge, maximum.

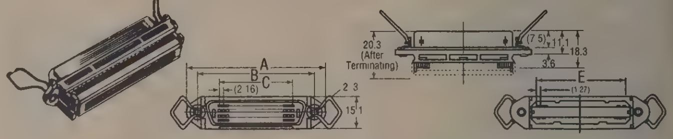
Amphenol® Microribbon Connectors



These connectors are intermateable with Amphenol 57 Series and 157 Series connectors. Special contact design allows the use of standard .050" flat ribbon cable for termination. **Contacts:** Copper alloy/gold plating. **Dielectric:** Polycarbonate resin (UL94V-O)/blue. **Rated:** 250 VAC rms; 1 amp. **Test Voltage:** 500 VAC rms at sea level. **Operating Temperature:** –55°C to +105°C.

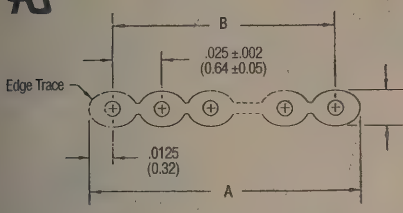
Cable-to-Cable Low Profile Plastic Hood

Spectra-Zip® PVC .025" Center Cable — 191-3003 Series



Spectra•Strip .025" center zip cable is designed to meet industry requirements for interconnect miniaturization. Features include quick and easy IDC termination, UL recognition and inexpensive PVC dielectric. Applications include any system requiring a higher signal density or an inexpensive alternative to transmission cable. The cable is rated for 105°C (+221°F) operating temperature and 150 volts. One edge of the cable is marked for polarity reference. **Physical Characteristics. Conductors:** 30 AWG solid bare copper. **Insulation:** PVC, .0075" wall. **Thickness:** 0.025" ±0.002". **Pitch:** 0.025" ±0.002". **Color:** Grey (one edge black). **UL style:** 2678; rated 105°C (+221°F).

- ► **Allows Increased Miniaturation**
- ► **Highly Flexible PVC Insulation**
- ► **Fast, Low-Cost Mass Termination**
- ► **UL Recognized Style**
- ► **Precise Spacing for Controlled Electrical Characteristics**

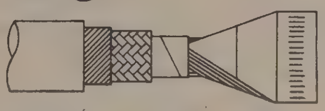
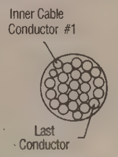
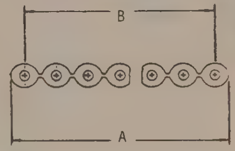
Spectra•Strip® Jacketed Shielded Cable

- ► **Round Cable That Mass Terminates**
- ► **High Flexibility**
- ► **Twisted Pair Electrical Characteristics**
- ► **Helps Meet FCC Regulations UL, CSA and CL2**

Cable combines into a single construction, the handling and shielding features of round cable and the mass termination capabilities of flat cable. This product is designed for routing in tight spaces where a round shape is more practical and where a foil/braid shield is necessary to help meet FCC requirements for EMI/RFI suppression. **Conductors:** 28 AWG-7/36 tinned copper. **Jacket:** Black PVC, .030" nom. wall. **Temperature Rating:** –20° to +105°C (–4° to +221°F).







Round Twist "N" Flat™ Jacketed Shielded Cable — 159-2832 Series

Physical Characteristics. Color Code: Brown, red, orange, yellow, green, blue, violet, gray, white, black and repeat with tan common. **Insulation:** PVC, .010" wall laminated between .005" clear PVC film. **Thickness:** .042" ±.003". **Pitch:** .050" ±.005". **Twist Length:** 17.5" (consult Allied for other available lengths). **Flat Length:** 2.5". **Shielding:** Aluminum/polyester foil, with minimum 90% coverage tinned copper braid. **UL Style:** Inner Cable — 20130; Composite — 20381.

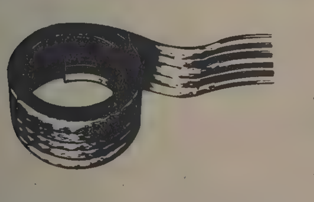
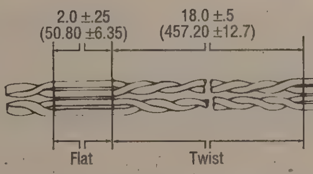
Twist "N" Flat Planar Cable





- ► **28 AWG, 7/36, .050 Center, Tinned Strand Copper**
- ► **Unique Design Allows Mass Termination to IDC Connectors**
- ► **Up to 64 Conductors (32 pr.) with Precise Spacing for Controlled Electrical Characteristics**
- ► **Highly Flexible PVC Insulation is Color Coded with a Tan Common to Allow Ten Repeatable Colors**
- ► **Double Contour at Flat Sections Allows Termination from Either Side of Cable, Easy Conductor Separation for Circuit Routing**
- ► **U.L. and CSA Recognized**
- ► **Voltage Rating: 300 V**
- ► **Current Rating: 1 Amp**

Twist "N" Flat cable combines the time and cost savings of mass termination with the electrical performance of twisted pairs, making it ideal for high speed computers and communications equipment. Labor savings of 95% and more compared to automatic strip and crimp terminations are readily achieved. Twist "N" Flat cable consists of stranded round conductors insulated with color coded PVC, twisted into pairs and laminated between layers of PVC film to form a planar cable. The twist in adjacent pairs is reversed to reduce crosstalk even further. Standard cables alternate 18-inch long twisted pair sections with 2-inch flat sections in which the conductors are laminated in parallel. This cable is packaged in 100-foot lengths in dispenser boxes with a footage indicator. 28 AWG, 7/36, .050 centers.

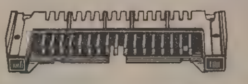
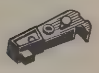
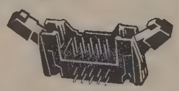
Spectra-Strip® Protected Headers







The 816 series protected headers are for applications requiring positive connect and fast disconnect capabilities. MIL-C-83503 21B/24A and 25A compatible and have snap-in polarization tabs. Solder plated tails avoid solder bath contamination. Lock and eject latches optional (no tooling required to install). UL and CSA recognized. **Insulation Material:** Glass reinforced thermoplastic. **UL Flammability Rating:** 94 V-0. **Contact Material:** Phosphor bronze. **Contact Area Plating:** 30 μ gold over nickel. **Current Rating:** 1 amp. **Withstanding Voltage:** 1000 Vrms at sea level. **Temperature Rating:** –55°C to +150°C (–67°F to +221°F).

SMB Plugs, Angle Plugs, Bulkhead and Printed Circuit Receptacles

Amphenol SMB connectors meet or exceed the requirements of MIL-C-39012 series SMB. These subminiature units feature snap-on mating and broadband performance with low reflection DC-4 GHz (usable to 10 GHz). The connectors shown in this catalog are 50 Ω impedance, with voltage rating of 375 V peak.

PowerPole® Connectors

ISO 9001 Certified

Powerpole® connector modules feature a single pole, genderless connector half. This module consists of a color-coded housing and a silver-plated, crimp-type contact. The module is designed to mate with another identical module. The housing is durable, high-impact resistant polycarbonate (UL94V-2 flammability rating). An internal stainless steel leaf spring forces contacts to maintain constant pressure. The contacts are sold separately and are made from highly conductive silver-plated copper. UL recognized file No. E26226. CSA certified file No. LR25154. Powerpole® is a registered trademark of Anderson Power Products.

15/30/45 Amp Connectors

- ► **Single Piece Housing — Unitized Construction Provides Industrial Quality Durability**
- ► **Individually Replaceable Contacts — Enables Safe Replacement of Contacts**
- ► **Spring Loaded Silver Plated Contoured Contacts — Self-Wiping Cleaning Action Assures Greater Conductivity and Longer Life**
- ► **Polycarbonate Housing — Non-Conductive Material Can Be Used Safely With Industrial Batteries**
- ► **Mechanically Keyed and Color Identified — Prevents Mismatching of Voltage**

The SB® Connector was designed by Anderson Power Products® and has 30 years performance on electric vehicles. Other applications include quick disconnect for computer systems, uninterruptible power and power distribution systems.

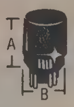
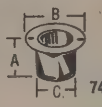
Midget Hart-Lock Devices (2-Pole, 2-Wire, 15 A; 125 V)

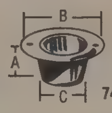
7428N



7427



7456



7468

7428N (backwired dead front) and 7427 (for polarized and nonpolarized plugs) are black nylon/phenolic with cord grip for $\frac{7}{16}$" to $\frac{1}{2}$" OD cords. Both are $1\frac{13}{16}$" long. 7466 and 7468 are bakelite with metal housings. NEMA ML1-R, ML1-P ANSI C73.29.

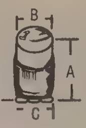
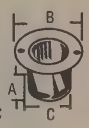
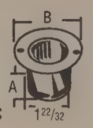
4767



4755



7557C



7556C

Gray nylon/lexan suitable for 105°C continuous use. 4767 and 4755 have dual range cord grip clamps for .250" to .656" OD cords and are backwired dead front designed. 7556C and 7557C have backwired clamp type terminals.

*Not UL listed.

Safety Grip™ Connectors Straight Blade Devices (2-Pole, 3 Wire Grounding 15 A and 20 A; 125 V)

Male Plug

Female Connector

These devices have cord grips for .250"-.656" diameter cords.
Nylon/lexan* backwired dead front construction. Complies with NEMA WD1-1979 requirements. NEMA-5-15R, 5-15P ANSI C73.11.

*Lexan is a registered trademark of General Electric.

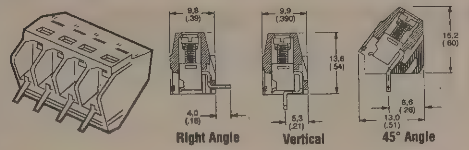
5LE Series — EURO Terminal Blocks



- Connection on 5mm (.197") Centers
- Standoffs for Flux Cleaning
- Captive M2.5 Screws
- Superior Elevator Wire-Clamp with Wire Guard
- Modular Housing: End to End Stackability with Snap Together/Stay Together Design
- Dead Front Design Protects Against Shock
- Housing Withstands Wave Line Temperatures
- In Accordance with VDE0110
- 2 Thru 4 Positions Molded to Length (Snap Together Larger Sizes)

Housing Material: Thermoplastic, UL recognized flammability classification 94V-0, 105°C max. operating temperature. **Terminals:** Bright acid-tin plated copper alloy. **Solderability:** MIL-STD-202, Method 208. **Rating:** 10 amps/300 volts, 15 amps/150 volts (limited rating). **Wire Range:** 14-28 AWG (solid or stranded). **Recommended PC Hole Size:** .062" diameter. **UL File Number:** E54800. **CSA File Number:** LR30811.

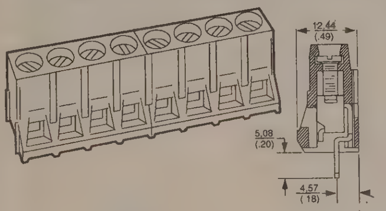
25EV Series — EURO Block



- Superior Elevator Wire-Clamp with Wire Guard
- Connections on .250" (6.35mm) Centers
- Modular Housing: End to End Stackability with Snap Together/Stay Together Design
- Dead Front Design Protects Against Shock
- Standoffs for Flux Cleaning
- Captive M3 Screws
- High Temperature Housing Withstands Wave Line Temperatures
- In Accordance with VDE0110

Housing Material: Thermoplastic, UL recognized flammability classification 94V-0, 120°C max. operating temperature. **Color:** Black. **Terminals:** Bright acid-tin plated copper alloy. **Solderability:** MIL-STD-202, Method 208. **Elevator Box:** Zinc plated steel with yellow chromate coating. **Screws:** Zinc plated steel with yellow chromate coating, M3. **Rating:** 10 amps/300 volts, 15 amps/150 volts (limited rating). **Wire Range:** 10-22 AWG. **Max. Tightening Torque:** 5.0 lb. inch. **UL File Number:** E54800. **CSA File Number:** LR30811.

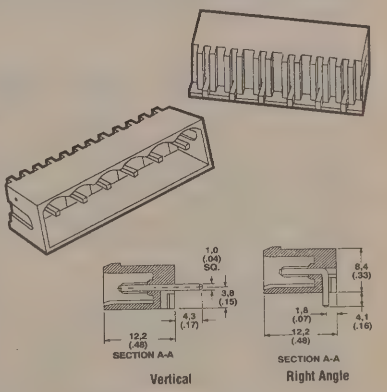
5EHD, 2EHD Series — EURO Block Headers



- Pluggable Euro Block Header
- Connections on 5mm (.197") and 5.08m (.200") Centers
- Shrouded Header Design Protects Header Pins and Enables Latching to Plug Side
- Closed End Style Prevents Misalignment of Plug and Header
- Housing Withstands Wave Line Temperatures
- In Accordance with VDE0110

Housing Material: Thermoplastic, UL recognized flammability classification 94V-0, 105°C max. operating temperature. **Color:** Green. **Terminals:** Bright acid-tin plated copper alloy. **Solderability:** MIL-STD-202, Method 208. **Recommended PC Hole Size:** .062" diameter. **Rating:** 10 amps/300 volts, 15 amps/150 volts (limited rating). **UL File Number:** E54800. **CSA File Number:** LR30811.

500 Series — Machined Contact, Solid Insulator, DIP Sockets

- PC Board Thickness Range: .062" and .092"
- Contact Spacing: .100 Centers
- PC Termination: .125"
- Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362
- Precision Four-Finger Inner Contact Provides Concentric Funnel Entry for Easy Flat and Round Lead Insertion
- BeCu Inner Contact for Maximum Mechanical and Electrical Performance

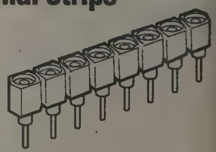
500 Series — SIP Sockets / Socket Terminal Strips



- Non-Wicking Closed Bottom Sleeve Gives 100% Protection Against Flux and Solder Contamination
- Breakaway Feature for Breaking Strips into Any Desired Shorter Lengths (No Special Tooling Required)
- Withstands Most Severe Environmental Conditions Including Military Requirements of High Shock and Vibration
- Two-Piece Tapered Entry Closed Entry Inner Contact and Machined Outer Sleeve
- Accepts Any IC Lead and Component Leads .016"-.021" Diameter, .105" Min. Length
- Uses: Microprocessor Sockets, Hybrid IC Sockets, Q.I.L. Sockets, Component

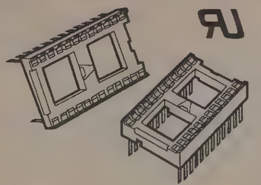
200C Series — Stamped Single Beam Contact, Closed Bottom DIP Sockets



- Contact Spacing: .100 Centers
- Insulator: Thermoplastic Polyester Rated 94V-0
- Contacts: Phosphor Bronze (Per QQ-B-750), Beryllium Copper (Per QQ-C-533)
- Plating: Tin/Lead (Per MIL-P-81728)
- High Normal Force Results in Gas Tight Connections
- Non-Wicking, Closed Bottom Design Gives Protection Against Solder Contamination
- Protected Open Entry for Easy Insertion of ICs By Hand or By Automatic Insertion
- Anti-Overstress Design Protects Contacts, Helps Eliminate Damage from Oversize Leads and Maintains Consistent Normal Force
- Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362

Augat 200C Series single beam face wipe contact provides maximum normal force and consistent mechanical performance in Augat's lowest cost socket.

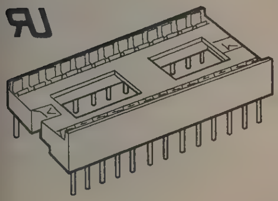
300C Series — Stamped Dual Wipe Contact DIP Sockets



- Contact Spacing: .100 Centers
- Insulator: Thermoplastic Polyester Rated 94V-0
- Contacts: Phosphor Bronze
- Plating: Tin/Lead
- Available in Open Frame Style Allowing Maximum Utilization of Circuit Board Real Estate
- Standoffs Facilitate Board Cleaning
- Low Profile Design
- Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362

The Augat 300C Series dual wipe contact adds a new family of product to Augat's low cost DIP socket line.

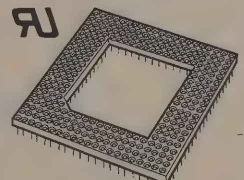
PGM Series Pin Grid Array Sockets



- Low Insertion and Withdrawal Force Contacts
- Non-Wicking Closed Bottom, Precision Sleeve Protects 100% Against Flux and Solder Contamination
- Contact Sleeves Are Recessed into a Molded Insulator for Extra Protection and Greater Surface Are a Presentation with Vacuum Pick Up for Automatic Insertion Systems
- Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362
- Insulator: Thermoplastic Polyester UL Rated 94V-0
- Plating: Contacts — 30 μ" Gold; Sleeve — Tin/Lead

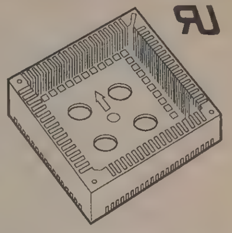
PCS Series "Type A" Sockets for PLCC Packages



- Visual Aids External to Socket Assure Easy Registration to Printed Wiring Board
- Easy Access for Probing Installed Chip Carrier
- Accepts JEDEC PLCC's MO-47 AA-AH (20-84), MO-052 AE (32 RECT)
- Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362
- Plating: Tin/Lead Over Nickel

The Augat PCS Series Chip Carrier solder tail sockets accept Jedec Type "A" plastic leaded chip carriers on .050" (1.27mm) centers. These dependable sockets combine positive retention of package with high normal force to insure outstanding electrical and mechanical performance. The solder tail design allows through-hole board patterns on .100" (2.54 mm) grid.

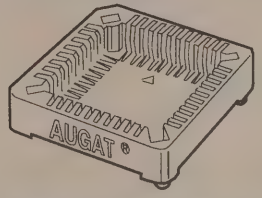
PCS-SMU Series Ultra Low Profile SMT Sockets for PLCC Packages



- Visual Aids External to Socket Assure Easy Registration to Printed Wiring Board
- Easy Access for Probing Installed Chip Carrier
- Accepts JEDEC PLCC's MO-47 AA-AH (20-84), MO-052 AE (32 RECT)
- Recognized Under the Component Program of Underwriters Laboratories, Inc. File No. E111362
- Plating: Tin/Lead Over Nickel

The Augat SMU Series Surface Mount chip carrier sockets are an "Ultra" low profile, .175" (4.45 mm) for JEDEC dimensioned PLCC devices. The lower profile is to accommodate height packaging restrictions in high density disk drive and laptop applications. With a PCB footprint which matches PLCC device and an open insulator design to facilitate placement and inspection, the Augat SMU Series meets your high density packaging needs.

SOJ Sockets

- ► Sizes Range from 24 to 40 Positions
- ► 10,16 mm (.400") and 7,62 mm (.300") Centerlines
- ► High Normal Force Contacts Insure Long Term Reliability
- ► High Temperature Plastic

Augat's new SOJ Socket provides the user an easy means of socketing their SOJ devices. These full featured devices are available in a variety of sizes. **Material Specifications. Contact:** Phosphor bronze. **Insulator:** 94 V-0 thermoplastic. **Plating:** 200 μ" min. tin over 75 μ" Ni. **Performance Characteristics. Current Rating:** 1.0 amp. **Dielectric Withstanding Voltage:** 600 VAC RMS for 60 seconds. **Insulation Resistance:** 10,000 MΩ/500 VDC. **Contact Resistance:** 20 mΩ. **Operating Temperature:** –55°C to +105°C. **Durability:** 25 cycles. **Mating Force:** 20 lbs. max. **Unmating Force:** 2 lbs. min.

- ► Polarization: Dot, Notch, Bump
- ► Contact Plating: 30 μ" Gold per Mil-G-45204

The Augat Transistor sockets utilize hi-rel machined outer sleeves and gold plated inner contacts assembled into a low profile insulator. The funnel entry design eliminates distortion or damage to the contact with misalignment or oversized leads. The sockets accept .016" to .020" dia. pins. All have a 3 A current rating. This Series features a large tapered entry for easy lead insertion and a closed bottom sleeve providing 100% prevention of solder or flux wicking.

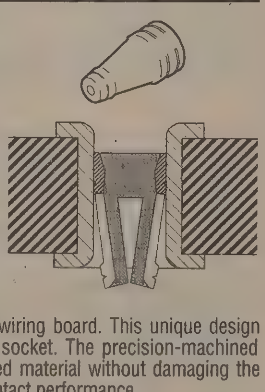
Holtite® Series Zero Profile Solderless Sockets



- ► Available Qualified to MIL-83505/6
- ► Zero Socket Profile
- ► Precision-Machined, Tapered-Entry, Four Finger Contact
- ► Solderless, Gas-Tight, Press-Fit Insertion
- ► Contact: Beryllium Copper per QQ-C-530
- ► Finish: Gold Plated .000030" Per MIL-G-45204 Over Nickel Per QQ-N-290 or Tin/Lead Per MIL-P-81728

The solderless zero profile Holtite® contact is designed to be pressfit into the the plated-thru hole of a printed wiring board. This unique design allows the plated-thru hole to become the component socket. The precision-machined geometry allows for the controlled displacement of plated material without damaging the hole, or affecting the normal mechanical and electrical contact performance.

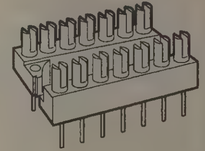
600 Series — AG and CG Plug Adapter Assemblies



- ► AG Style Machined Round Pin Machined Printed Circuit Terminal
- ► CG Style Machined Slotted Pin Machined Printed Circuit Terminal
- ► Precision Machined Pins
- ► Used for Interposing Discrete Components
- ► Terminals Are the Same Dimension as IC Board Patterns
- ► Option of Round or Slotted Pin Styles

The 600 Series is a high quality machine pin molded adapter which is used to assemble hybrid and special network circuits. The .018" diameter precision pin allows the adapter to be plugged into socket or wire wrappable panels repeatedly.

Fixed PCB Terminal Blocks (.200" Spacing) Series 88 With Rising Cage Pressure Clamps

- Holds Wires For Secure, Reliable Contact
- Molded To Length
- High Flammability Rating (94V-0)
- Extra High Conductivity Contacts
- Wire Range: 12-30 AWG
- Small Footprint: .388"

Series 21000

Open back construction. 9/16" terminal centers. 30 amp current rating (UL). **Voltage Rating, rms:** UL recognized, Class B — 600; Class C — 600. **CSA Certified:** 300 @ 30 amps. **Withstand Volts, rms:** 10500. **Insulator Material:** General purpose phenolic. UL temp. index 150°C. Black. **Width × Height:** 1 5/16" × 5/8". **Max. AWG:** 12. **Terminal Screws:** No. 8-32 × 5/16" binding head screws. Steel, cadmium plated.

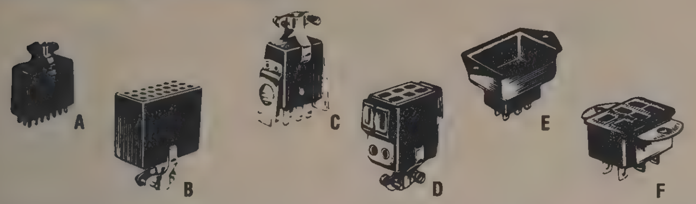
Series 3300 Connectors



Series 3300 connectors are interchangeable with Series 300 types and are designed for panel and cable mounting. **Specifications. Current Rating (Individual Contacts):** 10 amps. **Voltage Rating, rms:** 750 volts, 250 volts (UL). **Plug Contact Material:** Brass, cadmium plated. **Socket Contact:** Phosphor bronze, cadmium plated. **Pre-Grounding Contact Material:** Heavy duty plated brass. **Base Insulating Material:** High-grade phenolic, black. **Backshell:** Thermoplastic. **Finishes:** Cable clamp, screws, latch and keeper; Angle Bracket — steel, bright nickel electroplate; Deep Bracket — steel, baked black wrinkle enamel finish over zinc chromate plating.

Series 5400 15 Amp

Cable clamp top connectors are designed for use in panel and cable mounting applications. They are interchangeable with Series 2400 or 400 type connectors. **Current Rating (Individual Contacts):** 15 amps. **Voltage Rating:** 1750 volts; 250 volts (UL rated at 250 V, AC or DC max. between adjacent contacts). **Plug Contact Material:** Brass, cadmium plated. **Socket Contact:** Phosphor bronze, cadmium plated. **Pre-Grounding Contact Rating:** Up to 30 amps at rated voltages. **Pre-Grounding Contact Material:** Heavy-duty plated brass. **Base Insulating Material:** High-grade phenolic, black. **Backshell:** Thermoplastic. **Includes:** Steel, bright nickel electroplated cable clamp and screws. UL recognized, File No. E34763. CSA certified, File No. 22156.

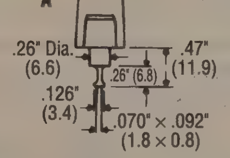
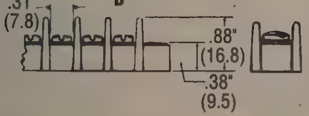
Series 72000 Single Row Terminal Strips

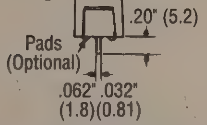
A



B



C



Single row types have the terminals imbedded into the walls of the insulator on both sides. This provides a pull-out strength over twice as great as competitive designs. High barrier construction offer lower overall height. **Specifications. Terminal Centers:** 3/8". **Current Rating (UL):** 20 amps. **Voltage Rating: rms:** UL recognized, Class B — 250; Class — 150. **CSA Certified:** 300 @ 20 amps. **Withstand Volts, rms:** 10500. **Insulator Material:** Thermoplastic, glass-filled. UL temp. index, 95°C. **UL Flame Retardant Rating:** 94V-0. Black. **W × H:** 5/8 × 21/32". **Max. AWG:** 14. **Terminal Screws:** No. 6-32 × 1/4" binding head screws. Steel, cadmium plated. PC bottom terminals are brass, bright electro-tinned.

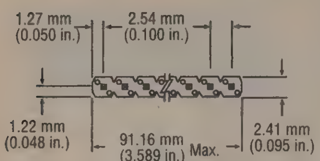
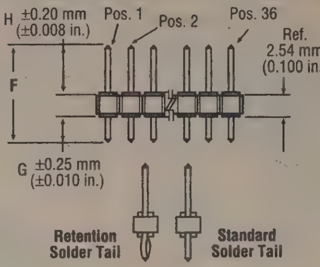
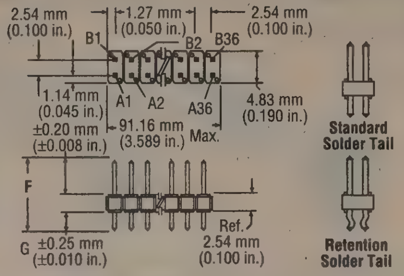
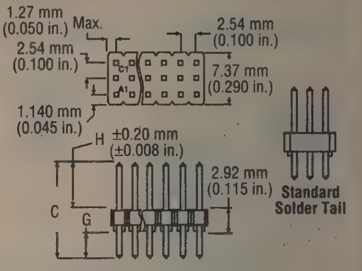
Bergstik® II Headers









"Retentive sticks" headers have optional retention tail that provides 0.5 lb. minimum retention prior to soldering on 0.062 inch thick p.c. boards. Can be manually broken to the desired length. Drawn 0.025 inch square wire presents four surfaces suitable for the wrapping. Pins positioned on 0.100" centers. Stand-offs allow cleaning to eliminate soldering contaminates. Header body made of glass-filled nylon rated UL 94V-0, color black. **Insulation Resistance:** 500 MΩ minimum. **Temperature Range:** -65°C to +105°C. **Withstanding Voltage:** 1500 Vrms at sea level. Phosphor bronze pin, current rating, 3 A maximum. Retention force to body, 2 lbs. in either direction. UL recognized, CSA certified.

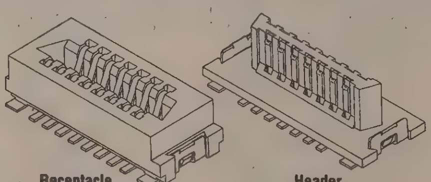
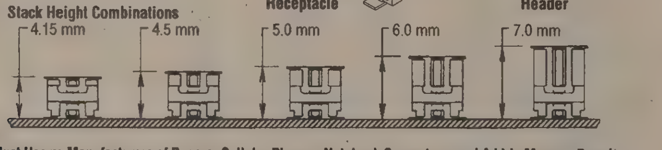
CONAN™ 1.0 mm Pitch Connector System



Stack Height Combinations



► **Product Users: Manufacturers of Pagers, Cellular Phones, Notebook Computers, and Add-In Memory Boards**

Low-profile, surface-mount connectors for close stacking of parallel circuit boards. Options available for 4.15 mm, 4.5 mm, 5.0 mm, 6.0 mm, or 7.0 mm mated connector height. Connectors feature reliable selectively-plated, blade-on-beam contacts on 1.0 mm pitch. **Current Rating:** 1 amp per contact. UL recognized, CSA certified.

65039/65043 Series
Mini-Latch PV™ Housing

For use with dual metal Mini-PV contacts and crimp-to-wire pins. Allows simultaneous connections of Mini-PV terminated conductors on 0.100" × 0.100" or 0.100" × 0.200" double row, to accommodate Mini-PV receptacles or crimp-to-wire male pins. Accepts crimp-to-wire Mini-PV range AWG 22-36, and crimp-to wire pin AWG 22-32. Made of modified polyphenylene oxide rated UL 94V-1, color Black. **Insulation Resistance:** 1 × 10⁵ MΩ minimum. **Temperature Range:** –40°C to +105°C. **Withstanding Voltage:** 1000 Vrms at sea level. **Latching Force:** 6.5 lbs..minimum per position. Optional polarization plug.

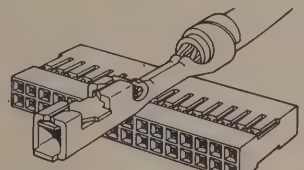
Bergcon® Crimp-To-Wire MiniPV™ Receptacles



► **Mini-PV Receptacle Shown with Latch Housing**

Mate to 0.019 inch and 0.025 inch round or square pins. Dual-metal contact design provides constant retention force after repeated cycles. These female receptacles have beryllium-copper spring and brass body. Offer superior electrical and mechanical characteristics. Standard spring force is recommended for use in Mini-Latch housings 40-72 positions. High spring force for Mini-Latch housings 10-50 positions.

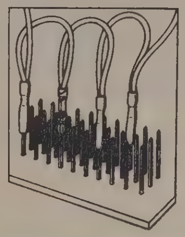
Daisy Chain Jumpers



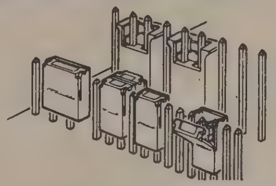
► **MAXI-PV Contacts Provide Constant High Electrical and Mechanical Reliability After Repeated Cycles**

► **Board As Shown Not Included With Jumpers**

Eliminate wire measuring, stripping, soldering or hand-tool terminating. Maxi-PV contacts provide constant high electrical and mechanical reliability after repeated cycles. Contact has brass body and beryllium.copper spring. **Contact Area:** 1 µm (40 µ inch) gold over nickel. **Reminder:** Gold flash. **Current Rating:** 2.5 A. **Resistance:** 4 mΩ maximum. **Insertion Force (Max.):** 4,30 N (430 gf) with withdrawal force (min.) 0,75 N (75 gf). **Temperature Range:** –65°C to +105°C. AWG 28 stranded copper wire conductor with PVC insulation. PVC shrinkable tubing. **Packaging:** 250 contacts per reel.

518-0001. 47254-000	**PER REEL 232.87**

Bergcon® System Mini Jump™ Jumpers



65474 Series. Jumpers feature high density packaging, stackable on 0.100" spacing. Offer single row, two positions per row. For bussing, programming and switch replacement. Replace conventional printed circuit board switches. Virtually eliminates accidental de-programming. Mate with 0.025" square and round pins. Dual metal PV contact design provide excellent retention after repeated cycling. Available in glass-filled thermoplastic polyester housing, color blue. Gold flash over nickel finish. **Insulation Resistance:** 1 × 10⁵ MΩ minimum. **Temperature Range:** –65°C to +125°C. Contact has a brass or cupro nickel body and a beryllium copper spring. Rated at 3 A maximum, with initial resistance of 11 mΩ maximum, 15 mΩ maximum after tests. UL recognized, CSA certified.

Quickie™ IDC System Connectors

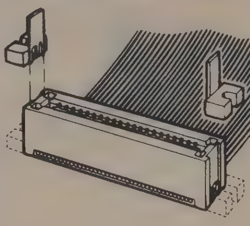
Quickie™ III provides "world class" quality at a globally competitive price. This product line is ideally suited for high-volume applications such as small computers, video equipment, instrumentation, office products, and automotive related packaging schemes.

The Quickie™ III female connector features a single-beam, long-wipe contact that provides a highly reliable electrical connection. The contact is made of a phosphor-bronze base material and is available with gold over nickel, tin/lead, or Berg's exclusive "better than gold" GXT™ plating system.

Quickie™ III headers feature duplex-plated pins with either gold or GXT™ plating in the contact area. The solder-tail portion of the pin is fully plated with tin/lead.

Headers have dual polarization and are compatible with virtually all IDC specifications.

Quickie™ III Edge Card Connectors



Single-beam configuration provides high contact pressure for reliable electrical performance. Preloaded cover ensures cable positioning and protects contacts. Bridge-type cover enhances connector-to-cable production rates. Molded-in polarization. Housed in glass-filled thermoplastic polyester rated UL94-V-0. **Insulation Resistance:** 1 × 10⁵ MΩ minimum. **Temperature Range:** –65°C to +125°C. **Withstanding Voltage:** 500 Vrms. Contact made of phosphor-bronze. **Current Rating:** 1 A. **Resistance:** 15 mΩ maximum.

Quickie™ III Edge Card Connectors Without Mounting Ears

30 µ GXT™ finish.

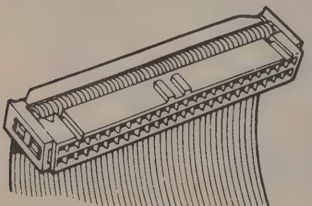
Quickie™ III Female Connectors



Pre-loaded adjustable bridge-type cover suits a wide range of cable. Reduces assembly time, protects contacts and offers precise cover-to-base alignment ensuring reliable termination. Cover's feed-through design allows cable to be inserted into either side of the connector for cable-end terminations. Also allows connector to pass smoothly over cable for daisy chain applications. Serrated slots in the cover assure accurate positioning of the cable over the contacts during assembly. Long wiping action ensures good contact. Polarization by means of polarization plug. Glass-filled thermoplastic polyester body rated UL94-V-0. **Insulation Resistance:** 1 × 10⁵ MΩ minimum. **Temperature Range:** –65°C to +125°C. **Withstanding Voltage:** 1000 Vrms. Phosphor bronze contact has finish of 30 µ GXT over pre-plated nickel. **Current Rating:** 1 A. **Resistance:** 15 mΩ maximum.

Central And Dual Polarization Quickie™ III Female Connectors

Standard female assembly includes strain relief.

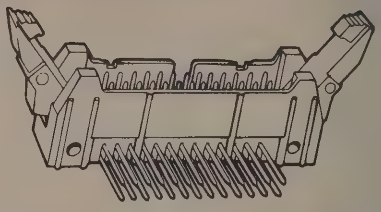
Quickie™ III Right-Angle Headers



Four-walled shielding protects pins in unmated condition and prevents misalignment. Dual polarization by use of polarization keys. Lock and eject system minimizes PC space required and allows dense packaging design. Feature duplex-plated pins made of phosphor-bronze. **Current Rating:** 1 A. **Finish:** 30 µ" GXT™ over nickel on the two contact sides of the pin and gold flash on the other two non-contact sides. Body is glass-filled thermoplastic polyester rated UL94-V-0. **Insulation Resistance:** 1 × 10⁵ MΩ minimum. **Temperature Range:** –65°C to +125°C. **Withstanding Voltage:** 1000 Vrms. Polarization achieved by cutting off pin and adding polarization plug to mating female connector.

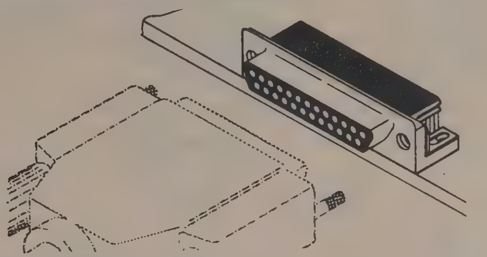
Right Angle D-Subminiature Headers



- **Industry Standard Connector Designs Allow Mating with Both Military and Commercial D-Subminiature Connectors**
- **Metal Shells Ensure EMI Protection**
- **Right Angle Plugs and Receptacles Are Available in 9, 15, 25, and 37 Positions; Duplex Plating Is Available in the Contact Areas with 30 µ In. (0.76 µm) of Gold Over 50 µ In. (1.27 µm) of Nickel Underplate, or Gold Flash Over 50 µ In. (1.27 µm) of Nickel Underplate**
- **High Density Versions Use 67% Less Space Than Standard Connectors**
- **All Connectors Are Offered with PWB Grounding and Retentive Feature; All Are Available with or without Hex Standoff**

Product offering includes the most popular versions used in today's market and state-of-the-art high density versions for new designs. These include the popular right angle short (.318) footprint and the traditional long footprint (.590) in 9, 15, 25, and 37 position versions and a high density version, offering 67% greater packaging density, in 15, 44, 62, and 104 position versions.

The housing is glass-filled thermoplastic polyester (UL 94V-0) with insulation resistance of 2 GΩ min. and a temperature range of –40°C to +105°C. Product can withstand voltage of 1000 Vrms min. The shell is a steel strip with a finish of 150 µ in. tin-lead plating. Contact base material-male is brass MIL C50 and the base material-female is phosphor-bronze CDA-510 with a finish of gold flash over 50 µ in. (1.27 µm) nickel underplate at engagement area, 150 µ in. (3.81 µm) tin-lead plate at termination area, or 30 µ in. (0.76 µm) gold over 50 µ in. (1.27 µm) nickel underplate at engagement area, 150 µ in. (3.81 µm) tin-lead plate termination area. The current rating as 2 amps fully loaded with resistance of 30 mΩ max.

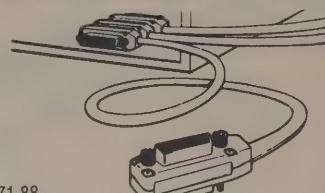
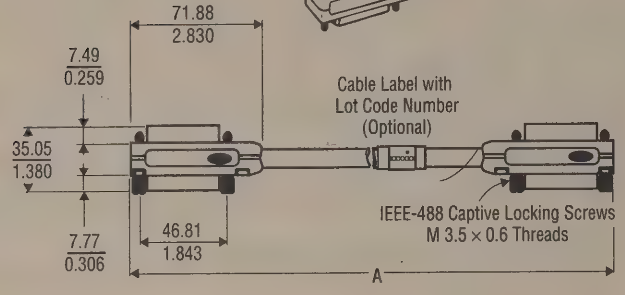
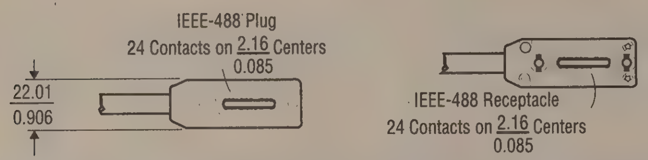
GPIB Shielded Cable Assemblies







General Purpose Interface Bus assemblies feature double shielded cable, metal cast connector housing and shield termination. Pre-loaded cantilever beam ensures low connector insertion force and minimum contact wear. Interface meets IEEE–488 specifications. **Spacing:** 0.85 inch. Connector has insulation resistance of 10 GΩ minimum, 1 A maximum current rating, and 1,000 cycles durability. Contact force of 101, 5 N per contact, with 24 contacts per connector side. Housed in black glass-filled thermoplastic polyester rated UL94V-0. **Contact:** Beryllium copper with 30 μ inch gold over nickel finish. **Shielded Cover:** Zinc alloy with nickel finish. Black oxidized steel captive locking screw and metric thread. Double shielded cable made of aluminum/mylar polyester film tape with braid and drain wire. Gray PVC insulation. **Material Conductors:** AWG 26-7/34. Signal line resistance is 0.14 μ/m maximum, bulk resistance braid is 0.0085 Ω/m maximum. **Capacitance:** 150 pF/m maximum at 1 kHz. **Impedance:** 70-75 Ω. **Operating Temperature:** 80°C maximum.

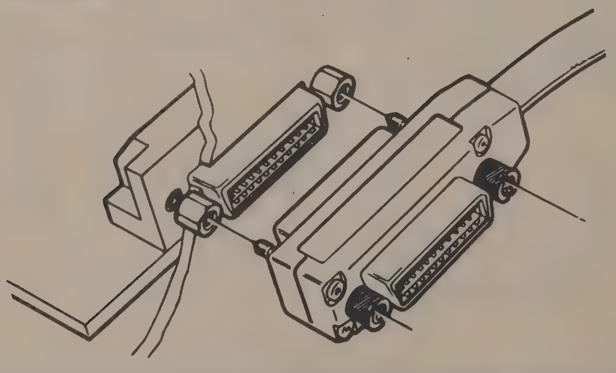
GPIB Headers



General Purpose Interface Bus Headers have 0.85 inch spacing. Connector has insulation resistance of 10 GΩ minimum, contact resistance of 10 mΩ maximum, withstanding voltage of 1000 VAC RMS, and current rating of 1.5 A maximum. Contact force is 1-1, 5 N per contact and durability is 1000 cycles. 24 contacts. Housed in glass-filled thermoplastic polyester UL listed 94V-0, color black. Contact material is beryllium copper, and finish is 30 μ inch gold over nickel in contact area and 100 μ inch tin-lead over nickel on the soldertail. Shield and R/A bracket are low carbon steel with nickel finish. Threaded clinching nuts are low carbon steel with cadmium and clear chromate. **Temperature Range:** –55°C to +105°C.

402B Wire Wrap Gold/Tin

Standard Solder Tail

- **Footprint Options: Over 1000 Off-the-Shelf Footprints Available — Please Call!**
- **High Reliability, Ultra Low Insertion Force Pin Grid Array Sockets for Microprocessor, RISC, ASIC, FPGA, and DSP Devices**
- **Solder Tail, High Reliability Screw Machine Contacts**
- **Other Pin Options: 878S — Male/Male; 996E — Compliant Pressfit; 402B — Wire Wrap**
- **All-Solder Tail Pins**

Insulator Body Material: High-temperature 40% glass reinforced UL94V-0. **Outer Sleeve:** ½ hard brass alloy 360. **Inner Contact:** Beryllium copper alloy 172, 6-finger, 10 µ" gold over min. 50 µ" nickel. **Solder Tail Length:** 0.125". **Solder Tail Diameter:** .020". **Rated Voltage:** 100 VRMS/150 VDC. **Temperature Range:** –55°C to 200°C. **Current Rating:** 3 amp max. **Insulation Resistance:** 10 K meg Ω min.

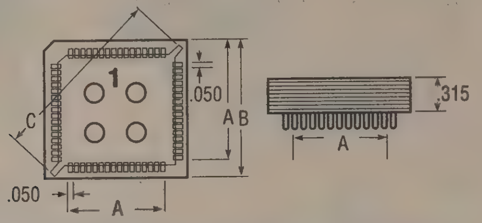
PLCC Sockets

Thru-Hole PLCC Sockets



- ▶ Conforms to EIA JEDEC Outline (Type A) for Plastic Lead Chip Carriers
- ▶ Polarization Indicators Assure Positive Chip Carrier Alignment
- ▶ Closed Bottom Prevents Solder Wicking
- ▶ Open Center and Stand-Offs Provide for Cooling and Thorough Cleaning After Soldering
- ▶ .310" Above PCB Profile

Insulator: High-temp. PPS, UL94V-0. **Contacts:** Phosphor bronze 5210. **Plating:** 200 µ" Tin/50 µ" Nickel. **Temperature Range:** PBT — –55°C to +140°C; PPS — –55°C to +220°C.

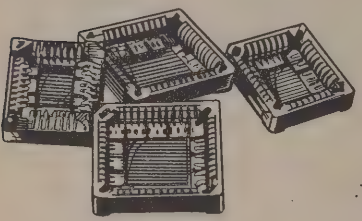
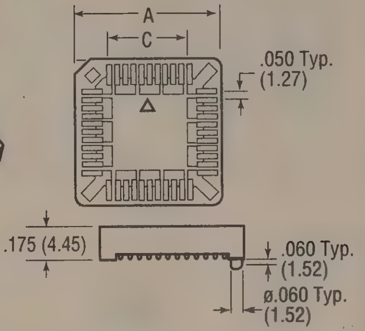
Surface Mount PLCC Sockets





- ▶ Lowest Profile Available: .175" (4.44 mm)
- ▶ Socket Has Standard JEDEC Mounting Pad Layout
- ▶ May Be Reflow Soldered By All Conventional Processes
- ▶ All Solder Joints Are Inspectable
- ▶ Polarization Notch Ensures Correct Alignment
- ▶ Pick and Place Tab for Automated Assembly Equipment (Add -P to Mfr.'s Type)
- ▶ Packaged in Tubes or Tape and Reel

Insulator: High-temp. PPS, UL94V-0. **Contacts:** Phosphor bronze. **Plating:** 150 µ" Tin/40 µ" Nickel. **Temperature Range:** –55°C to +220°C. **Current Rating:** 1 amp.

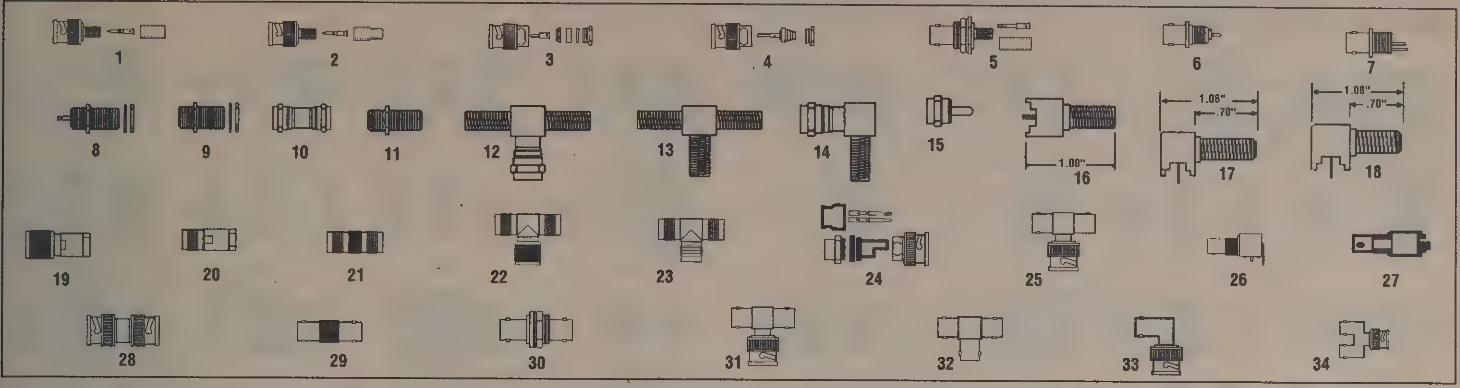
RF Connectors For Data Interconnect

BOMAR
INTERCONNECT PRODUCTS, INC.



These high quality RF connectors are approved for use by the major manufacturers of computer networks and are used extensively for all interconnecting and accessory cables and panels.

BNC 3 Piece Crimp Plugs For Cable Mount

These 3 piece, dual crimp connectors feature Posi-Click contacts that "click" into place when installed insuring a perfect assembly. All crimp pins are gold plated and have a vent hole for optional soldering.

BNC Clamp Type Plugs, Standard and Taper Grip

Regular clamp types use a five piece construction while taper grip styles are of three piece design and require little cable preparation. Both types tightly clamp the shield to the connector body. Soldering on the contact pin is required. All materials are machined brass with gold contacts.

BNC Bulkhead Jacks

Versions available for front mounting (F/M), rear mounting (R/M), crimp types, panel grounded, or isolated. These jacks are held in the panel by a hex-nut and lock washer. All units feature nickel plated brass bodies, gold/phosphor bronze contacts.

Color Coded BNC Bulkhead Jacks

In addition to Bomar's white Valox isolated bulkhead jack, three new versions are available with a red, green, and blue insulated panel bushing and the matching color internal insulator. These are excellent for RGB interconnect applications — instantly color codes your panel ports. For panel thicknesses up to .125 inch. Special colors available with minimum order requirements.

Connectors For Twinax Cables

Standard Twinax connectors are impedance matched for 100 ohm cables and are used extensively with IBM computer systems. BNC *Satconn Twin* is a crimp (or solder) plug with a patented design that simplifies assembly and uses a comparatively inexpensive Bomar hand tool. For .242" diameter twinaxial cables.

Printed Circuit Board BNC Jacks

These popular BNC board jacks meet or exceed the highest industry standards. They are available in many standard configurations as shown. Additional versions are available upon request. All isolated jacks are constructed with molded Valox, in White or Black, over nickel plated zinc bodies. Contacts are Phosphor Bronze and plated with tin or gold. All metal versions are fully shielded. They are nickel plated zinc and utilize the same phosphor bronze contacts in either tin or gold plating.

BNC Adapters and *"The Goalie"*

The internal design offers the lowest possible reflected signal (VSWR) and guarantees no oxidation at the internal contact points as the connector ages. *"The Goalie"* is rated at 3 GHz with a VSWR of 1.12:1.

Between Series Adapters solve a variety of connection problems where connectors of different types could ordinarily not be mated together. Each adapter has a different type coupling at each end allowing for a wide variety of interconnections to fit almost all interconnection situations. All adapters are constructed of machined brass and are nickel plated.

RJ45 Category 5 Plugs and Boots

Category 5 Liner Plugs are supplied with an insertable liner for the conductors. The separated conductors are inserted into the liner, cut off squarely at bottom, inserted into RJ45 plug, then perfectly crimped. CXB300 series boots finish the installation with a color-coded strain relief assuring optimum performance.

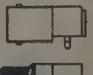
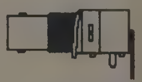
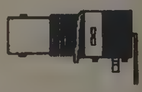
Super-Low™ Profile and Filtered BNC Jacks



A



B



C

Super-Low™

This right angle BNC jack is the lowest profile available anywhere. It is fully shielded because it is constructed of a zinc alloy and then plated with nickel. The phosphor bronze contact is plated with 15 micro inches of gold.

Filtered

These BNC right angle BNC printed circuit board jacks are capacitively decoupled by using two 4700 pf chip capacitors. This is the most cost effective way to efficiently filter out noise and eliminate ground loops on coaxial interconnections. Valox bodies are standard in black, but are available in white.

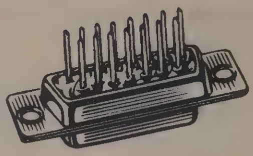
Basic D, D-Sub Miniature Connectors



This economical series is ideal for commercial applications. **Insulator Material:** Two-piece nylon. **Contact Material:** Machine copper alloy with gold over nickel contact plating. **Voltage Rating:** 1250 VAC rms at sea level. **Current Rating:** 5 amps. **Operating Temperature:** –65°F to +250°F. Non-removable contacts.

Series 3 Mil-C-24308 Military Connectors

High-reliability connectors with improved heat resistance. An outstanding feature of these connectors is the crimp, snap-in, rear release contacts. They are ideal for field repair and replacement. **Insulation Material:** Monoblock glass fiber-filled diallyl per MIL-M-14, type GDI-30-F. **Contact Material:** Copper alloy with gold over copper plating. **Current Rating:** 5 amps. **Operating Temperature:** –65°F to +300°F.

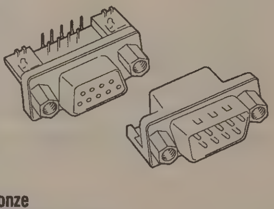
D*KL Series "The Low Cost Interconnect Alternative"

Metal Front Shell Right Angle PCB Connector .318 Mount



- ► Contact Tails Are Formed at 90° Angle to Front Face of Connector for PCB Mounting
- ► Boardlocks Allow for Grounding of Front Shell to PC Board and Are Tin Plated for Solderability
- ► Boardlocks Provide Mechanical Fastening to Board for Stability during Wave Soldering Processes
- ► 4-40 Threaded Hole Facilitates Secure Mounting to Panels
- ► Insulation Material: Black UL94V-0 Rated Glass-Filled Polyester
- ► Mates with Industry Compatible Connectors
- ► Contact Material: Plug — Brass; Socket — Phosphorus Bronze
- ► Contact Plating: Gold Over Nickel in Mating Area; Tin Over Nickel on Tails
- ► Shell/Boardlock Material: Steel
- ► Shell/Boardlock Plating: Tin Plated
- ► Available with Female Screwlocks
- ► Operating Temperature: –55°C to +105°C

Econo D Connectors

The D*U series has a two-piece insulator as well as crimp, snap-in-rear contacts that can be inserted by hand. An economical connector ideal for commercial applications where field replacement of contacts is required at a lower cost than high-reliability connectors. **Insulator Material:** Two-piece thermoplastic polyester UL-94-VO rated. **Voltage Rating:** 1000 VAC rms at sea level. **Current Rating:** 5 Amps. **Operating Temperature:** –65°F to + 125°F. The D*U version is UL recognized. **Contact Material:** Copper alloy (machined), cadmium copper (stamped) with gold over nickel plating.

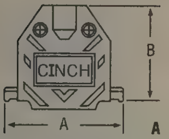
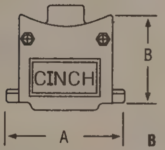
Back Shells



A



B

These backshells fit both standard and high-density D-Subminiature Connectors. All listed items include a set of PVC compression inserts that enable them to fit a range of cable sizes. All items have zinc-plated steel hardware. Series DPH has a cover of black ABS polymer. Series DCH (metallized plastic) has the same and is plated with nickel over copper. Series DMH is die-cast zinc.

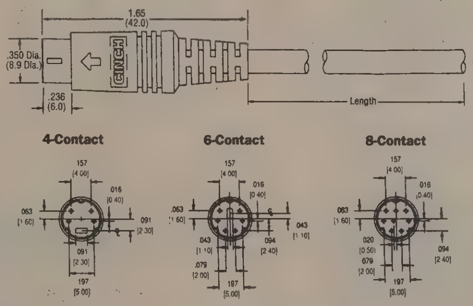
Circular Mini-DIN Plugs

Single-Ended Cable Assembly



- ► Pre-Assembled with Standard Shielded Cable Lengths
- ► Molded-In Strain Relief
- ► Shielding System Designed to Meet FCC Requirements for EMI/RFI Suppression
- ► Insulation Material: Plug Insulator — UL94V-0 Rated Nylon; Plug Overmold — PVC (Black or Beige); Cable Jacket — PVC (Black or Beige)
- ► UL Recognized: File E19071; CSA Certified: File LR31996-6
- ► Contact Material: Plug — Phosphor Bronze
- ► Shield Material: Steel
- ► Shield Plating: Nickel
- ► Standard Cable Composition: Shielded Cable with 0.197 Inch OD Jacket over 28 AWG Stranded Wire Conductors

Contact Plating: Gold Flash Over Nickel

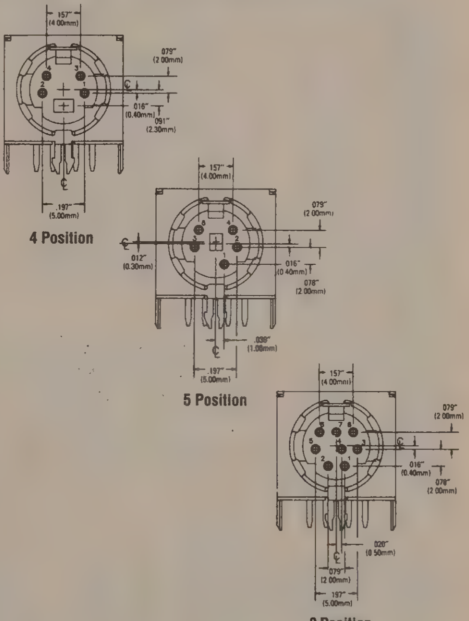
Shielded I/O Connector Circular Mini-DIN Socket

Right Angle PCB Mounted Super-Shielded Socket



- ► Improved Design Maximizes Shielding and Saves Space
- ► Tail Aligner Positions Contacts for Reliable Insertion into PCB
- ► "Super-Shielding" on Front Face of Sockets Helps Reduce EMI/RFI/ESD
- ► Boardlocks Provide Mechanical Holddown During Wave Soldering Processes
- ► Compatible with Defacto Industry Standard Mini-DIN Plugs
- ► Suitable for Robotic Assembly
- ► Durability: Withstands Minimum 500 Mating/Unmating Cycles
- ► Solderability: Meets MIL-STD-202; Method 208
- ► Insulation Material: UL94V-0 Rated Glass-Filled Polyester; Black on Front Face, Platinum Color on Base
- ► Contact Material: Phosphor Bronze
- ► Contact Plating: 30 μin. (0.76 Micron) Min. Gold Over Nickel in Mating Area; Tin/Lead Over Nickel on Tails
- ► Shield: Material — Phosphor Bronze; Plating — Bright Electro-Tin Lead Over Nickel, Tin Over Nickel on Econo Version
- ► Contact Rating: 2 Amps at 12 VDC; 1 Amp at 100 VAC

Barrier Terminal Blocks

Interposing barriers between each terminal position yields substantially higher electrical ratings and provides an additional safeguard against shorting from frayed wires. The wide size range of "Jones" barrier terminal blocks, plus the several termination options and the available accessories permit flexibility of end use applications.

500 Series
The 500 Series Jones barrier terminal blocks have high barriers and are designed for applications where electrical and mechanical performance requirements are especially critical. Bottoms are closed so insulating strips are not required. UL Recognized.

Marker Strips

Marker strips identify terminal positions on barrier terminal blocks and insulate exposed portions of terminals from a conductive mounting surface. Marker strips for Series 140 are 1/32" thick, flame-retardant material and mount under the terminal strip. **Shipping Weight.:** 2 oz. 1/8" white numerals standard.

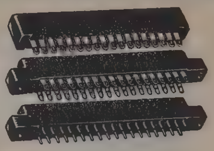
Cardcon® Edge Connectors



For .062" thickness single and double-sided PC boards. Blue glass-filled polyester 94 V-0 insulator. Meets requirements of MIL-C-21097. **Contact Style:** Semi-bellows bifurcated. **Contact Material:** Spring brass alloy 260. **Contact Plating:** Gold on contact area and gold flash on tail with copper underplate. **Termination:** Solder eyelet; dip solder with either .200" (5.08 mm) or .140" (3.56 mm) between row spacing. Available with or without mounting ears and 128" holes. **Test Voltage:** 1800 VAC rms at sea level. **Current:** 5 amps.

No. 2-58 Terminal Screw
A
B
Header

Features convenient mating, track mounting, and wire clamp on terminal blocks. Rated at 1 A, 125 V. **Terminal Blocks:** Break-resistant thermoplastic. **Terminals:** No. 2-56 screws with clamp, 1/4" center to center spacing. **Wire:** Up to No. 16 AWG. **Headers:** 2 rows of .025" square tin-plated pins on .100" centers with hook retainers. Designed to mate with all standard connectors.

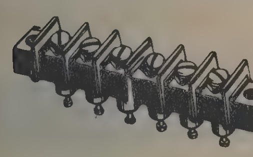
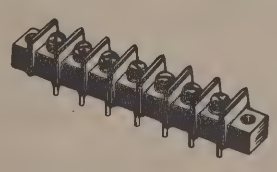
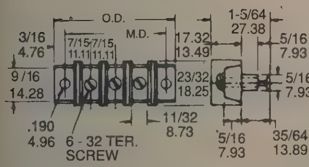
Feed-Through Terminal Blocks

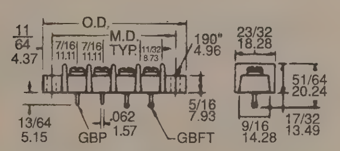




GFT



GBP



Rated 20 A, 300 V, with a 150°C (302°F) continuous use temperature rating. **Max. Width:** .718" ±0.030". Terminals on 7/16" center to center spacing. The blocks are made from black thermo-set phenolic. The screw terminals have a No. 6-32 plated steel screw which accepts wire from 22 AWG to 12 AWG (per UL).

Type GFTXW

Similar to type GFT but the blocks are made from thermoplastic (UL rated for 105° continuous use) and also have wire clamps included. The two items listed are offered at special pricing. 2-26 terminal types are available by special order with a 10 piece minimum required per item.

Stock No.	Mfr.'s Type	No. Of Terminals	EACH

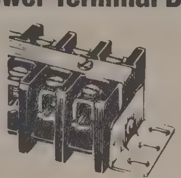
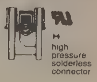
764-0525	GFTXW-5	5	**4.28**	**3.59**	**3.25**	**2.90**

Type H Sectional, High-Power Terminal Blocks





These blocks have a maximum diameter of 2.0" and .652" center to center spacing. The housing is thermoplastic-polyester with a white fiber circuit marking strip. Rated 75 A, 600 V and 130°C (266°F) continuous use temperature. Unique bar and traveling collar design eliminates the lugging of wire. UL recognized for wire sizes 16 AWG to 4 AWG. Copper terminals with high-pressure solderless connectors. Items with 11-30 terminals are available by special order. Special order minimum is 10 pieces for each item.

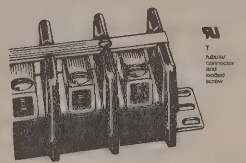
Type T High Current Terminal Blocks



T
tubular connector and slotted screw

UL Standard 1059, CSA Guide No. 184-N-90. These blocks have a maximum diameter of 2.5" and 1.169" ±0.030" center to center spacing. The housing is black phenolic rated for 125 A, 600 V, and for 150°C (302°F) continuous use. Tubular, high-pressure solderless connections of electrolytically pure copper accommodate wire without lugging and provide 100% conductivity. The thermo-set phenolic molding has a white fiber marking strip. Thru-bolt construction. UL recognized for wire 6 AWG to 10 AWG. Available in 1-6 terminals. Items not listed are available by special order. A minimum of 10 pieces per item is required on unlisted items.

Heavy Duty Han® Series Industrial Power Connectors

Listed below are the most popular configurations in Harting's versatile Han® series of power connectors. Application possibilities are extensive — both electronic and electrical. All series have UL and CSA approvals. The HAN D®, HAN E®, HAN A®, and HAN® HsB series have several international approvals.

Inserts feature leading protective ground, polarization, interchangability of male and female inserts in hoods and housings, and the ability to use the inserts without hoods for rack and panel applications.

Hoods and housings are in accordance with International Standard IEC529 (DIN40050) degree of protection IP65 which complies in full with NEMA Type 4. They feature electrical connection with protective ground and high mechanical strength and vibration resistance.

Founded in 1945 HARTING ELEKTRONIK has become one of the World's leading manufacturers and suppliers of Industrial Power Connectors designed to meet demanding industrial applications and environments.

HARTING Heavy Duty Han® Connectors are applicable in a wide variety of electronic and electrical applications including for example:

Power Utilities
Chemical Plants
Machine Tool Controls
Industrial Instrumentation
Conveyor Equipment

and many more.

All Harting Han® series connectors are:

UL Recognized under file # E 80178 and

CSA Approved under certified file # 18753.

All hoods and housings are in accordance with International Standard IEC 529 (DIN 40050) degree of protection IP 65 which specifies that enclosures are protected against windblown dust and rain, splashing water and hose directed water.

This degree of protection complies in full with NEMA Type 4 (Publication No. 250-1979) requirements.

A complete connector consists of the following components:

Hoods with
- top or side entry
- low or high profile
- single or double locking lever

Male/Female inserts with
- screw clamp or
- crimp contact or
- cage-clamp spring termination

Housings (panel or surface mount)
- one or two side entry
- low or high profile
- single or double locking lever
- with or without plastic spring cover
- protective covers available
- labels according to CSA-approval

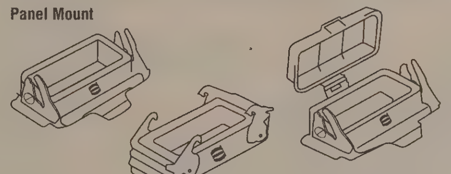
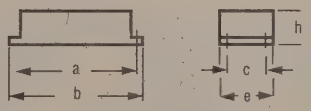
Standard Housings





Dimensions in Inches

Housings are in accordance with International Standard IEC 529 (DIN40050) degree of protection IP65 which complies in full with NEMA Type 4. They feature electrical connection with protective ground and high mechanical strength and vibration resistance.

Provide excellent mechanical and electrical protection in demanding environments. **Material:** Light metal alloy or thermoplastic. **Color:** Silver Grey. Can be used with either male or female inserts.

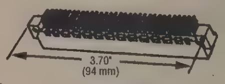
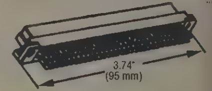
Gds A Series Printed Circuit Board DIN 41612 Connectors

— NEW —

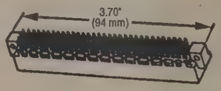
Based on the requirements of DIN Standard 41612 these male and female connectors are available in many termination techniques — straight and right angle solder pins for printed circuits, solder lugs for discrete wiring, press-in for backplanes. All offer low insertion/withdrawal force and high vibration resistance. Feature glass-fiber filled thermoplastic resin moldings. Copper alloy contacts are gold plated in contact zone according to performance level 2 and tinned in termination zone for greater solderability. 0.100" (2.54 mm) contact spacing. Certified according to DIN ISO 9001. All versions are CSA certified; types B, C, Q and R are UL recognized.



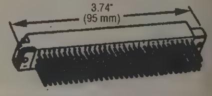
Type B Male Angle



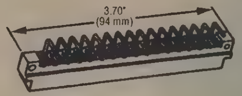
Type B Female Solder Lugs



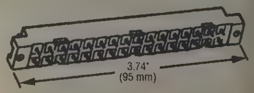
Type C Male Straight



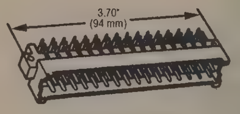
Type C Female Wrap Posts



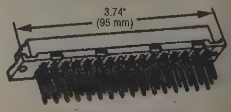
Type D Male Angle



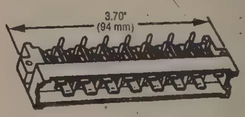
Type D Female Straight



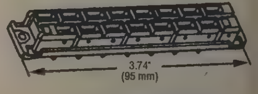
Type F Male Angle



Type F Female Press-In



Type H Male Angle



Type H Female Straight

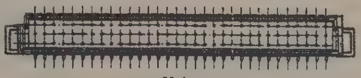
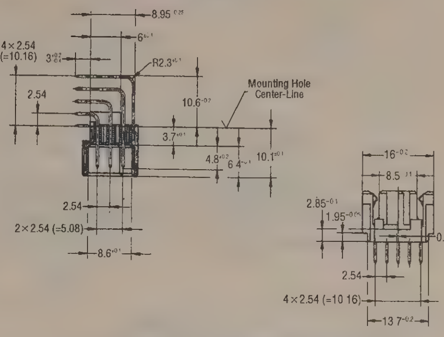
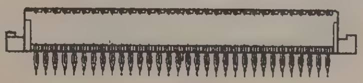
har-bus 64



Male





Female

Harting Elektronik, Inc. introduces har-bus 64 — the new VME64 extension connector system. har-bus 64 is 100% backward compatible to existing eurocard systems and Harting's Gds A-C. Two row, z and d, have been added to the VME P1/J1 and P2/J2 connectors.

Universal Adapter Kits

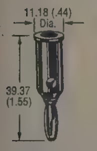
Models 5698 and 5748 Adapter Kits allow users to make their own adapter combinations, such as SMA to BNC or BNC to double banana plug. Adapter ends are joined with coupling nuts.

Universal Adapter Kit. Kit contains 2 pcs. each: BNC male, BNC female, TNC male, TNC female, SMA male, SMA female, "N" male, "N" female, four intermediate couplers, one double banana plug and one double banana jack.

885-5698.	5698. Black	EACH	114.00

Maxi Universal Adapter Kit. Kit contains 2 pcs. each: BNC male, BNC female, TNC male, TNC female, SMA male, SMA female, "N" male, "N" female, UHF male, UHF female, Mini UHF male, Mini UHF female, "F" male, "F" female, RCA male, RCA female, six intermediate couplers, one double banana plug, one double banana jack and one sampler.

885-5748.	5748	EACH	230.00



Solderless Stackup Banana Plug

Wire firmly held in place with internal setscrew, eliminating soldering. Assembly of test leads simplified. **Upper:** Banana jack. 4.22 mm (.166) dia., brass. **Lower:** Banana plug. Spring, one piece heat treated beryllium copper. Fits standard 4.22 mm (.166) dia. banana jack. **Rating:** 5000 WVDC, 15 amps, +50°C (+122°F) max. +150°C (+302°F).

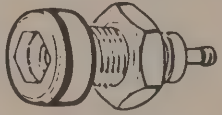
Military Insulated Metal-Clad Tip Jacks



For .080" diameter standard tip plug. Comes with nylon body and nickel-plated brass jacket. Gold-plated turret terminal contact with wrap-around beryllium copper spring. Come with nickel-plated washer and nut. Mount panels to .218" thick. **Breakdown Voltage:** 8000 VDC. **Current:** 10 A. Conform with MS-16108, Rev. F of MIL-STD-242A and MIL-C-39024/10.

Stock No.	Mfr.'s Type	Color	EACH

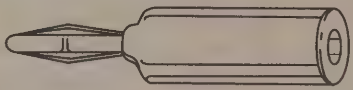
Insulated Hex Body Banana Plugs



For standard banana jacks of 0.175" across flats. Wire can be soldered to threaded-stud or flared and held by stud for solderless connection. Accept up to 16-gauge wire. Nylon insulated handle is UL approved for self extinguishing. Plug is nickel-plated brass with a current rating of 15 amps, breakdown voltage of 3500 Vrms minimum, and contact resistance of 0.010 ohms maximum.

These connectors use bayonet-type coupling, do not intermate with other high voltage series or with BNC Connectors.

SHV-Series

Manufactured to National Bureau of Standards specification ND 545. These connectors feature an improved interface over MHV connectors. Center contacts are recessed to prevent shock hazards when the connectors are unmated. **Material Bodies and Fittings:** brass, QQ-B-626 — Alloy 360½H. **Insulators:** Teflon, MIL-P-19468. **Bodies, Fittings and Outer Contacts Finish:** TR-5® except where noted. **Ratings at Sea Level:** Operating — 3500 VAC or 5000 VDC; Test — 5,000 VAC; 10,000 VDC.

These connectors are rated at 500 Volt RMS. **Frequency Range:** 0-4 GHz. **Impedance:** 50 Ohm except for the 75 Ohm impedance listings. Silver-plated bodies are finished with TR-4® chromate treatment to resist tarnish and salt spray. The rest are finished with TR-5® electro-deposited plating that has superior resistance to tarnish and corrosion.

PC Board Terminal Blocks

KRES, KS and KRM Series Terminal Blocks feature a high-density modular screw-clamp wire connection system designed for PCB applications. Each contact is wire-protected for clean, safe connections. KRES Series available in straight, 90°, and 45° angle mount. The 2-piece KCS Series is available in straight and 90° versions. KRM Series offers a low profile package in a "dove-tail" design. Spacing includes 3.5 mm, 5 mm, and 5.08 mm. **Material:** PA 6/6, Light grey (5 mm), Dark grey (5.08 mm).

Female Socket, 5 mm (.197") Pitch, Upright Version

M/A-COM Between-Series Coaxial Transmission Line Adapters provide convenient transitions between all popular series coaxial connectors. The adapter design provides a minimum length consistent with good electrical performance. The small, low VSWR, and broad frequency coverage permits a wide range of applications in both measurement and systems use. All dielectrics are TFE fluorocarbon. The center contacts are made of beryllium copper, gold plated.

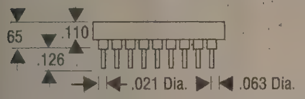
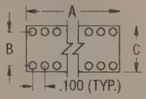
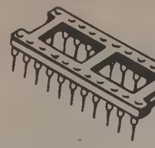
Standard Solder Tail DIP Sockets







Most popular line of standard low profile IC-Sockets. Open frame design leaves space beneath IC for improved heat dissipation, easier PCB cleaning and inspection.

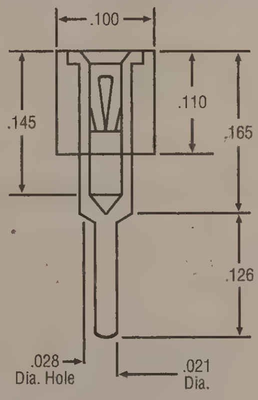
Strip Sockets Solder Tail

On .100 Centers



Materials. Insulator Body: Glass-filled thermoplastic polyester, self-extinguishing rated; UL94V-9; color — black; resistant against detergents, mineral acids, solvents, greases and oils (short time). **Receptacle (Sleeve):** Screw-machined brass, plated 200µ" tin-lead. **Pin:** Phosphor bronze, plated 200µ" tin-lead over 80-120µ" nickel. **Contact:** Stamped beryllium-copper, plated 30µ" gold. **Mechanical Life:** 100 cycles minimum.

Electrical Data. Rated Current: 1A. **Rated Voltage:** 100 VRMS/150VDC. **Contact Resistance:** 10mΩ max. **Insulation Resistance:** 10,000MΩ min. **Dielectric Strength:** 1000 VRMS min. **Capacitance:** 0.3 pF max.

Environmental Data. Operating Temperature Range: –55°C to +125°C. **Vibration:** 10-2000 Hz, 15g. **Shock (No Elect. Discontinuity Greater Than 1 µs):** 150 g. **Solderability:** IEC 68-2-20 Ta. **Resistance to Soldering Heat:** IEC 68-2-20, 260°C, 5s. **Resistance to Atmospheric Corrosion:** IEC 68-2-42 and 43.

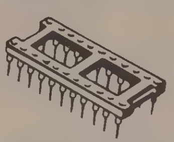
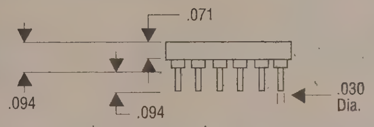
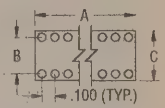
Ultra Low Profile DIP Sockets







"Ultra low profile" dual-in-line sockets are equipped with specially designed contacts allowing .094" height above PCB. Special short contact requires .075" insertion depth only. **Solder Tail Diameter:** .030".

Pin — 200µ" Tin; Contact — 30µ" Gold

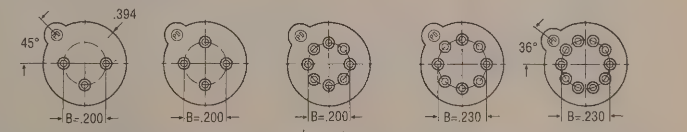
Transistor Sockets



Series 917 TO Package Sockets exist with 3, 4, 8 and 10 contacts. Two 8 pin version feature pin centers either on a .200" or a .230" circle. **Plating Sleeve (Pin):** 200µ" Sn. **Plating Contact (Clip):** 30µ" Au.

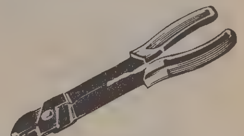
Nylon Connector Tools

Prototype Crimping Tools

Balanced and weighted, machined from hardened steel.

Type W-HT-1919. For .093" pin terminals.
863-0520. W-HT-1919 .... **EACH 15.64**

Type W-HT-1921. For .062" pin terminals.
863-0500. W-HT-1921 .... **EACH 15.64**



Crimping Tool

Production Crimp Tools

Type W-HTR-1031-E. For .093" terminals, 14-22 AWG wires.
863-0560. W-HTR-1031-E .... **EACH 161.28**

Type W-HTR-1719-C. For .062" terminals, 18-24 AWG wires.
863-0565. W-HTR-1719-C .... **EACH 204.80**

Type W-HTR-2262-A. For .062" terminals, 24-30 AWG wires.
863-0550. W-HTR-2262-A .... **EACH 183.90**

Extractor Tool

Extractor Tools

Remove terminal from connector housing without damage.

Type W-HT-2038. For .093" pin terminals.
863-0530. W-HT-2038 .... **EACH 15.06**

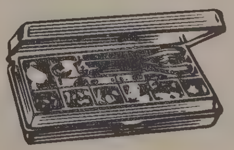
Type W-HT-2285. For .062" pin terminals.
863-0510. W-HT-2285 .... **EACH 16.94**

Nylon Connector Designer Kits

Polarized nylon connector kits include male and female housings in all circuit capacities, terminals and tools, in individual compartments. Lightweight, unbreakable; snap-lock.

Type WM-72 Miniature Kit. 56 connectors using .062" terminals, crimp and ejector tools.
863-0600. WM-72 .... **EACH 56.52**

Type WM-50 Standard Kit. 45 connectors using .093" terminals, crimp and ejector tools.
863-0610. WM-50 .... **EACH 64.42**



.093" Power Connectors

International Series

- UL Recognized, CSA Certified and TUV Licensed
- Positive Lock
- 600 Volt Rating
- Up to 12 Amperes Per Circuit
- Fully Isolated Terminals
- CSA File No. LR 19980, TUV License No. R-75107
- For Tooling and Crimp Terminals See Page 275

Dual Row Crimp Connector Housing

- End-to-End and Side-by-Side Stackable on .100" Grid
- For Use with 70058 and 71851 Box Crimp Terminal
- Mates with Molex Dual Row Headers 8723, 8724, 7723, 70203 and 8624; Also Mates with Molex Interim Clip 70013

Crimp Terminals and Polarization Pin

- For Single and Dual Crimp Connector Housings
- For Use With All Versions of Connector Housings 70066 and 70450
- Terminals Accommodate Wire Ranges 22 and 24, 24-30, and 32-36
- Dual Beam, Fully Enclosed Box Contact with Locking Lance
- Mates with .100" Center Single or Dual-Row Headers or .025" Pins

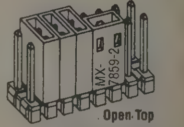
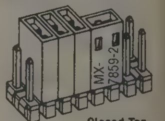
Polarization Pin (Universal)
863-3245. Model 15-04-0292 .... **PER PK./10 1.85**

Two Circuit Shunt or Jumper

- Mates with .100" Grid Male Connectors: Dual or Single Row Headers — e.g. 8824 and 70343, .025" Square and Round Wire Pins — e.g. 4168
- Easily Applied — No Soldering
- Reliable — No Accidental Disconnects
- Low Cost Alternative to DIP Switches
- Increases Current Flow and Decreases Resistance vs. DIP Switches
- Dual Beam Terminals: 2 Points of Contact Per Pin
- Open and Closed Top Versions
- Closed Top Prevents Upside Down Mating
- Stackable End-to-End and Side-to-Side



Open Top



Closed Top

Specifications. Terminal Material: Phosphor Bronze. **Housing:** Glass filled polyester. U.L recognized 94V-0. **Contact Resistance:** 15 milliohms maximum (gold). **Current Rating:** 2 amps at 30°C rise over ambient.

1.27 mm (.050") Pitch SIMM Sockets

- Zero Insertion Force Contacts Improve Socket and Module Life and Provide for Fast On-Line Assembly
- Guaranteed 2 Points of Contact Per Readout With Standard JEDEC Module
- Anti-Overstress Latch Feature Provides Extra Protection During Module Removal
- Polarization Posts Provide Orientation for Proper Loading of Socket into Printed Circuit Board
- Polarization Rib Properly Orients Module to Socket
- EIA Standard Dimensions
- UL File No.: E29179
- CSA File No.: LR19980
- Mates With JEDEC Modules
- Housing: Black LCP, UL 94V-0
- Durability: 25 Cycles

1.27 mm (.050") Pitch EBBI™ 50D Connector System

Vertical Plug

- Polarized D-Shaped Leaf-Contact Connector for Parallel Board Stacking
- SMT Compatible, High Temperature 94V-0 LCP
- Metal Retention Clips for Mechanical Hold Down Before and After Processing
- Low Profile — 12.50 mm Stack Height
- Recommended for 1.60 mm (.062") PCB
- Meets VESA Standards for Advanced Video and Graphics Cards (68 and 80 Circuits)
- UL File No.: 92NK28881 and 92NK28882
- CSA File No.: LR19980-239A
- Durability: 500 Cycles Minimum
- Contact Area Plating: 30 Micro Inches of Gold
- Tail Length: 3.40 mm (.134")

XLR "RC" Series Right Angle Cable Connectors

Shells: Die cast zinc. **Insets:** Fiberglass reinforced hard polyester. Satin nickel housing and silver contacts standard — "B" suffix on the type number designates black chrome housing and gold contacts. **Wire Diameter Range:** .11" to .315". Seven indexing positions for high-density packaging. Self-retentive, release latch hook. Compatible with all XLR connectors. Also available in 6 pin.

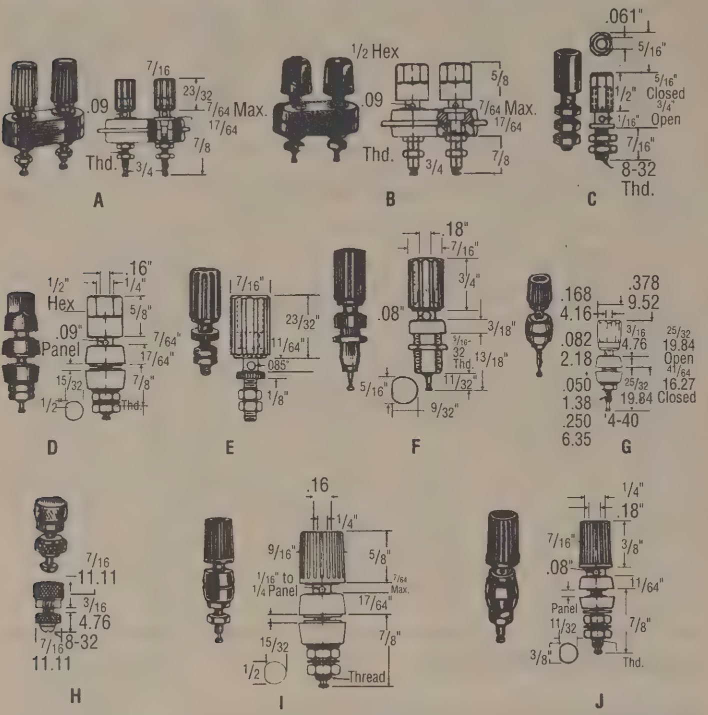
Single And Dual Binding Posts



Type 137. Head: Captive, octagonal, nickel-plated. **Body:** Brass, nickel-plated. **Accepts:** Phone tip, spade lug, banana plug, alligator clip or wire strand. Can be completely insulated from panel. With two hex nuts. **Type 1482. Head:** Captive, molded lexan. **Body:** Brass, nickel-plated. **Accepts:** Phone tip plug, spade lug, banana plug, alligator clip or wire strand. Can be completely insulated from panel. With 2 hex nuts. **Type 1517. Head:** Captive, molded lexan with brass, gold-plated insert. **Body:** Brass, gold-plated. **Washer:** Molded lexan, with brass, gold-plated inserts. **Accepts:** phone tip plug, spade lug, banana plug, alligator clip or wire strand. Molded washers completely insulate post from panel. Miniature washers and narrow fluted head require min. panel space. Mounts in 3/8" round or "D" hole in panel as indicated. Wrap-around solder terminal on stud for direct connection. **Type 899.** Standard multiple connection insulated hex head binding post, mounts in 1/2" round or D hole, includes all mounting hardware. **Type 3015.** Miniature multiple connection insulated binding post, mounts in 1/4" round or D hole, includes all mounting hardware. **Type 110.** All metal binding post, brass nickel-plated, mounts in #8 clearance hole, includes all mounting hardware. **Type 459.** Standard multiple connection all insulated fluted head binding post, mounts in 1/2" round or D hole, includes all mounting hardware. Accepts standard banana plugs, .080 phone tips, wire, alligator clips and spade lug. Accepts miniature banana plugs, .080 phone tips, wire, alligator clips and spade lug. 1 K volts 60 cycle AC continuous working voltage, when insulated from panel as recommended. **Capacitance:** 5.0 mmfd. (Type 1517, 3.0 mmfd).

Dual Binding Posts Type 1477 and 269. Standard dual insulated binding posts, mounts in two 1/2" holes on 3/4" centers, panels up to 1/4" thick, includes all mounting hardware.

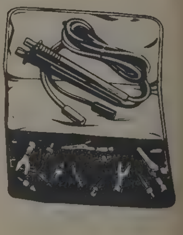
Model 699 Universal Test Lead Kit



Universal Test Lead Kit offers 50 leads in one for complete interchangeability. Retrofits to most existing equipment. **Kit Includes:** prod (made of KJB-Type ABS plastic 94V-0), 4 phone tips, 2 needle tips, 2 alligator clips, 2 spade lugs, 2 banana plugs, 18 PVC-covered wire (48" nom. overall length), and 1 red and 1 black lead. Prod features ribbed finger grip and non-slip finger guard.

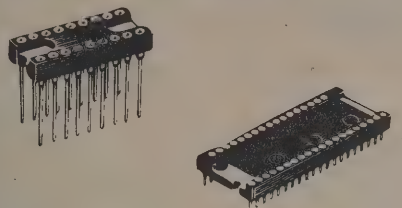
ICA Series Screw Machine Sockets



Feature four finger beryllium copper contacts with high retention design. Low profile body with mounting holes. "S" in Mfr.'s Type number indicates solder dip sockets. "WB" in Mfr.'s Type number indicates 3-level wire wrap. **Body Material:** Glass-filled black polyester. **PCB Hole:** .035" ±.002". IC lead and socket leads are coincident. **Plating:** TG30 has 30 µ inch minimum gold on contact area. 200 µ inch minimum tin in the terminal area. TG30 includes an underplate of 50 µ inch minimum nickel. **Temperature Range:** –65°C to +125°C.

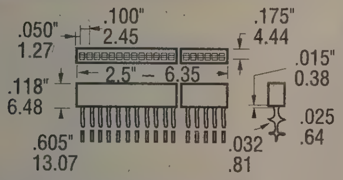
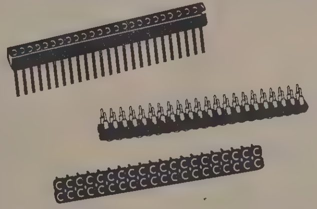
SBE Series Strip Socket





SBE Series. Solder dip strip socket. Accepts .015" dia. pins. **Body Material:** Black polyester, glass-filled. **Contact Material:** Phosphor bronze. **Contact Finish:** Gold. **Mounting Instructions. PCB Hole:** .035° ±.002" (0.89 ±0.05 mm). Socket is offset .026" (.66 mm) from IC leads. **Temperature Range:** –65°C to + 125°C. Accepts .016"-.021" dia. pins. **S Solder Tail:** .040" ±.022". **WB Wire Wrap Tail:** .055" ±002". **Flammability:** UL 94V-0. **Temperature Range:** –65°C to +105C.

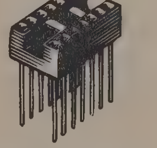
ICN Series Wire Wrap Sockets



Types with WB in Mfr.'s Type number are wire wrap sockets and include terminal barbs which allow self-lock into PC board, rugged socket body design and RN side wipe contact design. **PCB Hole:** .037 ±.002" (.94 ±.05 mm). Socket leads are offset .018" (.46 mm) from IC leads. Suffix "T" denotes tin contact finish. **Temperature Range:** –65°C to +125°C.

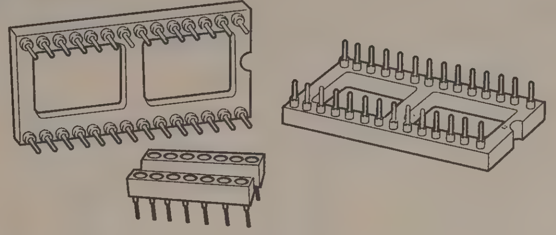
ICE Series Open Body Screw Machine Sockets *— NEW —*



Features four finger beryllium copper contact that accepts short IC leader. Open body provides connection cooling. Solder DIP sockets. **Body Material:** Black polyester, glass filled. **Shell:** Half hard brass. **Mounting Information:** .030" + .002" PCB hole. **Contact Plating:** TG — 10 µ inch minimum gold on contact area, 200 µ inch minimum tin/lead on terminal area; TG30 — 30 µ inch minimum gold on contact area, 200 µ inch minimum tin/lead on terminal area. Both include 50 µ inch minimum nickel underplate. **Temperature Range:** –65°C to +125°C.

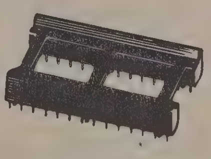
ICN Series Solder DIP Production Sockets



The ICN Series features the RN dual leaf side wipe contact design which increases the contact area by 100% over edge-bearing type contacts. The S4 series configuration offers the E-Z entry feature to help guide leads on large LSI devices into the contact area. The contacts are protected from damage by closed entry mold design. Contacts are designed to accept leads up to .015 inch thick. The S4 series has rib type body structure which improves convection cooling. Are supplied with anti-wicking wafers and standoffs for easy flux removal. **Body Material:** Black polyester, glass-filled. **Contact Material:** Phosphor bronze. **Contact Finish:** Suffix G — 10 µ inch (.254 m) min. gold over 50 µ inch (1.27 µm) min. nickel; Suffix T — 30 µ inch (.762 µm) min. hot tin dip and wipe. **Temperature Range:** –65°C to +125°C. **Flammability:** UL 94V-0. **PCB Hole:** .035" ±.002" (0.89 ±0.05 mm). Socket Leads are offset .026" (0.66 mm) from IC leads.

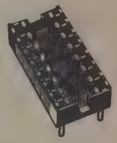
ICB Series Solder DIP Production Sockets



Dual contact, low profile socket allows dense board-to-board spacing. Features closed bottom body design and self-locking tail. Dual wiping contact design offers high compression for gas-tight reliability. Beryllium copper contacts. **Body:** Black polyester, glass-filled. **Contact Finish:** 200 µ inch min. tin/lead in contact area; 100 µ inch tin/lead on terminal area. **Terminal Area:** 100 µ inch min. electro tin over 50 µ inch min. nickel. **Temperature Range Rating:** –65°C to +125°C. **PCB Hole Mounting:** .040° ±.002" 3 dia.

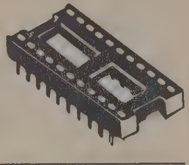
ICL Series Solder Dip Production Sockets



Designed primarily for high volume applications. Low profile (.150") allows very dense board-to-board spacing; the socket is stackable side-to-side and end-to-end to optimize board surface usage. The body material is glass-filled black polyester. **Contacts:** Beryllium copper. Suffix "T" denotes tin contact finish, "TG" denotes gold over nickel contact finish. **Terminal Range:** –65°C to +125°C. **PCB Hole:** .031° ±.002" (.79 ±.05 mm). IC leads and socket leads are coincident. **Temperature Range:** –65°C to +125°C.

Dual Wipe Sockets

— NEW —

CICO version offers an economical alternative. **Body:** Black polyester, glass-filled. **Contacts:** Phosphor bronze. **Contact Plating:** 80 µ inch min. tin/lead over nickel flash. **PCB Hole:** .040" ±.002". IC leads and socket leads are coincident. **Body Height:** .201". S8 has a self-locking barb. S8A is for auto insert and has a straight lead.

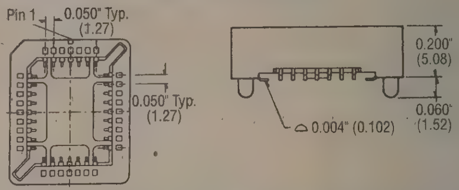
PLCC-SMT Series Surface Mount Plastic Leaded Chip Carrier Sockets



High-density, low profile 0.200" (5.08) maximum height. Open frame design allows for visual inspection of solder joints. Footprint matches device. Phosphor bronze contacts with tin-over-nickel plating. High-temperature, black polyphenylene sulfide insulator, rated UL94V-0, is compatible with IR reflow and wave soldering. **Insertion Force:** 180 g/pin maximum. **Withdrawal Force:** 28.35 g/pin minimum. **Contact Resistance:** 20 mΩ. **Current Rating:** 1 A. **Temperature Range:** –55°C to +105°C. For automatic assembly. Available with or without location posts.

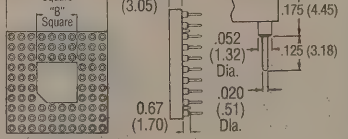
Pin Grid Array Sockets



6-point contact provides consistent insertion/withdrawal and contact resistance. Low insertion force (2.5 ounces) for easy installation and removal. Beryllium copper contacts finished with 10 micro-inch gold on contact area and 200 µ" tin/lead on terminal area over 50 µ" nickel underplate. Precision machined half hard brass shell that protects against flux contamination and solder wicking. Standard 0.125" long solder tall termination. **Current Rating:** 1 A. **Temperature Range:** –65°C to +125°C. Black polyester, glass-filled body. **Rated:** UL94V-0.

IDS-NPK and IDS-PK Series 0.100 × 0.100" (2.54 × 2.54) Grid IDC Socket Connectors

For quick connect/disconnect with all 0.025" post headers. IDS -NPK series sockets offer total compatibility to MIL-C-83503. IDS-PK series sockets incorporate a center polarization tab to meet DIN-41651 and BT-224. Phosphor bronze copper contacts plated with 10µ" Robex™ on contact area and 100µ" tin on terminal area over 50 micro-inch nickel. Black, glass-filled polyester body and lid, rated UL94V-O. 0.420" wide × 0.235" high. **Grid:** 0.100 × 0.100". **Temperature range:** -55°C to +105°C. Order strain reliefs separately below. UL recognized, CSA certified.

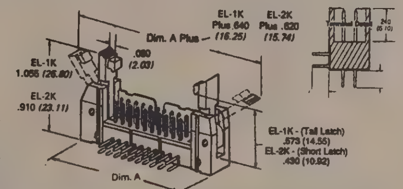
IDH-PK Series 4-Sided 0.025" (0.635) Square Post IDC Headers



Four-sided body design provides foolproof socket polarization and pin protection. Mounting configurations include headers for straight (vertical) or right angle (horizontal) applications. MIL-C83503, DIN 41651 and BT-224 compatible. Allows convenient multiple sourcing. Phosphor bronze contacts plated with 10µ" Robex™ on contact area and 100µ" tin on terminal area over 50µ" nickel. **Temperature range:** -65°C to +125°C. Housed in black, glass-filled polyester, rated UL94V-O. All solder tails are rounded to 0.028" for easy PCB insertion. UL recognized, CSA certified. Order socket ejector latches separately at right.

IDH-LP Series Low-Profile 0.025" (0.635) Square Post Headers

- ► **Robex™ Plating: Provides "better than gold" cycling and environment performance.**

Designed for use where space saving is critical, these low profile headers provide mechanical polarization with full shrouding when mated with socket connectors that have center polarization tab. Available for straight or right angle applications. Phosphor bronze contacts plated with 10µ" Robex™ on contact area and 100µ" tin on terminal area over 50µ" nickel. **Temperature range:** -65°C to +125°C. Housed in black, glass filled polyester, rated UL94V-O. **Tail length:** 0.102" (2.59). All solder tails are rounded to 0.028" for easy 0.062" thick PCB insertion. UL recognized, CSA certified.

NSH Series 0.025" (0.635) Square Post Non-Shrouded Headers

Notched body design allows easy break-to-length capability. 0.100" (2.54) spacing. Phosphor bronze contacts available with Robex™ plating on contact area and tin on terminal area over nickel for types with TR suffix; or tin over nickel for types with a T suffix. **Current rating:** 1A at maximum temperature range: -65° to -125°C. Available in 36 contact single row or 80 contact dual row design, in straight or right angle termination. UL recognized, E73764.

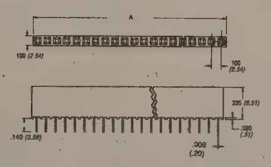
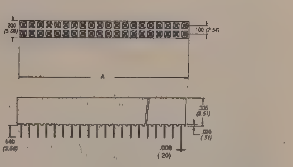
SBQ Series 0.025" (0.635) Square Post Receptacles

Single Row



Dual Row



Socket mates to square post non-shrouded headers. Available in single or dual rows: 0.100" × 0.100" (2.54 × 2.54) contact spacing. High-temperature back thermoplastic body can be cut to size; rated UL94V-0. Excellent for add-on cards. Phosphor bronze contacts plated with 10µ" gold over nickel on contact area and 100µ" tin on terminal area. **Current rating:** 1A. **Temperature range:** -65°C to +105°C.

CP Series Standard DIN Plug Connectors

DIN 41612 compatible plug designed for daughter board mounting. Features 3 row, 0.100" (2.54) grid that permits high density packaging. Retent clip secures connector during wave solder. Grey, thermoplastic glass-filled body. Copper alloy contacts. Termination style/tall length: Solder, right angle/0.114" (2.90 mm). Plating is 10 µ" min. Robex™ on contact area. 100 µ" tin on terminal area. 50µ" Nickel underplate. **Current rating:** 1 A @ 100°C. PC board hole: 0.039 0.002". UL recognized, rated UL 94V-0.

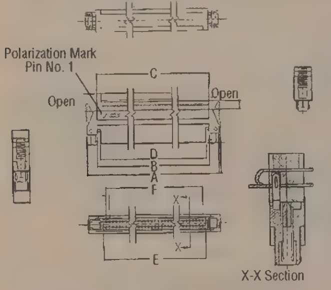
RN PAK-50® P25E and P50E Series 50 MIL IDC Sockets



Accepts 30 AWG, 25 mil center flat cable P25E and P50E sockets are designed to mate with P50E series IDC board mount plugs, ordered separately on this page. Offer 3-dimensional mating: vertical, horizontal and parallel. Latching eject mechanism facilitates mating/unmating. The P25E provides daisy chain capability. The P50E socket accommodates backward and forward capability in that standard .100" and .050" connectors can be used on one cable assembly. Redundant ribbon contact design provides lower insertion/withdrawal forces, lower contact resistance, high normal force and high wear resistance. Contacts are recessed and fully protected on three sides, minimizing pin deformation. Phosphor bronze contacts plated with gold over nickel on contact area, tin over nickel on terminal area. **Contact Resistance:** 30 MΩ. **Current Rating:** 0.5 A. Black, glass-filled nylon body, rated UL94V-0. **Temperature range:** -55°C to +105°C.

CS Series Standard DIN Socket Connectors

Compatible with VME Bus backplane applications. Mate with C-Form and R-Form plugs. Types with Si suffix have solder termination. 0.157" (3.99 mm) tall, and retent clip. Type with PS suffix has FLEXPRESS® contacts that permit solderless mounting; 0.236" (5.99 mm) tall. Grey thermoplastic, glass-filled body. Phosphor bronze contacts. Same plating and current rating as C-Form plugs above UL recognized, rated UL 94V-0.

RN PAK-50® 2-PC. 50-MIL Pitch Connectors

RN PAK-50® interconnect system features a redundant ribbon contact that provides lower insertion/withdrawal forces, lower contact resistance, high normal forces and high wear resistance. 3-dimensional mating versatility-horizontal, vertical and packaging. Both male and female contacts are recessed and fully protected on 3 sides, minimizing pin deformation. Available in 20-100 pin positions. 0.118" (3.00) long straight and right-angle soldered terminals with retention clip to eliminate hardware and secure connector during wave soldering. Phosphor bronze contacts plated with gold on contact area and tin on terminal area over nickel. **Contact Resistance:** 25 MΩ maximum. **Current Rating:** 0.5 A/contact. Black, glass-filled nylon housing with flange, rated UL94V-0. **Insulation Resistance:** 1000 MΩ minimum @ 500 VDC.

BP31 Series have LEXAN polycarbonate resin insulating parts. All others have nylon plastic per MIL-P-20693A, Type IV. All metal grounding type designed for rapid ground connections. Made of machined brass, gold plated and polished. Design complements other hex nut 5-way binding post. Hex and fluted nut types are rated for 30 amps, 1000 volts working, except BP21 which is 15 amps. UL recognized standard 1244. IEC 348.p30 ANSI C39.5-1974. Double assembly type are for use where binding posts are mounted on ³/₄" (19 mm) centers. Rated for 30 amps, 1000 volts working.

D

For safe, quick positive panelboard connections. Available in 25, 50, 100, and 250 amp capacities. 25, 50, and 100 amp types are rated 125-250 VAC or DC current interrupting; 600 V unenergized connector disconnect use only. CSA certified, File #LR-17812. 250 amp types rated 600 V unenergized connect or disconnect use only. **Plugs:** Wiring connections to the same plugs can be either soldered or solderless. Cable fastening screws are provided for accommodation of a wide range of cable sizes. **Grips:** Two-piece threaded construction. **Receptacles:** Color-matched nylon caps and bodies. Wiring connection is made to a threaded stud by wire wrap-around, lug, or bus bar connection.

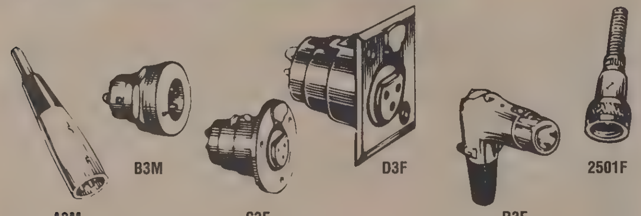
Male and Female Q-G® Audio Connectors



Plugs and receptacles offer up to 5-contact versatility by means of up to four circuit contacts plug electrically integrated ground terminal on shell. Neoprene cable strain relief bushing keyed to shell; ribbed for easy access to male plugs. Die-cast zinc alloy with satin-nickel finish. Receptacles will mate with all standard audio connectors. Right angle configuration reduces "cable clutter."

Applications

- Transportation
- Process Control
- Communication
- Marine Electronics
- Medical Instrumentation
- Geothermal Instrumentation
- General Industrial Electronics

Features and Benefits

- Superior Leakage Protection; Contact Area Is Double-Sealed for Excellent Moisture and Chemical Resistance
- Reduced Part Count for Reduced Labor to Assemble
- Thermoplastic Rubber Body Simulates Closed Entry Contact System to Prevent Probe Damage or Accidental Loss of Spring Retention Due to Misaligned or Bent Pins
- Exceeds Coast Guard Specifications for Water Tightness (CFR 46 Part 110.20)
- Integral O-Ring and Gasket; O-Ring Is Molded Onto Cord Housing Assembly and Gasket Is Molded Onto Panel Housing Assembly to Prevent Leakage and Eliminate Need for Additional O-Rings and Gaskets
- Abrasion-Resistant Thermoplastic Boot Provides Strain Relief and Accepts Cable Diameter .195" to .265"
- Contact Terminal: Solder Cup Contacts (Factory Assembled Into Panel/Cord Connector Housings Ready to be Terminated)
- No Grommets; Cable Clamp Assembly Features Living Hinges, which Snap Easily Onto and Holds the Cable
- Easy Contact Removal
- Low Insertion Force Required
- Housing Rated UL 94V-O Against Flammability

Primary Power Receptacles

UL and CSA Approved, International Standard CCE-22

Shell: Black glass reinforced thermoplastic polyester. UL flammability rating 94 V-O, yellow card #E45575. **Pins:** Silver-plated brass. **Terminals:** Electrotinned brass except EAC-333, silver-plated brass.

EAC-333. 3-pin male receptacle with right angle housing for PC board mount. Rear of panel mounting. PC terminals project .125" to extend through PC board. Ground pin is integral with the ground solder lug on rear of receptacle. Two additional .136" holes for fastening to panel or chassis. **EAC-309.** 3-pin male receptacle with standard lug terminals. Mounts from front or rear of panel with two #5 screws or .125" rivets (not supplied). **EAC-311.** 3-pin male receptacle with FASTON terminals. Mounts from front or rear of panel with two #5 screws or .125" diameter rivets (not supplied). **EAC-305.** 3-contact female receptacle front mount with two #4 screws or .094" rivets (not supplied). **EAC-405.** 3-contact female receptacle with standard solder lug terminals. Snap-in panel mounting. **EAC-409.** 3-pin male receptacle with standard solder lug terminals. Snap-in panel mounting. **EAC-411.** 3-pin male receptacle with FASTON terminals. Snap-in panel mounting.

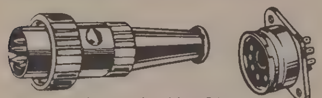
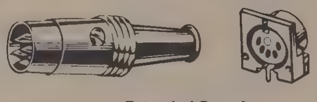
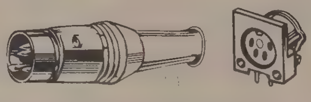
DIN Plugs and Sockets



With 30° Locking Ring



Extended Barrel



Shielded Barrel

DIN is the name given to this high-quality family of versatile miniature audio connectors. Features include solder lug or PC terminations, as well as bright nickel-plated or colorful plastic snap-on shells. Designed for audio circuitry, they are also ideal for test equipment, computers and other types of low level circuits. Precision manufactured. The parts listed are a small representation of a large and growing family. Call the closest sales office for parts not shown.

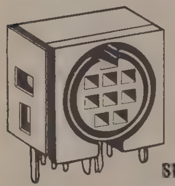
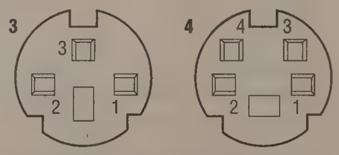
Right Angle, PC Mount Receptacles

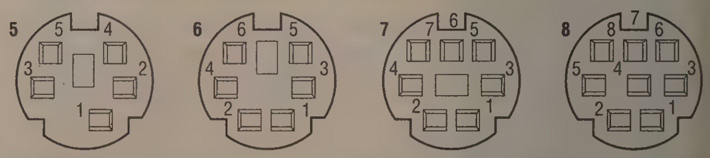


SMD8FRAX21

Mini-DIN Receptacles



Contact Arrangements (Viewed from Contact Side)



Miniature DIN connectors are designed for personal computer and enhancements, as well as data communications, medical and instrumentation equipment and systems. Available with 3 thru 8 contacts, receptacles also have a separate ground contact system. Ground terminal is "snap in" type. "Snap-in" terminal is bifurcated to assure tight hold down on PC board...before, during and after soldering. Also solder wicking around the terminal adds a greater measure of physical strength to the connection. Additionally, PC terminals are staggered to assure more "hold down" capability during soldering. Receptacle/plug retention is "friction" type, with a separate outer shield.

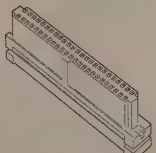
System 311 Female Socket with .050 Contact Spacing for .025 Pitch Flat Cable

LR49571 E60980



Physical Properties. Insulation Material: Glass reinforced thermoplastic rated UL 94V-0, black. **Contacts:** Beryllium copper, 30 microinches gold over nickel plating in the mating area, tin/lead plating in the termination area. **Environmental Properties. Temperature Rating:** –55°C to 125°C. **Cable Requirements. PVC Insulation:** 30 AWG solid .025 pitch; 30 AWG stranded .025 pitch. **Teflon:** 30 AWG solid .025 pitch; 32 AWG stranded .025 pitch.

Vertical Ejector Headers

Unlike conventional designs where the ejector latches swing left and right, the "vertical" ejector latches swing front and back, permitting headers to be soldered end-to-end with no wasted board space. **Insulation Material:** Glass filled thermoplastic, rated 94V-0, blue. **Contact Material:** Phosphor bronze; 30 µ inches minimum gold over 50 µ inches nickel in contact zone; tin-lead over nickel in termination area. **Current Rating:** 1 amp. **Insulation Resistance:** >1 × 10⁹ ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** –55°C to 125°C.

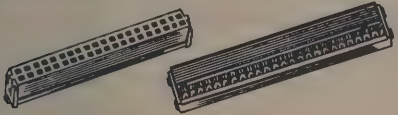
Female Sockets and Flat Cable

Female Socket Connectors
622 Series



The Thomas & Betts 622 Female Socket Connector is designed to mate with a wide variety of Male Headers in PC board applications which require repeated connection and disconnection. **Insulation Material:** Glass filled thermoplastic, rated 94 V-0, blue. **Contact Material:** Beryllium copper; 30 µ inches minimum gold over 50 µ inches nickel in contact zone; tin-lead over nickel in termination area. **Current Rating:** 1 amp. **Insulation Resistance:** >1 × 109 ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** –55°C to 125°C.

Flat Cable

Ansley® flat cable is designed to mass terminate all types of Ansley® connectors without wire stripping or soldering. The flexible, symmetrical cable is extruded, not laminated, in order to maintain exacting .050" (1.27 mm) pitch tolerance from conductor to conductor. Connectors can be terminated to flat cable in up or down configurations or 180° from each other.

Series 171 — Standard Flat Cable

Dark red stripe on number 1 conductor for positive polarization. 28 AWG stranded conductors .050" (1.27 mm) conductor spring. 105°C/PVC insulated, 300 VRMS. UL style 2651. Primarily designed for intra-cabinet wiring applications.

Thomas&Betts — NEW — 636 Series Mass Termination IDC System

The 636 Series Connectors provide customers the design flexibility they need to meet their market requirements. For markets such as: 1 — Personal Computing (desktop and laptop); 2 — Computer Peripherals; and 3 — Contract Manufacturers, etc., the New 636 Series Connectors with copper alloy and 30 or 15 microinch gold contacts give the equipment/systems designer an added Thomas & Betts design option. For other markets that traditionally require high performance/reliability such as: 1 — Test and Instrumentation; 2 — Medical; and 3 — Telecommunications, Thomas & Betts' 622 Series Connectors with beryllium copper and 30 microinch gold contacts are the preferred choice.

Female Socket Connectors with 15 μ Inches of Gold .100" × .100" Centers

LR92984 E60980

Physical Properties. Insulation Material: Glass filled thermoplastic rated UL 94V-0. **Color:** Black. **Contacts:** Phosphor bronze 15 μ inches minimum gold over 50 μ inches nickel in contact zone; tin/lead over nickel in termination area. **Electrical Properties. Current Rating:** 1 amp. **Insulation Resistance:** >1 × 10⁹ ohms @ 500 VDC. **Dielectric Strength:** >1000 Vrms at sea level. **Environmental Properties. Temperature Rating:** –55°C to 125°C.

Low Profile Metal Shell D-Sub Connectors

Physical Properties. Insulation Material: Glass reinforced thermoplastic rated UL 94V-0. **Color:** Black. **Contacts:** Copper alloy; selective gold over 50 microinches min. nickel underplate overall. **Shell:** Tin plated steel. **Electrical Properties. Current Rating:** 1 amp. **Insulation Resistance:** >1000 megohms @ 500 VDC. **DWV:** >500 Vrms at sea level. **Environmental Properties. Temperature Rating:** –55°C to 125°C.

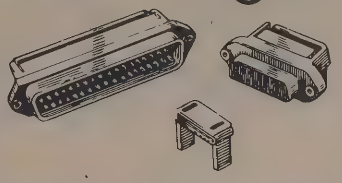
"D" Connectors, Plastic for Flat Cables

► **For Tooling See Page 301**



Plastic "D" Connectors are used in panel-mounted I/O applications, providing mass termination, convenience and IDC integrity while maintaining compatibility with all industry-standard "D" connectors. **Insulation Material:** Glass filled thermoplastic, rated 94V-0, blue. **Contact Material:** Beryllium copper — 30 µ inches minimum gold over 50 µ inches nickel in contact zone; tin-lead over nickel in termination area. **Metal Shell:** Steel with tin plating. **Current Rating:** 1 amp. **Insulation Resistance:** >1 × 10⁹ ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** – 55°C to 125°C.

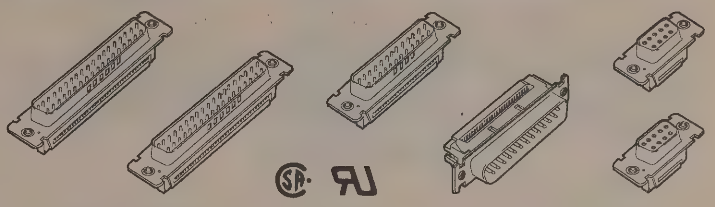
Ansley® Metal Shell Low Profile "D" Connectors



► **For Tooling See Page 301**

Low Profile Metal Shell "D" Connectors are designed for reliable EMI/RFI protected "D" connector interfaces in modern, high-density applications. The low-profile "D" can be integrated into even the most dense applications.

Insulation Material: Glass filled thermoplastic, rated 94V-0, blue. **Contact Material:** Beryllium copper — 30 µ inches minimum gold over 50 µ inches nickel in contact zone; tin-lead over nickel in termination area. **Metal Shell:** Steel with tin plating. **Current Rating:** 1 amp. **Insulation Resistance:** >1 × 10⁹ ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** – 55°C to 125°C.

"D" Connector Hardware

Screwlock Assembly. To retain two "D" connectors (plastic only) to each other through a panel or PC board. Stainless steel.
515-4000. Type 609-001 .... **PER SET 4.10**

Backshell Screwlock Assembly. Used with backshell strain relief to retain two "D" connectors to each other through a panel or PC board. Stainless steel.
515-4020. Type 609-005 .... **PER SET 6.82**

Jackscrew Assembly. Used with 609-003 to retain two "D" connectors (plastic only) to each other as a mated pair cable splice. Stainless steel.
515-4005. Type 609-002 .... **PER SET 3.47**

Backshell Jackscrew Assembly. Used with backshell strain relief and 609-003 to retain two "D" connectors to each other as a mated pair cable splice. Stainless steel.
515-4015. Type 609-004 .... **PER SET 3.78**

Slide Lock Post. Used with slide lock retainer assembly 609-50-SL. Discard flat washer for 3/32" panel; retain for 1/16" panel. Discard lock washer when No. 609-008-50 is used with No. 609-50S-M(1) or 609-50P-M(2).
515-4040. Type 609-008-50 .... **PER SET 1.43**

Jacksocket. Used to lock a 50-position "D" connector to a metal shell "D" connector with jackscrew. Mounting holes in panel are 3.99 mm +.05 mm (.157" + .002") diameter.
515-4045. Type 609-009-50 .... **PER SET 1.43**

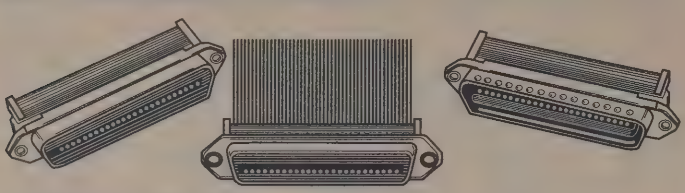
Jacksocket Assembly. Used with 609-002 for front panel mounting or 609-004. Stainless steel.
515-4010. Type 609-003 .... **PER SET 3.08**

Rear Panel Mount Jacksocket Assembly. 609-006 for .090" panels, 609-007 for .125" panels.
515-4025. Type 609-006-1 .... **PER SET 3.09**
515-4030. Type 609-007-1 .... **PER SET 3.08**

Slide Lock Retainer. Used to lock a mated pair of 50-position "D" connectors. Must be used with slide lock post 609-008-50. Discard lock washers when 609-50SL is used with 609-50S-M(1) or 609-50P-M(2).
515-4035. Type 609-50SL .... **PER SET 2.66**

Bale Lock Assembly. To lock a mated pair of 50-position "D" connectors with a backshell. **Bracket Material:** Stainless steel, spring temper. **Screw:** Zinc-plated.
515-4050. Type 609-50BL .... **PER SET 1.68**

Metal Shell Ribbon Connectors



- **For Tooling and Flat Cable, See Page 301**

Metal Shell Ribbon Connectors are designed primarily for I/O applications where EMI/RFI suppression is required. **Insulation Material:** Glass filled thermoplastic, rated 94V-0, blue. **Contact Material:** Beryllium copper: 30 µ inches minimum gold over 50 µ inches nickel in contact zone; tin-lead over nickel in termination area. **Current Rating:** 1 Amp. **Insulation Resistance:** ›1 x 10^9 Ohms @ 500 VDC. **Dielectric Strength:** ›1000 VRMS @ sea level. **Temperature Rating:** -55°C to 125°C.

Card Edge Connectors

Ansley® Card Edge Connectors are designed to provide a high-performance flat cable interface to double-sided printed circuit boards. A variety of mounting options provide for application versatility. **Specifications. Insulation Material:** Glass reinforced thermo-plastic, rated 94 V-O. **Contact Material:** Beryllium copper. **Contact Plating:** Gold over nickel. **Current Rating:** 1 amp. **Insulation Resistance:** >1 × 10^9 ohms @ 500 VDC. **DWV:** >500 V rms (sea level). **Temperature Rating:** –55° to +125°C. **Color:** Blue.

Male Connectors

Ansley® Male Connectors are designed to mate with female socket transition connectors. Used primarily for in-line cable splice and "T" tap applications, they are available with optional mounting ears for I/O applications, as well as optional retainer/ejector latches for ease of disconnect. **Specifications. Insulation Material:** Glass reinforced thermo-plastic; rated 94 V-O. **Contact Material:** Beryllium copper. **Contact Plating:** Gold over nickel. **Current Rating:** 1 A. **Insulation Resistance:** >1 × 10^9 ohms @ 500 VDC. **DWV:** >500 V rms (sea level). **Temperature Rating:** –55° to +125°C. **Color:** Blue. **Note:** Part numbers shown indicate connector without ejector/retainer latches. The following options are available as special order items — add suffix "E" for latches to accommodate female socket connectors without strain relief; add suffix "ES" for latches to accommodate female socket connectors with strain relief.

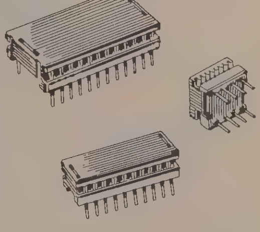
Low Profile DIP Plugs with Heavy Duty Pins



Ansley® Low Profile DIP Plug Connectors are primarily used as a disconnectable interface to DIP sockets. DIP plugs with heavy duty contacts are used in disconnect applications with DIP sockets. DIP plugs with tin plated contacts provide a permanent flat cable transition to printed circuit boards. **Insulation Material:** Glass filled thermoplastic, rated 94 V-O, blue. **Contact Material:** Beryllium copper — 30 μ inches minimum gold over 50 μ inches nickel in contact zone; tin-lead over nickel in termination area. **Current Rating:** 1 amp. **Insulation Resistance:** >1 × 10^9 ohms @ 500 VDC. **Dielectric Strength:** >1000 VRMS @ sea level. **Temperature Rating:** –55° to +125°C.

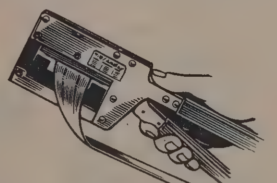
Model 779-2100 Hand Crimp Tool Frame and Dies



Features and Benefits

- **Allows Mass Termination of Up to 64-Conductor Flat Cable with Ansley® IDC Connector, for Wide Application Flexibility**
- **Hand Tool Terminates in Seconds without Wire Stripping or Soldering, for Low Installed Cost**
- **Shure Stake™ Mechanism Eliminates Operator Guesswork, Assures a Reliable Crimp Cycle Every Time**

Type 779-2100. Tool frame accommodates snap-in interchangeable dies to install the entire range of Ansley® IDC connectors.

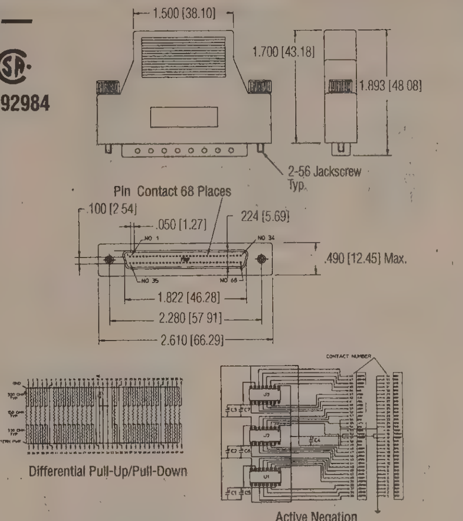
Single-Ended Pull-Up/Pull-Down

Differential Pull-Up/Pull-Down

Active Negation

50 Position with Latches



Differential Pull-Up/Pull-Down

Active Negation

68 Position with Thumb Screws

Fine Pitch "D" — Shielded Terminators (FP Series)

- ▶ Application: SCSI 2 and SCSI 3 Systems Having Two I/O Ports; Shield Allows Use in Equipment with Separate Enclosures
- ▶ Current Rating: 1 Amp
- ▶ Configuration: External, End of Line, Unshielded
- ▶ Maximum Operating Voltage: 50 Volts
- ▶ Insulation Material: Thermoplastic Rated UL94V-0
- ▶ Contacts: High Strength Copper Alloy; 30 µ Inches Minimum Gold over 50 µ Inches Nickel in Contact Zone; Tin Lead over Nickel in Termination Area
- ▶ Temperature Rating: 0°C to 70°C

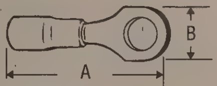
These same terminals are available in larger, bulk packaging at substantial savings. Add 1 to the Allied Stock No. to get the same part in bulk.

Vinyl Insulated Ring — Insulation Support



STA-KON terminals and tools exceed test specifications requirements of military, UL and CSA. These ring terminals are insulated with a PVC insulation sleeve of extra length to give protection and relieve bending stress at wire's flex point. Brazed seam barrel is serrated to obtain high pull-out value. Terminal is made of high conductivity electrolytic copper, electro-tin plated. Insulation material is color coded.

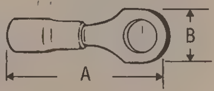
Nylon Insulated Ring — Insulation Grip



Self-insulated with high dielectric-strength nylon sleeves, these ring terminals are recommended for temperatures up to 105°C. An inner bronze insulation grip sleeve lengthens the flexing radius of the conductor and eliminates conductor creep. The nylon jacket is color-coded.

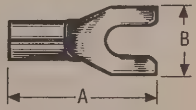
Non-Insulated Fork



These non-insulated fork terminals are made of electrolytic copper for high conductivity and have a brazed seam barrel which provides maximum tensile strength. Serrated barrel increases grip on wire.

XTRAFLEX™ System — Conduit

Smooth Liquidtight Nonmetallic Conduit Type B

- Industrial Grade UL/CSA Listed
- Black Color Standard
- Lightweight
- Liquidtight
- Fast Installation — Even In Tight, Cramped Spaces
- Smooth Inner Diameter Allows Easy Wire Pulling
- Smooth Outer Jacket — Uses Material Approved for Outdoor Use, Is Sunlight Resistant and Oil Resistant
- Temperature Range: –18°C to +105°C (–2°F to +221°F)
- Market at One-Foot Intervals for Fast, Easy Measuring and Cutting

Recommended Industrial Applications

- Machine Tools
- Motor Hookups
- Food Processing Equipment
- Extensions from Wireways
- Sensor and Microswitch Wiring Found in Control Consoles
- UL Listed, UL File No. E95745
- CSA Certified, CSA File No. LL80349

Corrugated Flexible Nonmetallic Tubing

- OEM Grade UL Recognized
- Maximum Flexibility in Tight Applications
- Extremely Fast Installation
- Liquidtight with Specified Fittings
- Good Tensile Strength Provides Excellent Pullout Protection
- Smooth Inner Diameter Allows Easy Wire Pulling
- Broad Operating Temperature Range: –18°C to +60°C (–2°F to +140°F)

Recommended Industrial Applications

- Protection of Fiber Optic Cable
- Installation of Instrumentation and Control Cable
- Indoor/Outdoor Lighting
- Packaging Equipment
- Marine and Shipboard Wiring
- Flexing: Component Wiring Protection on Robots, Graphic Arts Equipment, etc.
- UL File No. 96548
- CSA File No. 067241

Plastic Bullet® Liquidtight Fittings for T&B LTC Nonmetallic Liquidtight Conduit Type B and T&B EFC Flexible Tubing

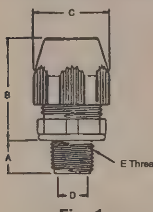

Fig. 1

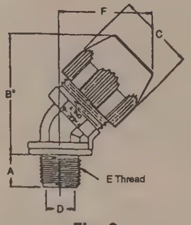

Fig. 2

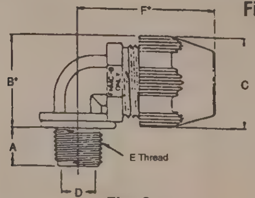

Fig. 3

- U.L. Listed (File # E23018)
- CSA Certified (File # LR52391)
- CSA 22.2 #227.2 and CSA 22.2 #227.3
- ANSI/UL514B-1988
- Federal Standard H28 (NPT Threads)

- Watertight Requirements of NEMA Type 4 and NEMA Type 6 Enclosures
- Suitable for Hazardous Locations: Class 1 Div. 2; Class II Div. 1 and 2: Groups E, F and G; Class III Per NEC; Article 501-4, 502-4 and 503-3

Connector assembles to conduit without disassembly and is designed to be installed with a positive installation criteria (gland bottoms on body shoulder). Performance of connector unaffected by exposure to detergents, cleaners, and sanitizers commonly encountered in food processing plants and typical industrial environment; also unaffected by cutting fluids, wiring pulling compounds and Marine environment. The connector meets industry standards for cold impact and simulated hammer blow.

Standard Material/Finish. Body Gland: Weather stabilized thermoplastic (black). **"O" Ring:** Nitrile (blue). **Locknut:** Steel/electro zinc plated. **Material Temperature Rating:** Thermoplastic — –40°C to 105°C. **Material Flammability Rating:** UL94-V2.

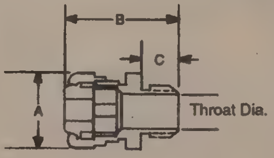
Power Cord Connectors

Liquidtight Strain Relief Connectors



A liquidtight connector to connect flexible cord or power cable to a box or enclosure and provide adequate strain relief. **Standard Material. Gland, Body:** Steel, malleable iron, zinc die cast. **Retaining Ring:** Thermoplastic, stainless steel. **Bushing:** Neoprene. **"O" Ring:** Buna N. **Standard Finish:** Electro zinc plated and chromate coated. **UL Listed File No.:** E-13938. **CSA Certified:** LR-589, LR-4484. Conforms to UL 514, CSA 22.2 No. 18, ANSI C33.84, NFPA 70-1978 (ANSI).

Color-Keyed® Short Barrel Two-Way Connectors for 600 V Applications

Two-way connectors provide high pullout values, are easy to insulate, and provide a low resistance connection of high quality and low installed cost. **Material:** High conductivity wrought copper finish, electro tin plate.

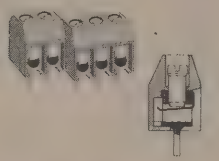
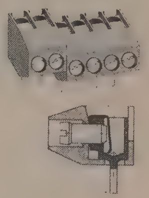
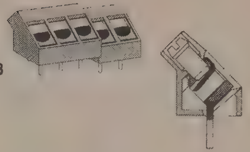
Screw Connectors For Printed Circuit Boards — Series 93 To 97



1



2



3

All products feature dovetail interlocking which allows for assembly to the required number of poles while maintaining center to center spacing. **Specifications. Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 32%. UL File E69841. CSA File LR24322.

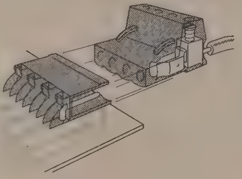
Plug-In Screw Connector System For Printed Circuit Boards — Series 120 and 121



Conecta® Series plug and header connectors provide reliable contact for applications which require frequent disconnections. Headers are shrouded to ensure proper mating. **Specifications. Center To Center Spacing:** Series 120 — 5 mm/.197"; Series 121 — 5.08 mm/.200". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 33%. **Screw:** M3. UL File E69841 — 10 A, 300 V, 12-26 AWG. CSA File LR24322 — 10 A, 300 V, 12-26 AWG. Functionally equivalent to Phoenix Contact Series MSTB, Weidmüller Series BL/SL and Wieland Series 8113. Larger pole configurations are available on request.

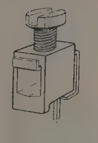
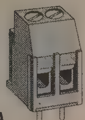
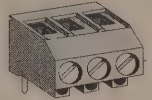
Screw Connectors For Printed Circuit Boards With Elevator Style Clamping Mechanism — Series 150

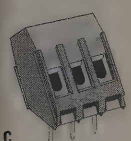




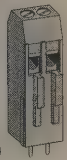
A



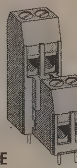
B



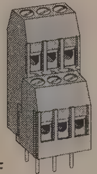
C



D



E



F

Series 150 Multilift connectors feature elevator style clamping, captive screws, test holes and dovetail interlocking which allows for assembly to the required number of poles while maintaining center to center spacing. **Specifications. Center To Center Spacing:** 5 mm/.197". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — –40°C/–40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 33%. **Screw:** M3. UL File E69841 — 20 A, 300 V, 10-26 AWG. CSA File LR24322 — 20 A, 300 V, 10-26 AWG.

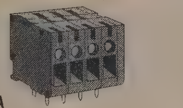
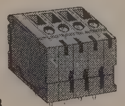
Parallel Screw and Wire Entry Terminal Blocks For Printed Circuit Boards — Series 180



A



B

Series 180 features dual PCB pins which provide a more stable platform and higher torque absorption during the screw tightening process. **Specifications. Center To Center Spacing:** 5 mm/.197". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — –40°C/–40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 33%. **Screw:** M2.5. UL File E69841 — 15 A, 300 V, 12-26 AWG. CSA File LR24322 — 20 A, 300 V, 12-26 AWG.

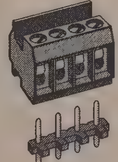
Plug-In Screw Connector Systems For Printed Circuit Boards — Series 93-FL and 95-TFL

These two-part plug and pinstrip combinations provide a small footprint, low profile design. Versions are available with 3.5 mm (.138") or 5 mm (.197") center to center spacing. Series 95-TFL can be interlocked to form larger pole configurations.

Series 93-FL



Specifications. Center To Center Spacing: 3.5 mm/.138". **Insulating Material:** Polyamide, self extinguishing to UL 94, V-0, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — –40°C/–40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 32%. **Screw:** M2. UL File E69841 — 6 A, 300 V, 18-30 AWG. CSA File LR24322 — 6 A, 300 V, 20-28 AWG.

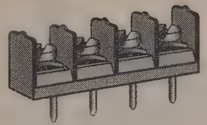
Barrier Style Screw Connectors For Printed Circuit Boards — Series 98



The use of flexible polyamide in this series of blocks provides greater resistance to breakage than barrier strips made from more rigid and brittle materials. The screw and washer combinations are fixed together to allow easier wire insertion.

Specifications. Insulating Material: Polyamide, self extinguishing to UL 94, V-2, color grey. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — –40°C/–40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 25%. **Screw:** 980 — M3; 982 — M3.5; 983 — M4 . **UL File E69841:** 980 — 7 A, 250 V, 22-18 AWG; 982 and 983 — 20 A, 300 V, 20-12 AWG. **CSA File LR24322:** 980 — 20 A, 300 V, 22-18 AWG; 982 and 983 — 20 A, 300 V, 22-12 AWG.

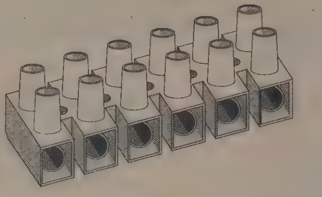
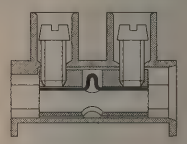
Screw Terminal Strips For Panel/Chassis Mounting — Series 300





Series 300 terminal strips are used for connecting stripped, unterminated, solid or stranded copper wires, ranging from 6 to 26 AWG depending on the product selected. Each strip has 12 circuits and can be easily cut to the required number of poles. Mounting holes are provided between each circuit. Captive screws are backed out and ready for wiring.

Each circuit has a wire protector to prevent damage to the wire from the turning screw. All metal parts are completely recessed in the flexible polyamide moulding. This dead front design ensures safety and prevents short circuiting. **Specifications. Insulating Material:** Polyamide, self extinguishing to UL 94, V-0 or V-2, natural. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — –40°C/–40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 25% (33% for types 326 and 327). UL File E69841. CSA File LR24322.

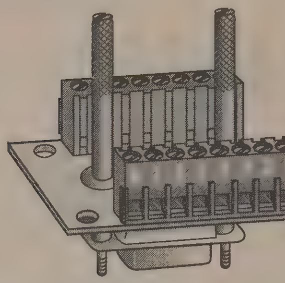
Low Profile D-Subminiature Interface Modules — Series MTDA

— NEW —



Type MTDA interface modules were designed for use in motor control machinery, electronic assembly equipment, material handling, specialty machinery and multi-axis systems, etc. Its particular advantage is that it provides a low profile interface between discrete wiring and a D-Subminiature connector.

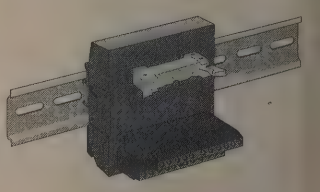
Ribbon Cable Interface Modules — Series MTB



MTB interface modules are designed to facilitate the connection of flat ribbon cables to discrete wires. Standard modules are equipped with 10 to 64 pole IDC connectors with ejectors according to DIN 41651. They are designed to mate with DIN 41651 female plugs equipped with strain relief clamps. When plugged, the ejectors lock the plug in place. **Nominal Rated Voltage:** 60 VAC. **Nominal Rated Current:** 1 A.

DIN Rail Terminal Blocks and Wire Duct

WECO®

DIN EN 50022 Rail Mounted Terminal Blocks — Series EURO

DIN rail mounted terminal blocks provide a flexible connection system with a wide capacity range, an efficient use of space, and a built-in capacity to monitor and maintain electrical systems.

The EURO Series also offers logical organization and a flexible and clear marking system that allows efficient and safe monitoring and maintenance of the system. **Specifications. Insulating Material:** Polyamide, self extinguishing to UL 94, V-2, color grey or yellow/green. **Temperature Limits:** Short time — 140°C/284°F; Continuous — 80°C/176°F; Low limit — -40°C/-40°F. **Comparative Tracking Index:** CTI >600. **Oxygen Index Rating:** 28%. Wiring Duct — Series LKV

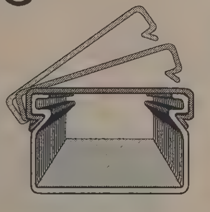
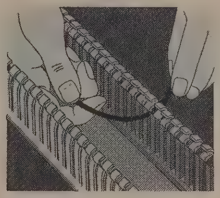
Series LKV wiring duct provides an organized routing of electrical wiring for control panel applications. The design also protects and enables easy location of the wires. Slots on either side of the duct allow wiring to exit in order to connect equipment or components. All ducts are suitable for horizontal or vertical mounting.





Ducts and covers are shipped assembled in 2 meter lengths (6.5') which can easily be cut as required. Series LKV ducts may also be mounted to DIN EN 50022 mounting rails with the use of type LK-RA DIN rail adapter. **Specifications. Insulating Material:** Rigid PVC, grey — RAL 7030. **Temperature Limits:** Short time — 80°C/176°F; Continuous — 60°C/140°F; Low limit — -20°C/-4°F. **Comparative Tracking Index:** CTI >400. CSA File LR25478-2.

Die Cast D-Subminiature Backshell for Round Cable

Rugged new backshell for round cable D-Subminiature applications. Meets FCC docket 20780. Shields out EMI/ESD. Available in sizes to fit 9, 15, 25, 37, and 50 contact configurations. Includes compression inserts to accommodate a wide range of braided or foil shielded cables. Easy to assemble. **Materials:** Cover — Die-cast zinc with clear zinc plate finish; Hardware — Steel with clear zinc finish; Inserts — PVC. **Fig. A**

Series 26 Blue Ribbon Connectors

- ► Self-Cleaning Contacts
- ► For Heavy-Duty Applications
- ► Matching Positive Polarization

Rugged, heavy duty interconnections for when larger gauge wires must be used and size is not a limiting factor. High-impact diallyl phthalate dielectric with molded-in mounting plates of corrosion-resistant passivated stainless steel. Float mount bushings provide .028" radial movement. Contacts .000030" gold over copper base. Self cleaning wiping action. Solder eyelet tails. **Maximum Wire Size:** 16 gauge. Rated 5 amps per contact, 750 VDC at sea level, 300 VDC at 60,000 feet. Estimated service life of 25 years in mated condition. UL recognized.

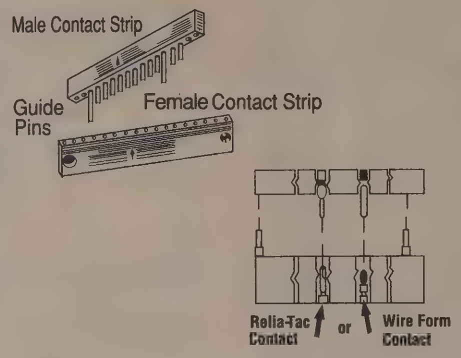
221-Series STRIP Connectors



Use full length as is, or cut to specific length. Two or more strips can be stacked or epoxied together for multirow connector. When stacked, contact centers are .100" for both connectors. Use guide pins at least every 3" for mating alignment and keying. Guide pins replace both pin and socket contact. Supplied less contacts and guide pins; listed below. Spacing .100" except *.075". Av. wt. 1 oz. Use "Relia-Tac" contacts.

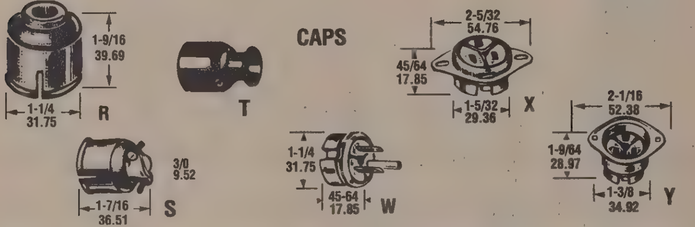
Plug and Socket Connectors



Make inexpensive cable connectors of standard sockets, plugs, and receptacles. Type 86-3-13 is steel end outlet 7/16" I.D., has a wire insulator and a black epoxy finish. 86-3-24 is steel, has a cable clamp, 3/8", wire insulator and a black epoxy finish. Type 86-3-858 is black thermoplastic and has a 5/16" end outlet with strain relief. Use with the connectors in this section that don't have mounting plates.

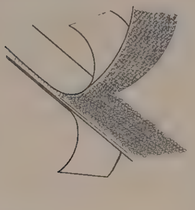
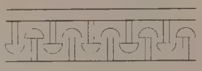
Dual Lock™ Brand Reclosable Fastening Systems





SJ-3541

- ► Backing Attachment: Pressure Sensitive Rubber Adhesive
- ► Operating Temperature: –20°F to 120°F Continuous, –20°F to 158°F Intermittent with No Static Charge
- ► General Purpose — Bonds to Most Surfaces
- ► Mating Stem Type: 400
- ► Self Mating

SJ-3560

- ► Backing Attachment: Clear, Pressure Sensitive Very High Bond Scotch™ VHB™ Acrylic Adhesive
- ► Operating Temperature: –20°F to 200°F
- ► UV Resistant/Plasticizer Resistant
- ► Self Mating

When Dual Lock™ brand reclosable fasteners are pressed together, hundreds of mushroom-shaped stems interlock with one another. An audible snap announces that the fastener is locked. Compared to hook and loop fasteners, you get improved tensile strength with five times more holding power. Open and close hundreds of times during the life of your product.

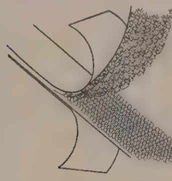
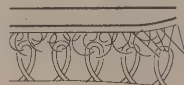
*Very high bond adhesive.

Scotchmate™ Brand Hook and Loop Fastening Systems





When the two sides of a Scotchmate™ hook and loop fastener are pressed together, hundreds of tiny, stiff hooks mesh with a surface of pliable loops. You simply press together to fasten and pull apart to open. And do it thousands of times during the life of your product. For use in environments where temperatures climb to levels difficult for some adhesives. **Operating Temperature:** MP-3401/02 — up to 250°F cont.; MP-3526/27 — –20°F to 120°F cont.

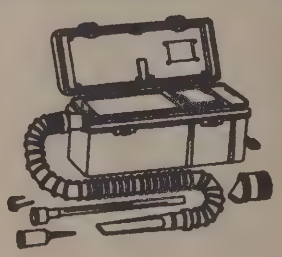
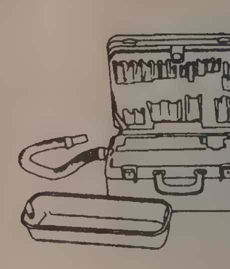
Electronics Vacuum Cleaners and Filters





- ► 3 Year Warranty

Features

- ► **Stretch Hose — The Stretch Hose Extends from 32" to Seven Feet Long; Long Enough to Reach into Large Machines Without Lifting the Vacuum, Yet Compact for Easy Storage**
- ► **Disposable Filters — A Choice of Two Conveniently Disposable Filters to Fit Your Specific Applications**
- ► **Roomy Storage Compartment for Attachments — Attachments and Power Cord Are Easily Stored Inside the Cover and Held Securely in Place with an Internal Door**
- ► **Replaceable 1 HP Motor — A Replaceable One-Horsepower Motor Gives You All the Cleaning Power You Need and Is Easy to Service**
- ► **Strong Resilient Case — High Impact Plastic Case Is Tough All Over for Years of Hard Work**
- ► **Two Durable Latches — Two Sturdy Latches Keep the Lid on Tight and the Attachments Inside During Transit**
- ► **Current-Limiting Attachments — Technician Safety Is Increased Because 3M's Current-Limiting Attachments, Which Include a Crevice Tool, a Wand to Reach Hard-To-Get-At-Places and a Brush to Loosen Toner and Dust Particles**
- ► **Detachable Power Cord — Power Cord Is Detachable for Effortless Storage**

The 3M service vacuum cleaner, the professionals' choice, is a powerful unit developed for high efficiency cleanup of most business equipment. Designed to be easier to use than ever, this portable vacuum makes even difficult jobs a breeze. And with a high-quality filtration system and advanced safety features, it's the only service vacuum designed specifically with the professionals' needs in mind. Convenience, quality and safety make the 3M service vacuum cleaner far and away the professionals' choice for cleaning office equipment. Transporting the 3M service vacuum cleaner is easier, too. A replaceable handle, two replaceable latches and new hinges mean it travels well. The case is made of high impact plastic, so it's tough on the job or on the road. The new 3M service vacuum cleaner features a hose assembly, wand and crevice tool made with a new plastic that slows down the flow of electricity and drains away static, dramatically reducing potential for shock. These important current-limiting features help to protect customer engineers from the potential danger of contact with electrical power and the annoyance o electrostatic discharge (ESD). They also reduce the risk of shock damage to sensitive electronic components.

Specifications. Electrical: 115 VAC, 50/60 Hz, 5.0 amps. **Dimensions:** Length — 17.80" (45.2 cm); Width — 7.75" (19.7 cm); Height — 9.25" (23.5 cm); Weight — 9 lbs., 14 oz. **Certification:** UL listed, CSA listed. **Motor:** Continuous duty rated with one sealed ball bearing and one sleeve bearing lubricated for life. Thermally protected with automatic reset. Conducted RFI filtered (reduces EMI to be below FCC requirements). Comes complete with hose, 32" - 10 ft., wand, crevice tool, crevice tool brush, dusting brush, needle nozzle, 3 year warranty. **Tool Case Vacuum:** The tool case vacuum comes with pallet for tools. **Comes With:** 25"-10 stretch hose, wand, crevice tool, creative tool brush, dusting brush and needle nozzle. Three year warranty.

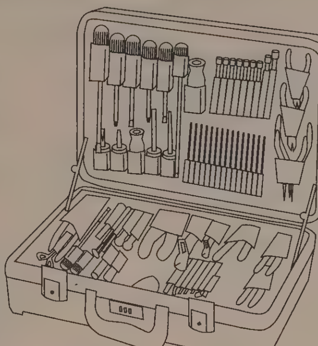
2797 Field Service Kit with Standard Polypropylene Case



- **Popular Tool Kit Services a Wide Range of Electronic Equipment**
- **Features an Extensive Selection of Installation, Service and Repair Tools**
- **Two Removable Pallet Surfaces Organize Tools**
- **Black Polypropylene Tool Case**

Designed to service a wide range of electronic equipment, this kit is a favorite of field service engineers. Use it for such diverse industries as computer field service, office products repair, automated process maintenance and medical equipment repair. An extensive selection of tools for installing, servicing and repairing sophisticated electronic equipment is organized on two removable pallet surfaces. All the tools listed below are supplied in a standard-depth black polypropylene two-pallet tool case. **Inside Case Dimensions:** 17.75" × 12.75" × 6.5". **Kit Weight:** 20 lbs.

Kit Includes:
Solder aid, brush and fork
Inspection mirror
Metal rule — 6"
Utility plier — 10"
Chain nose plier — 4"
Diagonal cutter — 4"
Center punch — ⅛"
2 pin punches — 1⁄16", ⅛"
Thickness gauge — 15 leaf
Offset combo screwdriver
Reverse action tweezer
Burnishing tools (3 per pkg.)
Screwholding screwdriver
Solder (pocket pack)
Machinist's scriber
Internal ring plier
External ring plier
Electrician's scissors
2 adjustable wrenches — 4", 8"
Diagonal cutter — 5" (41-5)
Long nose with cutter — 6"
Precision knife #1
Regular handle
Junior handle
Electrician's knife
9 nutdriver blades — 3⁄16", 7⁄32", ¼", 9⁄32", 5⁄16", 11⁄32", ⅜", 7⁄16", ½"
Allen hex blade — .050"
8 Allen hex blades — 1⁄16", 5⁄64", 3⁄32", ⅛", 5⁄32", 3⁄16", 7⁄64", 9⁄64"
6 spline blades — .048", .060", .069", .072", .076", .096"
7 slot screwdrivers — ¼ × 4, ⅛ × 2, ⅛ × 8, 3⁄16 × 3, 3⁄32 × 2, 5⁄16 × 6, ¼ × 1
Phillips stubby screwdriver
3 Phillips screwdrivers — #0, #1, #2
Super champ crimp tool
Alignment tool — nonmetallic
Alignment tool — duplex
T7 stripper (45-1831)
Injection-molded tool case, 6" black

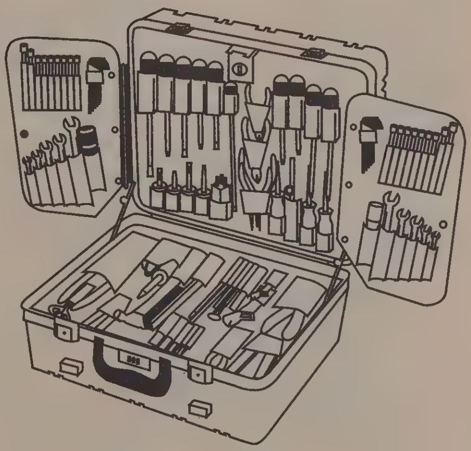
2798 Comprehensive Inch/Metric Service Kit

- **The Most Versatile Tool Set of Its Kind Anywhere**
- **Features a Diverse Assortment of Fasteners for Servicing a Wide Variety of Equipment**
- **Includes the Industry's Most Common Fastening Tools**
- **Dual Winged Tool Pallet Design for Extra Storage**
- **Black Heavy-Duty Polyethylene Tool Case**

This versatile tool kit is designed for the technician who services a wide variety of third-party or systems-type equipment. You get a diverse assortment of the industry's most common fastening tools in one comprehensive kit. It includes inch and metric nutdrivers, ball-end hex drivers and combination wrenches plus a complete set of Torx™ drivers, receptacle analyzer, soldering/desoldering tools and a complete selection of standard screwdrivers, pliers and cutters, adjustable wrench and much more.

The innovative winged pallet design makes this kit special by putting an incredible number of tools at your fingertips. Over 100 individual tools are mounted on the two main pallets. Inch-type and metric tools are conveniently arranged on two separate winged pallets attached to open out from the top pallet. A special heavy-duty black polyethylene material with extra-deep exterior ridges (ribs) makes this tool case almost indestructible. A full 4 inches of diced foam in the bottom cushions any delicate equipment transported to or from the job site. This foam can be removed easily if not required. **Inside Case Dimensions:** 17.25" × 13.75" × 9". **Kit Weight:** 28 lbs.



Kit Includes:
Inspection mirror
Utility plier — 10"
Chain nose plier — 4"
Diagonal cutter — 4"
Center punch — ⅛"
2 pin punches — 1⁄16", ⅛"

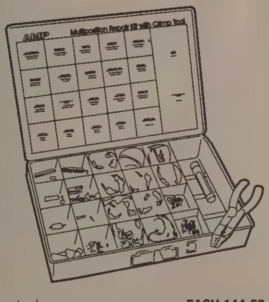
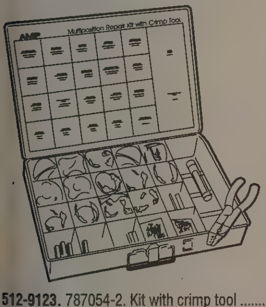
D-Subminiature Kits

AMPLIMITE® HDP-20 Subminiature D RS-232 Repair Kit



Designed for quick, reliable repairs on site. The kit is packaged in a sturdy metal carrying case for ease of job-to-job portability. **Each Kit Contains:** 100 socket contacts; 100 pin contacts; 6 (25 pos.) receptacles; 18 (25 pos.) plugs; 14 (25 pos.) cable clamps; 1 insertion/extraction tool; and 1 crimp tool.

512-9122. 787053-2. Kit with crimp tool ....**EACH 144.53**
512-9056. 787053-1. Kit without crimp tool ....**EACH 111.74**



AMPLIMITE® HDP-20 Subminiature D Multi-Position Repair Kit

Designed to cover on site repairs of the more popular Subminiature D connector applications. **Each Kit Contains:** 100 socket contacts; 100 pin contacts; 3 of each receptacle (9, 15, 25, and 37 pos.); 6 of each plug (9, 15, 25, and 37 pos.); 6 of each cable clamp (9, 15, 25, and 37 pos.); 1 insertion/extraction tool; and 1 crimp tool.

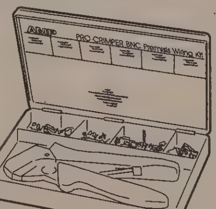
512-9123. 787054-2. Kit with crimp tool ....**EACH 193.29**
512-9057. 787054-1. Kit without crimp tool ....**EACH 160.50**

Modular Plug Hand Tool Kit

Kit consists of a hinged-top clear plastic case, with a cushioned compartment for the low-cost SUPER CHAMP® Service hand tool and six smaller compartments containing an assortment of popular size modular plugs (2, 4, 6, and 8 pos.).

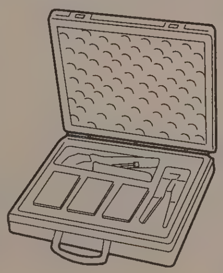
512-9058. 224685-1 ....**EACH 61.98**

BNC Premise Wiring Kit



Includes PRO-CRIMPER™ II hand tool, BNC plugs 5 RG-58, 10 RG-59/62, 5 RG-58 plenum and RG- 59/62 plenum sizes; adapters — 2 jack-to-jack and 2 "T".

512-8477. 58477-1 .....**EACH 114.00**



Local Area Network Kit

Includes 8 position Modular Plug Professional Hand Tool, PRO-CRIMPER™ II frame, fiber optic connector die sets, coaxial connector die sets, and carrying case.

512-9825. 58513-1..........**EACH 629.00**

BNC Coaxial Connector Kits

Each of the following kits contains 20 connectors and a SUPER CHAMP® crimp tool in a steel box with compartments.

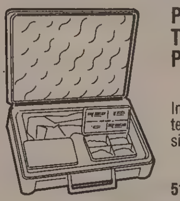
512-9821. 314971-1. BNC kit for RG-58 cable ....**EACH 107.83**
512-9822. 314972-1. BNC kit for RG-59/62 cable ....**EACH 107.83**
512-9823. 314973-1. UHF kit for RG-58, 59, 62 cable ....**EACH 107.83**

Terminal Kits with Hand Tool

PLASTI-GRIP® Terminal Kit

Steel case contains 20 different types of basic terminals and a SUPER CHAMP® crimp tool. Includes 500 terminals and splices most often used, wire sizes 22-10 AWG.

512-9201. 604200-1........**EACH 90.34**



PIDG® and PLASTI-GRIP® Terminal Kit with PRO-CRIMPER™ II Hand Tool

Includes hand tool, 225 insulated ring and spade terminals in 12-10, 16-14, and 22-16 AWG wire sizes.

512-9236. 55823-1............................**EACH 83.79**

Heat Shrink Tubing Kit

Kit contains 103 pieces of tubing in assorted colors, 3/32 to 1/2 dia. × 4" length. Packaged in a sturdy plastic hinged lip case.

512-9824. 607243-1 ....**EACH 46.28**

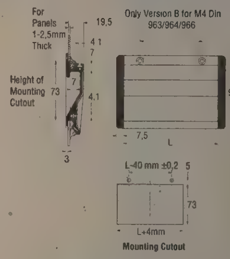
Tray Handle SG



Profile extruded aluminum tray handle available in three lengths featuring ease of installation. Anodized with a matte finish in natural or black. Does not require screws for metal thicknesses of 1-2.5 mm. Two rubber inserts guarantee tight and secure installation. Two cross-slotted grooves for M4 screws offset by 90° provides firm connection or may be used as mounting aids. **Version A:** Installation by means of an upper rubber insert that pushes in from the back. **Version B:** Installation by means of two countersunk screws from outside. *Dimensions are mm.

MS91528 Style, Black, Knobs

Explanation of Type Numbers

70-3-BL-2G

- (70) **Diameter:** 50 — 1/2"; 70 — 3/4"; 90 — 1"; 125 — 1¼".
- (-3) **Type:** 1 — Plain Round; 2 — Round/Ring Skirt, 3 — Round-Dial Skirt; 4 — Plain Pointer Bar; 5 — Pointer/Ring Skirt Bar; 6 — Crank.
- (BL) **Style:** WD — White Dot; BL — Backlighted Skirt.
- (-2) **Shaft Hole Size:** 1 — .127"; 2 — .252".
- (G) **Finish:** Mirror Finish, G — Matte Finish (both black).

All are molded from high-impact polycarbonate with corrosion-resistant aluminum inserts for maximum strength. Two setscrews: 4-40 UNC-3A on 50, 70 series and 1/8" shaft models; 8-32 UNC-3A on others. Meets or exceeds requirements of MIL-K-3926.

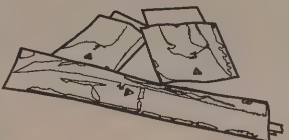
Transparent Static Shielding Bags



Static sensitive electronic components must be protected from electrostatic discharge while in storage, shipping and transport, as well as during assembly and handling operations. Static shielding bags ensure that static electricity will have a controlled, nondestructive path to ground, independent of environmental factors. By using static shielding bags, premature product failure, due to static related damage, can be eliminated. **Specifications. Thickness:** 3.1 mil (79 microns), ASTM D374. **Tensile Strength:** 9700 lbs./in.^{2} (67 N/mm^2), ASTM D882. **Seal Strength:** 5 lbs./in.^{2} (870 N/m^2), ASTM D882.

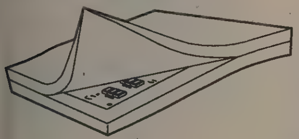
Conductive Foam



Conductive foam protects static-sensitive electronic devices in-plant and during shipment. Two types, cushioning and semi-rigid are both non-corrosive. **Cushioning (CFC):** Low density spongy material for delicate parts subjected to rough handling. **Semi-Rigid (CFSR):** High density design protects IC leads from static damage and deformation. **Specifications. Cushioning (CFC). Polyurethane Density:** 2-2.5 lbs./ft.^{3} (32-40 kg/m^3). **Semi-Rigid (CFSR). Polyurethane Density:** 2-2.5 lbs./ft.^{3} (40-48 kg/m^3). **Both Products. Surface Resistivity:** 10^3-10^4 ohms per unit square. **Volume Resistivity:** 10^3-10^4 ohms-cm. Test Standard-ASTM D257.

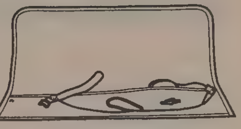
Portable Field Service Grounding Kit



Now you can remove and prevent static build-up during field service of electronic systems with this portable kit. **Components include:** One portable grounding work surface made of static dissipative vinyl 24" × 18" with reinforced edges and corners. This surface provides two integral pockets 11" × 6" as well as two male ground snaps and an interconnect snap (AIS-1). One (AWCC) wrist strap with coiled ground cord (max. extension 5 ft.) and one (AGC-18-15) straight ground cord.

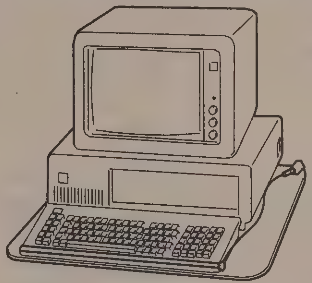
Electronic Equipment Terminal Mats



Protects You From:
- ▶ **Loss of Critical Data**
- ▶ **Garbled Printouts**
- ▶ **System Shut Down**
- ▶ **Personnel Discomfort**

Electrostatic discharge can cause costly breakdowns and malfunctions of your electronic systems. Terminal mats overcome static problems while providing the protection electronic systems require. The terminal mat is a flexible mat apparatus to serve as a safe, non-destructive ground path for static. **Specifications. Thickness:** 3/32". **Weight:** 1 lb./ft.^{2}. **Surface Resistivity:** 10^9 ohms per unit square. **Volume Resistivity:** 10^9 ohms-cm. **Static Decay Time:** Less than 0.05 seconds.

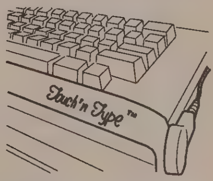
Touch'n Type



Ideal For:
- ▶ **Word Processors**
- ▶ **Computers**
- ▶ **Electronic Cash Registers, Scales, and Typewriters**
- ▶ **Teletype Machines**
- ▶ **Photo Copiers**

The Touch'n Type™ strip is the best method available to quickly route dangerous static electricity away from electronic equipment. Electronic memories can be modified or erased completely and entire computer system failures can be caused by static electricity discharges. Easily mounted on electronic equipment. As soon as the operator makes contact with the Touch'n Type™ strip, the static is safely drained away. **Specifications. Thickness:** 3/64" (1.2 mm). **Surface Resistivity:** 10^8-10^{11} ohms per unit squares. **Volume Resistivity:** 10^{10}-10^{12} ohms-cm. **Static Decay Time:** Less than .05 sec. **Dimensions:** 3/4" × 30" × 3/64". Includes 15 ft. ground cord, alligator clip and extra ring terminal.

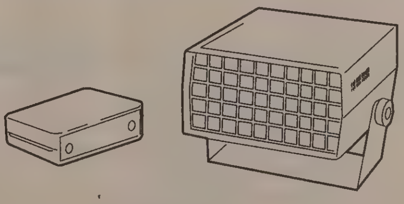
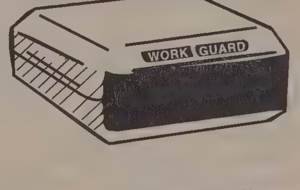
Work-Guard™ and Work-Guard B™ Air Ionizers



Work-Guard™



Work-Guard B™

Work-Guard™. Ends static problems in work areas. The standard is a non-blown ionizer that generates ions through corona discharge at two needle points. Propagation to the work area is done by coulomb repulsion. **Specifications. Power Input:** 110 VAC (also available with 220 VAC adapter). **Ion Output:** Positive and negative. **Induced Voltage:** <100 V on 10 pf object 12" from unit. Below computer/microprocessor interference. **Dimensions:** 4" × 4 1/2" × 1 1/2" (101.6 × 114.2 × 38.1 mm). **Weight:** 1.5 lbs. (680.5 g).

Work-Guard B™. Ionizer with blower, operates on the same principle of ionization as the standard Work-Guard. Low velocity air stream increases the effective area of operation. **Specifications. Power Input:** 110 VAC or 220 VAC. **Ion Input:** positive and negative. **Induced Voltage:** 100 V on 10 pf object 12" from unit. EMI-RFI; below computer/microprocessor interference. **Dimensions:** 6" × 6 1/4" × 3 1/4" (152 × 158.8 × 82.6 mm.) **Weight:** 3.1 lbs. (1420 g). Available with or without heater.

Wrist Straps and Heel Grounders

ESS straps safely remove static electricity from personnel who handle static-sensitive devices. The strap is worn on the wrist of the user, and a ground cord is attached to the strap, thereby serving as a drain path for static electricity. The wrist strap is available in light blue velcro material and is adjustable to fit most wrist sizes. It features excellent skin contact, washability and operator comfort. Ground cords are available in both straight and coiled cord models and in a variety of lengths and termination configurations. All ESS ground cords have a one megohm resistor built into the cord for user safety.

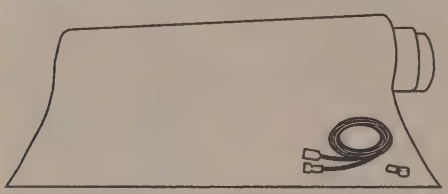
725-0422	IMSC	Wrist band (IMB) with 5 ft. straight ground cord (SC-5)	26.54	23.59	21.23

*Note: All above wrist strap-cord combinations also include an alligator clip for grounding flexibility. All ESS ground cords have one megohm resistor built into the cord for user safety.

Flexible Table Mats



- **Permanently Static Dissipative**
- **Will Not Curl on Work Surface**
- **Durable and Flexible**
- **Eliminates Capacitance Surge (Common in Laminated Material)**
- **Heat- and Flame-Resistant**
- **Humidity Independent**
- **Acid- and Alkali-Resistant**
- **Durable and Flexible**

ESS work surface table mats provide a static dissipative surface to protect sensitive electronic components from damaging electrostatic discharge (ESD) during manufacturing. Static charges from personnel and conductive objects placed in contact with the mats are quickly and safely drained to ground. Because the mats are static dissipative, sparking electrostatic discharge is eliminated, reducing the electrostatic damage and discomfort to personnel. **Specifications. Thickness:** $^{3}/_{32}$ in. (2.4 mm). **Unit Weight:** 1 lb./ft.^{2} (4.9 kg/m^2). **Surface Resistivity:** 109 ohms per unit square. **Color:** Beige (light blue on request). **Rigid mats also available.**

Stock No.	Mfr.'s Type	Size W × L	Description	EACH 1-24	EACH 25-Up
725-0228	ATM-23	24" × 36"	Each table mat includes one 15 ft. ground cord AGC-18-15 and two male snap fasteners	46.66	40.80

†Available in light blue only.

Anti-Fatigue Floor Mats

Reduces foot, leg and back discomfort while draining away annoying and dangerous electrostatic charges. Protects electronic systems from damage and disruption. Springy vinyl mats are .375" thick and weigh .72 lbs./ft.^{2} **Surface Resistivity:** 10^{10} ohms per unit square. **Color:** Ash grey. Rigid floor mats also available.

Model AFM-36. Includes one 15' ground cord AGC-18-15 and four male snap fasteners installed. **Size:** 3' × 6'.

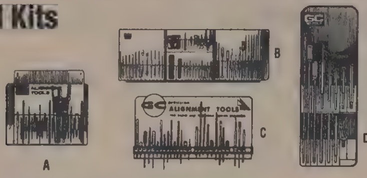
Tool Kits



Type 8280 TV Tool Kit — Fig. A

Contains 15 TV alignment tools in a handy roll-up plastic case. **Includes:** "Shorty" duplex aligner; 1/8" sq. socket wrench; K-Tran tool; 0.100 hex wrench; recessed screwdriver; others. Tip of Delrjn, extra-hard bone fiber, or hardened spring steel.
796-8280. Type 8280 .... **EACH 45.17**

Alignment and Specialty Tool Kit — Fig. B

This kit contains a selection of popular alignment and service tools in a handsome carrying case, ideal for the technician and engineer. Each tool's application is described on inside of case. The kit, containing 44 tools, includes: five hex tools, three hex wrenches, four screwdrivers, eight aligners, three Tel-A-Turn tools, wirestripper, wrench kit, inspection mirror, K-Tran tool, Neo-Lite tester, Lo Volt tester, fuse puller, tweezers, TV channel tuning tool, capacitor tool, two 2-IN-1 tools, oiler, reamer tool, heat sink, solder probe, brush/scraper tool, ruler, burnishing tool, transistor tool, and double end tool.
796-5060. Type 5050 .... **EACH 144.54**

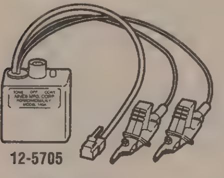
GC Type 9200 Alignment Tool Kit — Fig. C

Wall mounting kit includes 27 most needed radio-TV alignment tools. Housed in sturdy, 3-color steel panel with 2-hole mounting. Precision made of the finest materials including low-loss plastics and extra-hard bone fiber; tips are hardened spring steel. Includes: various length alignment screwdrivers, special short tools; alignment wrenches; channel tuners; core aligners; oscillator adjust tools; trimmer, IF aligners; solder probe; nylon replacement tip for long reach aligner; hex tools; etc. panel is 9 3/4" high and 18 3/4" wide.
796-9200. Type 9200 .... **EACH 81.74**

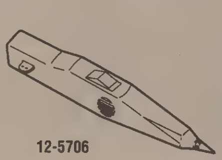
Anti-Static Alignment Tool Kit — Fig. D

Kit contains all nine anti-static alignment tools. The wide range of tip styles and sizes assures that the user will have a tool for adjusting or aligning any conventional component. Supplied with pocket storage case.
796-0145. Type AS-5007 .... **EACH 17.47**

Test Tools *— NEW —*



12-5705



12-5706

Tone Test Set

- **Locates Broken Pairs/Cables in Walls**
- **Tone Generator Emits R.F. Signal Detectable by 12-5706 Station Man Probe**
- **Provides Talk Power on a Dead Pair**
- **Checks for Shorts or Opens, Using a Long-Life Light-Emitting Diode (LED)**
- **Continuity Test**
- **Tip and Ring Identifications**
- **Line Condition Identification: A. Clear Line, B. Busy Line, C. Ringing Line**
- **Positive Line Verification**
- **Heavy Duty Nickel Silver "6A" Type Alligator Clips**
- **Heavy Duty Boots Made Especially for the "6A" Type Alligator Clip**

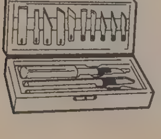
Specifications: Integrated circuit. **Dual Tone Capability:** A — 1000 Hz continuous tone; B — 500/1000 Hz alternating tone. **Power Source 9 Volt Battery:** 216 Eveready, VS323 RCA, 006P import or equivalent; Sold Separately. **Weight:** 3 1/2 oz.; leather carrying case — 3 oz. Heavy duty yellow ABS case.
796-2530. 12-5705 .... **EACH 51.07**

Stationman Probe

- **Leads of Lineman's Test Set Are Clipped to the "Ears" of the Probe Automatically Energizing the Probe**
- **High Input Impedance to Permit Capacitive Coupling with Pair Carrying the Test Signal**
- **Output Impedance Is Low to Match the Impedance of the Telephone Handset**
- **Quickly and Easily Locates the Proper Cable Pair Containing the Tone Signal**
- **An Audible Speaker So That the Speaker Probe May Be Used with or without a Lineman's Test Set**

New locking and non-locking switch which is field adjustable. The test probe is supplied with a cone-shaped tip and a duckbill tip that is longer and flatter, permitting insertion into larger cables, or cables under tension where slack cannot be obtained.
796-2535. 12-5706 .... **EACH 68.09**

Precision Knife Set

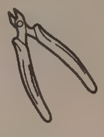


A kit of three knife handles with commonly used blades plus an assortment of ten extra blades. This kit is useful in PC artwork, lab use for cutting cambric, etc. Supplied in wooden case with magnetic spare-blade holder in lid. 16 pieces total.

796-9814. Model 12-007. **1-5** .... **PER SET 26.09**
6-11 .... **PER SET 18.62**

Wire Strippers *— NEW —*

UTP Wire Stripper



- **Safety — the Cutting Blade Is Recessed Into the Housing**
- **Self-Adjusting — Will Provide the User with the Widest Range of Stripping Options; The Tool Will Adjust Automatically to Cut PVC, Plenum Rated Materials and Others without Damaging the Braids, Foils or Conductors**
- **One Piece Design — the Tool Comes Complete and Ready to Use Right Out of the Package**
- **Typical Applications: Data — Ethernet (10 Base T), Token Ring (IBM Cabling Types 1 and 6), Appletalk, and ISDN; Voice — Premis Distribution**
- **Ten Packed in GC Tool Countertop Display**

Specifications. Stripping Capacity: Round/oval cables up to 0.43" (11 mm) in diameter. **Dimensions:** 3.54" (90 mm) × 1.50" (38 mm) × .71" (18 mm). **Weight:** 1.34 oz. (35 gms.)
796-2540. 12-545 .... **EACH 19.98**

One Step Stripper

- **Quickly and Easily Strips RG-59 and RG-6 Cables for CATV**
- **No Adjustments Needed — String Action Adjusts Cutting Depth Automatically**
- **Replaceable Blade Cassette Lasts 1,000 - 2,000 Strips**
- **Convenient Built-In Belt Clip**

796-2545. 12-551. One Step Stripper .... **EACH 9.22**

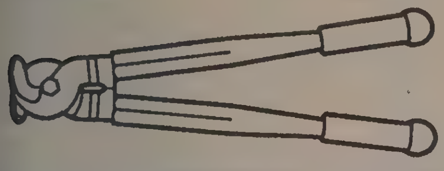
Cable Cutters

727 Cable Cutter

Model 727 cable cutter has forged steel blades for cutting up to 2/0 aluminum or copper cable. Cutter has heat-treated, precision ground shear action blades for clean cuts. High leverage handles are plastic coated for extra comfort and grip.

799-0727.	Model 727	EACH	24.53

718 Cable Cutter



Model 718 cable cutter is lightweight and compact. The 18" overall length cutter has shearing action heat-treated and precision ground blades for dependable service. Steel handles have rubber grips. For 350 MCM copper and aluminum, not for cutting steel, ACSR or live circuits.

799-0718.	Model 718	EACH	56.80

Screwdrivers

TRI-GRIP™ Insulated Screwdrivers

- **Carries The Industry's Highest Insulation Rating For Maximum Protection**
- **User-Friendly TRI-GRIP™ Handle Design Delivers Excellent Driving Power With Reduced Manual Effort**
- **Meets IEC/VDE Standards**

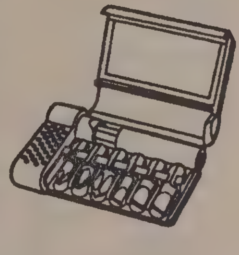
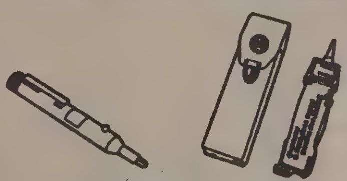
Kwix-Bits™ Bit Box Screwdriver Set



- **Pocket-Sized Bit Holder Stores Six Screwdriver Bits and a Magnetic Chuck**
- **Unique Case Design Can Be Used as a Hand Held Screwdriver as Well as a Large Storage Compartment**
- **Kwik Bits™ Bit Box Screwdriver Set Includes: $\frac{5}{32}$" slotted, $\frac{7}{32}$" slotted, $\frac{1}{4}$" slotted, #1 Phillips, #2 Phillips, #3 Phillips, Magnetic Chuck, Magnetic Bit Holder**

799-4781.	47819	EACH	17.17

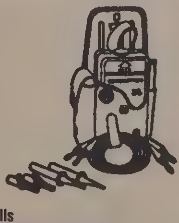
Volt Tick™ Contactless Voltage Indicators



Hand held voltage testers for easy use. Sense the presence of AC voltage without making contact, 2010 has adjustable sensitivity. Comes in both pocket and belt sizes. Small size allows checking fuses in a cabinet and individual line voltage presence is indicated. Audio and visual indicators assure operation. 2010 has light at the base for use with hot stick. Model 2010H comes with holster.

799-1010.	Model 1010 (50-500 VAC)	EACH	21.01
799-2010.	Model 2010H (24-1500 VAC)	EACH	94.38

Gas Lamp Tester



- **Test All Gas-Filled Lamps including: Fluorescent, High And Low, Pressure Sodium, Neon, Mercury Vapor And Metal Halide**
- **Indicates AC/DC Voltage Up To 500 V; Continuity Up To 300 Ohms**
- **Detachable Antenna Extends to 27" (686 mm)**
- **Visual And Audible Indicators**
- **Checks Ballasts, Ignitors, Starters, Capacitors, Resisters And Photo Electric Cells**
- **Batteries, Lead Probes, Clamps, Antenna And Holster Included**

799-5715.	Model 5715	EACH	226.92

Voltage Testers

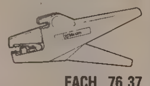
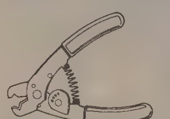
Maxim Wire Stripper



Self-adjusts to different wire sizes and insulation densities. Strips 10-26 AWG solid or stranded wires. Strip lengths adjustable from 1/8" to 3/4".

954-4532. 45-327. Maxim Wire Stripper .... **EACH 76.37**
988-5610. LA-2524. Replacement Blade Set Cartridge .... **EACH 30.28**

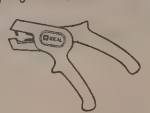


V-Notch Stripper

This handy tool strips and cuts solid and stranded copper and aluminum wire from 10-28 AWG. It features a convenient dial-type adjustment.

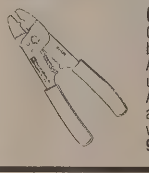
954-4502. 45-100. Without spring .... **EACH 6.18**
954-4501. 45-101. With spring .... **EACH 7.08**

IDEAL Grip-N-Strip™ End Stripper



This handy tool features self-adjusting stripping blades. Strips 12 AWG solid through 20 AWG stranded PVC insulated wire, including U.S. type THHN and THWN wire.

954-3656. 45-227T .... **EACH 33.04**

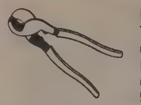


Combo Tool

One tool performs four functions — wire stripping, bolt cutting, crimping, and wire cutting. Strips 8-20 AWG solid and 10-22 AWG stranded wire. Cuts unhardened 4-40, 6-32, 8-32, 10-24 and 10-32 bolts. Accurate crimping of both bare and insulated terminals as well as IDEAL's 30-410 crimp sleeves. Anvil-type wire cutting 10 AWG solid to 22 AWG stranded wire.

954-3028. 30-428 .... **EACH 27.27**

Cutting Tools



Cable Cutter

The hardened, high-grade carbon-steel cutting edges of this tool are precision ground to give clean cuts with minimum cable distortion. Cuts 2/0 aluminum and copper. Not recommended for steel or ACSR.

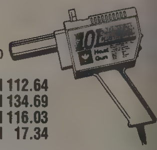
988-3552. 35-052. 9½" Cable Cutter .... **EACH 34.45**

Round Cable Cutter

Round cable and wire cutter cuts coaxial cable up to RG9U, multi conductor cable up to .500" and solid or stranded wire up to #8 AWG.

954-3685. 35-051 .... **EACH 23.08**

101 PLUS Heat Gun



Designed for smaller target areas. Perfectly suited to the unique requirements of electronic assembly.

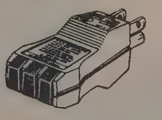
Testers

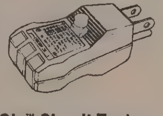


E-Z Check® Receptacle Circuit Tester

Used for fast, simple testing and fault identification in 3-wire, 125 V circuits, without probes or meters. Tests for open ground, reverse polarity, open hot, open neutral, hot and ground reversed, hot on neutral, and hot open.

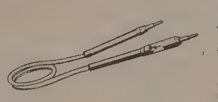
954-6135. 61-035	EACH	15.00

E-Z Check® Plus GFI Circuit Tester



Checks for correct wiring, open ground, reverse polarity, open hot, open neutral, hot on neutral, hot and ground reversed with open hot and ground fault interruption.

988-6151. 61-051	EACH	29.07

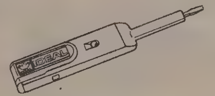


IDEAL Test-Glo™ Circuit Tester

This industrial-quality tester is designed to check electrical circuits, spark-plugs, motors, fuses, etc. For use with 80-660 V AC or DC.

954-3644. 61-040	EACH	17.63

IDEAL Vol-Test™ Pocket Tester



This compact pocket tester performs continuity, polarity and voltage testing to verify electrical connections. Also features a handy screwdriver tip.

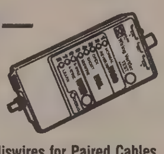
954-3686. 61-050	EACH	10.78

IDEAL Powr-Glo™ Pocket Tester

Checks voltage from 12-440 V AC or DC without contact on electrical lines.

954-3688. 61-060. Powr-Glo™ Electronic Voltage Detector	EACH	15.25
954-3689. 61-061. Powr-Glo™ Audible	EACH	22.17

IDEAL Wiring Verifier Patch Cable Tester — *NEW* —



Applications

- **Patch Cables**
- **Line Cords**
- **Jumper Cables**
- **Interface Cables**
- **Coaxial Cables**

- **Single Tester Identifies Shorts, Opens, and Miswires for Paired Cables and Opens or Shorts for Coaxial Cables for Versatile on the Job Usage**
- **Learn Mode Allows Wiring Schematics, Including EIA/TIA 568 A/B, USOC, 10Base-T, Token Ring, and TP-PMD, As Well As Custom Configurations to Be Quickly and Easily Learned for Verification**
- **High Intensity LED Indicators Provide Clear Visual Analysis of Cable Condition**
- **Multi-Color Mylar Legend Plate Makes Cable Status Check Fast and Easy**
- **Optional Audible Signal Confirms Completion of Test**
- **Automatic Off Feature Turns Unit Off After a Period of Inactivity and Prevents Unnecessary Battery Discharge**
- **Premium Grade RJ45 Jacks and Coaxial Port Insures Long Life**
- **Sealed Push Buttons Provide Dust and Moisture Resistant Protection for Circuit Board**
- **Durable ABS Case Provides Impact Protection**

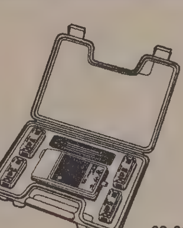
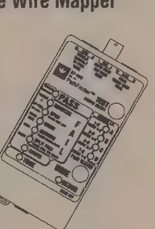
Pathfinder — *NEW* —

Combination Wiring Tester and Remote Wire Mapper



33-812



62-080

- **Quickly and Reliably Tests Installed Twisted-Pair, Coax Cabling, USOC and Other LAN-Based Cabling**
- **Evaluates One- to Four-Pair Cabling for Reversals, Opens, Shorts, Miswires and Split Pairs**
- **Use to Test T568A, T468B, 10BASE-T, TP-PMD, Token Ring and USOC Wiring Schemes**
- **Will Test Coax Cabling for Opens and Shorts**
- **Learn Mode Will Learn and Test Installed Custom or Nonstandard Wiring Configurations**
- **Features Tone Generation on Either Coax or Twisted-Pair Wiring**
- **Master and Four Remote Units (A, B, C and D) Are Used to Test Twisted-Pair Wiring**

The Pathfinder Kit includes master unit, four remotes (A, B, C and D), five modular cords wired straight through and 500 Ω terminator packaged in a gray carrying case. Order 62-080 for the Pathfinder coax/twisted-pair tester only. Remotes A-D also are available separately. One year warranty.

954-3700. 33-812. Pathfinder Kit	EACH	265.00

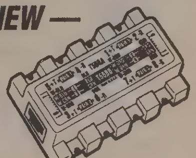
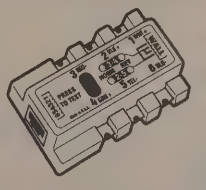
Data8™ Modular Test Adapter — *NEW* —



- **Data Wired Modular Unit for Data Applications**

Ideal's Data8™ Modular Test Adapter with straight-through data wiring construction allows testing of T568A, T568B, 10BASE-T, Token Ring and TP-PMD systems. Use it with tone generation, butt-in test sets and other test devices to provide access to data lines without service interruption. Put tone on a line to trace lines. An easy-to-read label indicates individual conductors and pins defined with number, color and polarity identifications.

954-3760. 62-098. Data8™ Adapter	EACH	31.99



Smart6™ Modular Tester — *NEW* —

- **Telco Wired Modular Unit for Voice Circuit Applications**

Smart6™ is a reverse-wired modular adapter designed especially for voice circuit testing. Use it with a tone probe or tone generator to put tone on a line to trace lines. Four bright LEDs display power, polarity, ac voltage conditions, jack addresses and incoming call identification for typical on-the-job applications. A test button tests one or two paris (pins 4-5 and/or 3-6) for the presence of voltage on the line. It allows access to the circuit as a modular test adapter without disrupting service. Ring detection tests phone number and line.

KR-260 Contact Removal Kit

These kits provide invaluable assistance to the technician. They include the specialized tools required for the insertion and removal of the most popular connectors, all contained in a small handy case. Designed for use with subminiature connectors conforming to MIL-C-26482, MIL-C-26500, MIL-C-26518, and MIL-C-81703 standards, these kits include the most common and popular tools in the industry. They are completely compatible with "original manufacturer" tooling from all major suppliers such as AMP, Amphenol, Bendix, Burndy, Cannon and Deutsch and will work with virtually any connector of this type. The KA260 Insertion Kit includes the three most popular sized insertion tools for contact sizes 12 (yellow), 16 (blue) and 20 (red). The KR-260 Extraction Kit includes the three most popular sized extraction tools for contact sizes 12 (yellow), 16 (blue) and 20 (red). Both kits are packaged in a durable leather padded zipper case and have been carefully designed to save both time and effort, plus ensure efficient, on-the-job operation.

Hand Wrapping Tools

This wire wrap tool has a handle and shell, each covered with a sleeve of insulating material. It has a .073" diameter hole and .750" deep to accommodate a terminal, and a hole near the handle to facilitate removal of broken wires. It is used on terminals of wire spring relays, number 5 crossbar wire spring number group, and other components having similar terminals.

Manual Quick-Wrap Gun, Bit and Sleeve

Hand operated wrapping gun uses interchangeable bits and sleeves. Bits conform to terminal height, width and wire size combinations. Sleeves selected to fit over the bit. Insulated to prevent shorting of adjacent connections. **Terminal Diameter × Depth:** .075" × .750" for wire gauge 24-26; .075" × .807" for wire gauge 22-24.

31-Piece Precision Tool Kit

These high quality tools were specifically designed for the servicing, adjusting, and trouble-shooting of complex electronic equipment. The special assortment makes it easy and economical for use in assembly work. The durable zipper leather case contains the following tools — three pliers, three screwdrivers, pen light, soldering iron and accessories, tweezer, two alignment tools, four spring hooks, inspection mirror, pocket and finger burnishers, IC extractor, spudger and trimpot tool.

84-Piece Universal Tool Kit

Now, with just one tool kit, you can install, adjust, service and maintain central office systems (inside and outside plant), telecommunications systems, and a wide variety of instruments. You will also be able to perform precise general repair work in labs and service shops for all industries. No loss of time for lack of certain tools!

All tools are securely mounted in individual pockets in an extra heavy-duty, high impact polyethylene case, measuring 18" × 15" × 6". Wing and removable pallets provide easy access to ample space in bottom of case for additional tools and equipment. Comes with both combination and key locks. The kit includes — force gauge, eight pliers, insertion tool, extraction tool, wrapping tool, unwrapping tool, 12 screwdrivers, four nutdrivers, soldering iron, finger burnishers, lamp extractors circuit tester, two soldering accessories, pocket and angled burnishers, trimpot, hemostat, three alignment tools, four spring hooks, two needle files, nickel silver brush, precision oiler, wire extraction tool, thickness gauge set, five birchwood sticks, inspection mirror, IC extractor, parts holder box, six spring adjusters, two tweezers, spudger penlight and five wrenches

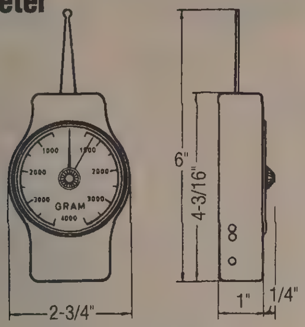
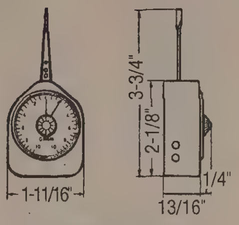
Dynamometer Tension Gauges



Large Gauge (Round Tip)



Small Gauge (Flat Tip)

These precision dial type gauges deliver accurate measurement of forces required to actuate relays and other sensitive mechanisms. Reading can be taken in both directions: clockwise and counter-clockwise. Maximum reading indicator moves with indicator when testing and remains at maximum force measured until reset. No need to look at dial hand while measuring, thus avoiding reading errors. Measuring springs are of hard tempered annealed beryllium copper. Dial is protected by breakproof glass. Each unit packaged in rigid, fitted case for protection. 0.1% accuracy. Dynamometer gauges are available in 2 sizes and 13 different ranges. Easy to use. Easy to read.

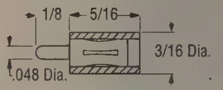
*Jack only. †Jack with hardware (2 flat washers, lock washer, and nut) supplied unassembled bulk. **Note:** Also available with Zinc and Clear Chromate finish. Add -5 to basic part number.

Vertical P. C. Test Jack



Accepts .80" Tip. This low profile vertical jack allows dense packing where space is limited. Mounts into a .052" diameter home. Provides easy access and positive electrical contact. The contact is recessed to prevent accidental shorting. Capacitance between two adjacent jacks less than 1.0 pF at 1 MHz. **Operating Voltage:** 1500 volts RMS. **Current Rating:** 5 amps max. **Material Specifications. Body:** Nylon per ASTM D4066. **Contact:** Beryllium copper silver plated.

Spacer Organizer

Avail yourself of all practical sizes and types of spacers and standoffs. Maintain a neat complete inventory of the most frequently used parts in day-to-day operations. An assortment of various sizes and styles in brass, aluminum and nylon with tapped or thru-hole. Metal cabinet designed to be stacked on one another or wall mounted. Clear plastic drawers labeled for easy identification. The following organizer kits are available from stock!

1/4" Hex Threaded

Brass Zinc Plated. Assortment of 1500 pieces 1/4", 3/8", 1/2", 3/4", and 1" lengths. With threaded sized of 4-40, 6-32 and 8-32. 100 pieces of each size complete with cabinet.
839-0014. STH-14 .... **EACH 354.46**

Aluminum Iridite Finish. Assortment of 1500 pieces in 1/4", 3/8", 1/2", 3/4", and 1" lengths. With threaded sizes of 4-40, 6-32 and 8-32. 100 pieces of each size complete with cabinet.
839-0022. STH-22 .... **EACH 244.89**

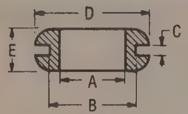
1/4" Round

Clear Nylon 6/6. Assortment of 1500 pieces in 1/4", 3/8", 1/2", 3/4", and 1" lengths. With clearance holes for #4, #6, and #8. 100 pieces of each size complete with cabinet.
839-0008. SPR-8 .... **EACH 174.01**

1/4" Hex Male/Female

Brass Nickel Plated. Assortment of 750 pieces in 1/2", 3/4", 1", 1 1/4" and 1 1/2", lengths. With threaded sizes of 4-40, 6-32 and 8-32. 50 pieces of each size complete with cabinet.
839-0019. STH-19 .... **EACH 322.22**

Rubber Grommets



For electrical insulation and mechanical damping. Made of BUNA S.

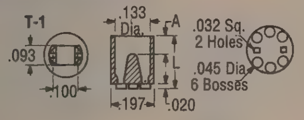
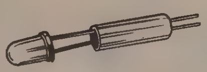
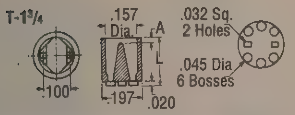
LED Spacer Mounts

T-1





T-1³/₄



- ► Internal Design Eliminates Crimping or Shorting of Leads
- ► Positive Self-Alignment of Leads On .100 Centers
- ► Cost and Labor Saving
- ► No Special Tools Required

"Future-Tech" designed for T-1 and T-1³/₄ LEDs. These unique, new self-aligning LED mounting spacers simplify preassembly to the printed circuitboard. The spacer features an internally tapered barrier which guides the leads. The bosses serve the dual purpose of heat dissipation and easy post soldering cleanup. Natural nylon, UL rated 94V-2.

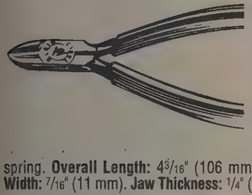
Standard Diagonal Cutting Pliers

Basic diagonal cutting pliers with tapered nose and standard bevel cutting knives. Model D245-5C has coil spring to hold jaws open. Red plastic-dipped handles. **Dimensions. Overall Length:** 5" (127 mm). **Jaw Length:** 11/16" (17 mm). **Jaw Width:** 9/16" (14 mm). **Jaw Thickness:** 3/8" (10 mm).

726-1000. D245-5. Standard Diagonal Cutter .... **EACH 18.76**
726-1005. D245-5C. Standard Diagonal Cutter with Coil Spring ...... **EACH 19.56**

Standard Nose, Semi-Flush Cutting Pliers



General-purpose cutter with short, strong, tapered nose. Knives are semi-flush cutting. With coil spring. **Overall Length:** 4 3/16" (106 mm). **Jaw Length:** 1/2" (13 mm). **Jaw Width:** 7/16" (11 mm). **Jaw Thickness:** 1/4" (6 mm).

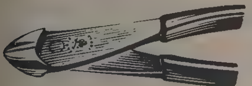
726-1030. D257-4C .... **EACH 20.82**

Slim Pointed Nose Pliers

Semi-flushed cutting pliers are relieved in the back to permit entry into confined areas. Specifically designed for tip cutting. With coil spring. Plastic-dipped handles. **Overall Length:** 5" (106 mm). **Jaw Length:** 1/2" (11 mm). **Jaw Thickness:** 1/4" (6 mm).

726-1035. D219-4C. Semi-Flush Cutting .... **EACH 21.26**
726-1040. D219-5C. Semi-Flush Cutting .... **EACH 23.04**

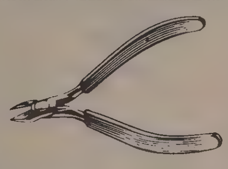
Standard Nose, High-Leverage Cutter



High-leverage design provides a 36% greater mechanical cutting and gripping advantage than regular 7" and 8" heavy-duty diagonal cutters. Standard bevel cutting knives. Red plastic-dipped handles.

726-2288. D228-8........ **EACH 20.14**
726-2287. D228-7........ **EACH 20.42**

Tapered Nose, Midget Jaw, Full-Flush Cutting Pliers



These small, diagonal cutting, clean room electronics pliers are designed to permit working in very close quarters with maximum visibility. Fully polished head and neck. With coil spring. Plastic-dipped handles. **Overall Length:** 4 3/16" (106 mm). **Jaw Length:** 1/2" (13 mm). **Jaw Width:** 3/8" (10 mm). **Jaw Thickness:** 1/4" (6 mm).

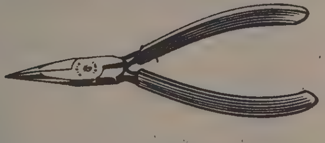
726-1050. D295-4C .... **EACH 21.86**

Special Long-Reach Designer Pliers

Longer handles for more convenient use and greater jaw gripping power. Knurled jaws. Yellow plastic-dipped handles. **Overall Length:** 8" (203 mm). **Jaw Length:** 1 15/16" (49 mm). **Jaw Width:** 11/16" (17 mm). **Jaw Thickness:** 3/8" (10 mm). **Point Thickness:** 3/32" (2 mm).

726-1125. D314-8........ **EACH 17.92**

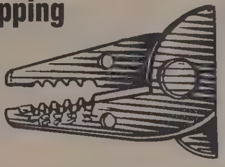
Midget Slim Nose



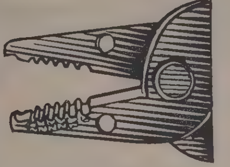
This small, light, slim nose plier is designed for precision subminiature assembly work. Knurled jaws. With coil spring. Plastic-dipped handles. **Overall Length:** 4 3/4" (121 mm). **Jaw Length:** 1 1/16" (27 mm). **Jaw Width:** 7/16" (11 mm). **Jaw Thickness:** 1/4" (6 mm). **Point Thickness:** 1/32 × 1/16" (.8 × 1.6 mm).

726-1130. D321-41/2C .... **EACH 17.52**

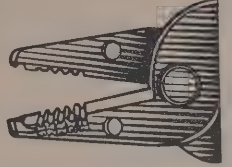
Wire-Stripping



11045



11046

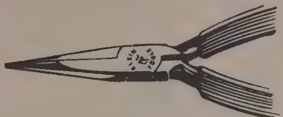


11047

Compact, lightweight strippers gauge, cut, strip and loop wire. Spring-loaded, self-opening action. Flat design makes them easy to store and carry. Narrow nose fits into tight places. Strip wire quickly, cleanly, evenly. Strong, hardened-steel with precision-ground stripping holes. Clear gauge markings on both sides. Black oxide finish. Comfortable plastic-dipped handles. **Overall Length:** 6" (152 mm). Do not use on live electrical circuits.

726-1215. 11045. Yellow Handle. Solid Wire. Strips AWG Gauges No. 10, 12, 14, 16, 18 (2.6, 2.1, 1.6, 1.3, 1.0 mm) .... **EACH 12.70**
726-1220. 11046. Red Handle. Stranded Wire. Strips AWG Gauges No. 16, 18, 20, 22, 24, 26 (1.2, 1.0, .81, .64, .51, .40 mm) .... **EACH 12.70**
726-1225. 11047. Yellow Handle. Solid Wire. Strips AWG Gauges No. 22, 24, 26, 28, 30 (.64, .51, .40, .32, .25 mm) .... **EACH 12.70**

Slim Long Nose Pliers



Longer nose and handles for deeper reach into work. Knurled jaws. With or without coil spring. Yellow plastic-dipped handles. **Overall Length:** 5 9/16" (141 mm). **Jaw Length:** 1 3/4" (44 mm). **Jaw Width:** 17/32" (13 mm). **Jaw Thickness:** 5/16" (8 mm). **Point Thickness:** 1/16" (1.6 mm).

726-1145. D307-5 1/2C. With Coil Spring .... **EACH 18.68**

Long Needle Nose Pliers

Designed for accurate assembly work in hard to reach areas. Provides maximum visibility. Features knurled jaws, coil spring, and yellow plastic-dipped handles. **Overall Length:** 5 13/32" (137 mm). **Jaw Length:** 1 3/4" (44 mm). **Jaw Width:** 1/2" (13 mm). **Jaw Thickness:** 5/16" (8 mm). **Point Thickness:** 1/16" (1.6 mm).

726-1155. D318-5 1/2C........ **EACH 19.48**

Cable Cutters

This handy, economical tool handles most cable-cutting jobs with ease. Special high-leverage design gives it amazing cutting capability for its size. Cable-gripping, shear-type jaws cut up to 4/0 aluminum (Not ACSR)...up to 2/0 soft copper...up to 100-pair, 24-gauge communication cable. Makes clean, efficient cuts. Compact...only 9 1/2" (241 mm) long, can be carried in tool pouch or Klein No. 5112 or No. 5112T tool holders. Ideal for working in confined spaces. Tough comfortable, red plastic-dipped handles. Not designed for cutting steel or ACSR.

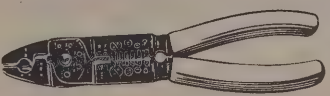
726-6305. 63050 .... **EACH 26.62**

Multi-Purpose 6-In-1 Tool

Designed for a variety of applications — shears bolts clean; cuts, strips, and gauges wire; measures stud sizes; crimps insulated terminals. With red plastic-covered handles. **Length:** 7 1/2" (191 mm).

726-1230. 1000........ **EACH 18.84**

All-Purpose Tool



Will crimp insulated and non-insulated terminals, lugs, and splices; cut and strip wire; cut bolts; crimp 7 mm ignition and distributor terminals. For sizes 10 to 22 AWG. Features wire cutter in nose and full-sized red-plastic-covered handles. **Length:** 8 1/2" (216 mm).

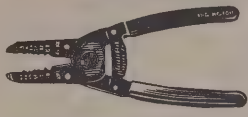
726-1235. 1002........ **EACH 22.22**

Long-Nose All-Purpose Tool

Combination cutter/crimper features crimping dies for insulated and non-insulated connectors from 10-22 gauge, and cutters for 4-40, 5-40, 6-32, 8-32, 10-32, and 10-24 screws. Designed to cut screws and cut, strip, and crimp wire. Cutters and strippers located in front of the pivot. With narrow serrated plier jaws to pull, loop, and bend wire, and blue plastic-covered handles. **Length:** 8 1/4" (210 mm).

726-1245. 1010........ **EACH 19.40**

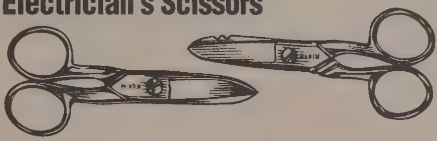
Adjustable Wire Stripper/Cutter



Strips six standard wire sizes without nicking wire: No. 10 through 20 AWG and 5.3 through .5 metric. Scissors action of 1/2" wide cutter makes clean cuts with little effort. Serrated nose jaws to bend, shape, or pull wire; holes for looping wire ends. Compact; only 6" long. Coil spring reduces fatigue. Comfortable, blue plastic-covered handles.

726-1011. 1011........ **EACH 13.32**

Electrician's Scissors

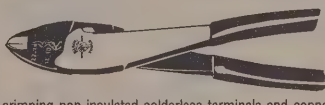


Designed for heavy-duty use. Strong, tough, tempered steel. Nickel-plated finish. Scraper and file on outside of both blades. Sharp points. Screw hinge permits adjustment. **Overall Length:** 5" (12.7 cm).
726-2100. 2100-5 .... **EACH 13.12**

Stripping Notches

Similar to No. 2100-5 above, but with lower blade serrated to minimize slippage of wire when cutting. Upper blade has notches for stripping 19- and 23-gauge wire. Rounded points. **Overall Length:** 5" (12.7 cm).
726-2107. 2100-7 .... **EACH 15.24**

Crimping Tools



Type 1006. For crimping non-insulated solderless terminals and connectors (10 to 22 AWG.) Features tapered nose containing specially hardened wire cutter and plastic-dipped handles (one black, one red). **Length:** 9 3/4" (248 mm).
726-1240. 1006........ **EACH 25.82**

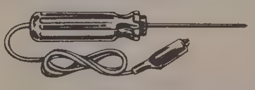
Type 1005. For insulated and non-insulated terminals and connectors; will handle wire from 10 to 22 AWG. Features thin nose for work in tight areas, wire cutter in nose, and red plastic-dipped handles. **Length:** 9 3/4" (248 mm).
726-1250. 1005........ **EACH 25.00**

Wire Stripping Tools

Strips AWG Gauges: 10, 12, 14, 16, 18, 20, 22 (2.6, 2.1, 1.6, 1.3, 1.0, .81, .64 mm).

726-1226. 11062..**EACH 38.64**

Continuity Tester

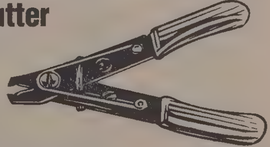


- **Extra Long 36" Lead Wire**
- **Deluxe Comfordome® Amberyl Handle**

Checks for defective controls and switches, broken leads or lines, motors, appliances, etc. Tests for continuity of circuit with power off. Bulb in handle glows when circuit in complete. Pointed 3 3/4" probe. Large 4" handle with removable nylon cap holds replaceable bulb and battery. Long 36" test lead with alligator clip. **Shipping Weight:** 1 lb.

979-7000. 69133 .... **EACH 11.66**

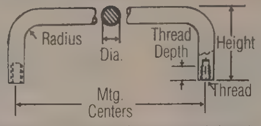
Wire Stripper-Cutter



A handy, light, compact tool for stripping insulation from wire. Convenient hole for looping or bending wire. With or without hold-open spring. Yellow plastic-dipped handles.

726-1237. 1004. With Spring. 5" (127 mm) .... **EACH 7.67**
726-1236. 1003. Without Spring. 5" (127 mm) .... **EACH 6.86**

Instrument Handles



Internal thread; 1/4" dia., 1 1/2" ht., 1/4" rad.: 1620, 1624 (chrome plated); 1618 (round aluminum, satin finish); 1619, 1627 (round aluminum, black anodized). Internal thread; 5/16' dia., 1 1/2" ht., 5/16' rad.; 2057 (chrome plated). 5/8" dia., 1 3/4" ht., 1/2" rad.; 1654 (oval aluminum, black anodized).

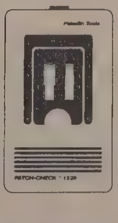
Patch-Check and Patch-Check Plus

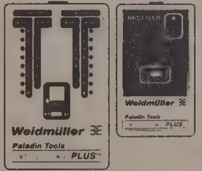
Patch-Check Telephone/Data Wiring Tester



Patch-Check™ is a hand held instrument designed to test telephone (RJ11) and computer data-link (RJ45) wiring. Patch-Check™ identifies open, shorted and cross connected wires with a clear LED display. Depress the pushbutton to review a sequential comparison of the wire position and continuity of the plugs at each end of the cable. The instrument is powered by a 9 volt battery supplied with each unit.

889-1529. Patch-Check	EACH 66.67

Patch-Check Plus Tester for Installed Telephone/Data Wiring



Patch-Check Plus Verifies continuity of each wire of RJ11 or RJ45 cable installations up to 1200 feet in length from one end. Patch-Check Plus identifies open shorted and cross connected wire with a clear LED display and audible signal. Each touch of the test button connects the relationship of one pin on the transmit side with the corresponding pin at the far end receiver. Transmitter and receiver are shipped with 9 volt batteries installed and system interconnects for RJ11, RJ45 and MMJ (DEC).

Model 502 Panapress. This small, less than 7" high, arbor press has a rated capacity of 500 psi. The ram is fully reversible with 4 nylon adjusting gibs for accurate direction control. The arbor and table plate are of pressure die cast Zimac and the operating mechanism and operating lever are hardened and ground steel. The leverage ratio is 13.25:1. The throat depth is 2¹/₂" and vertical capacity is 3¹/₂".
890-5050. Model 502....EACH 109.99

Model 505 IDC Bench Assembly Press. ¹/₄-ton manual press with assembly base and standard platen. Mass termination of up to 64-conductor cable in seconds without wire stripping or soldering. Full series of base plates available. For IDC connectors on flat (ribbon) cable.
890-5055. Model 505....EACH 166.99

Model 510. Base plate for installing female socket transition connectors.

890-5075. Model 513....EACH 26.99
*Other plates are available from the factory.

Model 324 Electronic Work Center. This handy work center is convenient yet economical. Angle of solder iron holder maintains iron at proper heat and solder holder self centers wire. Sturdy, stable, yet easily mobile, the 324 keeps everything right at hand. (Combination of Models 315, 300, 312, and 371).
890-4400. Model 324....EACH 76.99

Model 396 Wide Opening Head. Designed to hold projects in any position for assembly or repairs, the PanaVise 396 is a combination of the 366 Wide Opening Head and the 300 Standard Base. Each full turn of the insulated handle permits micro-adjustments to the exact pressure required.
890-4500. Model 396....EACH 45.99

Model 350 Multi-Purpose Work Center. This Multi-Purpose Work Center can be used to work on objects up to 9 inches in size as well as those tiny hard-to-hold objects. The Standard base tilts, turns and rotates to any work position and the tray base mount keeps small parts and tools right at hand. (Combination of Models 376, 300, and 312).
890-4410. Model 350....EACH 74.99

Model 301 Standard PanaVise. This all-purpose Standard PanaVise tilts, turns and rotates. Consisting of a Standard Base Model 300 and a 303 head, the 301 has nylon jaws with a satin finish for a firm grip. Just one convenient control knob locks work firmly in any position.
890-4451. Model 301....EACH 42.99

Model 381 Vacuum Base PanaVise. The 380 Vacuum Base is combined with the Model 303 Standard Head to create the same versatility of the Standard PanaVise with portability. Half turn of the mount lever attaches and releases powerful suction pad to allow setups in a variety of locations with a smooth non-porous surface.
890-4464. Model 381....EACH 54.99

Model 201 PanaVise® Jr. PanaVise® Jr. uses the famous Panavise® design that tilts, turns, twists and rotates. One quick turn of the control knob and you securely position your work exactly where you want it. **Overall Height:** 6³/₄" (17 cm). **Total Weight:** 1 lb. 4 oz. (567 g). **Base Specifications. Bolt Circle:** 4⁵/₁₆" b.c. **Material:** Die cast zinc. **Jaw Specifications. Min. Opening:** 0" (0 cm). **Max. Opening:** 2⁷/₈" (7.3 cm).

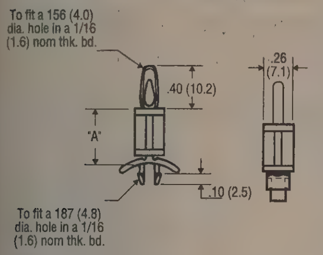
Circuit Board Supports



To fit a 156 (4.0) dia. hole in a 1/16 (1.6) nom thk. bd.
.40 (10.2)
"A"
.26 (7.1)
.10 (2.5)
To fit a 187 (4.8) dia. hole in a 1/16 (1.6) nom thk. bd.

Board supports are easily installed by hand. Assembled boards are readily mounted, lock in place and are easily removed for replacement or repair. Made from strong, tough nylon. Positive spring locking action, yet are easily removed. Snap into .187" hole in chassis .030-.093" thick. **Av. Shpg. Wt.:** 4 oz.

To fit a .187 (4.8) dia. hole in a 1/16 (1.6) nom. thk. bd.

Nylon Circuit Board Supports feature a locking tension flange which laps over the board to hold securely in position. Supports up to 100 lbs. No need for tools. An arrow-type locking head snaps into a .187" dia. hole in the chassis where it expands to lock permanently in position. A squeeze of the fingers permits removal of the board from the support for repair or replacement.

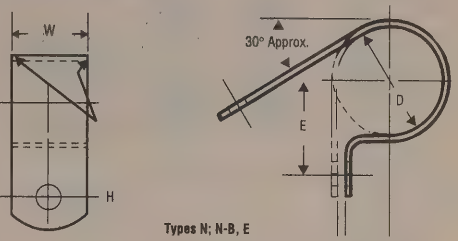
Cable Clamps



Types N; N-B, E

Type "E" 1/2" Wide (Ethyl Cellulose)

Ethocel combines light weight and chemical resistance with excellent shock resisting properties in a temperature range from +185°F to –40°F. Ethocel clamps feature toughness and excellent electrical properties to satisfy unlimited fastening problems throughout the electrical industry. Approved 7-21-44 Army-Navy Aeronautical AN742. **Thickness:** 0.055" (±0.005"). **Hole Dia.:** .199"/.204".

*Military Standard Grommets are available for quotation upon request.

Caterpillar Grommets

Ideally suited to conform to irregular holes of any size, the "Caterpillar" Grommet requires no cementing. Available in several widths, the "Caterpillar" Grommet will fit a variety of metal thicknesses. Available from stock in 12¾" lengths, the "Caterpillar" can be easily cut to any desired length. Caterpillars can be molded in any length or size with minimum quantity orders.

The "Caterpillar" Grommet is used extensively in aircraft and space vehicles, the computer and electronics field, appliances, office furniture, lighting fixtures, and a variety of other industries to insulate wires which must pass through a hole in sheet metal. Caterpillar Grommets conform to Military standards #MS21266, and are molded of nylon which conforms to MIL P-20693A Type 1 requirements. They are supplied in standard 12¾" long strips to be cut to size required. Spools are available for larger holes.

WIHA® Precision Electronic Tools

- ► **Rotating Cap for Precise Turning and Control with Fingertip**
- ► **Precision Handle Is High Quality Plastic, Cadmium Free**
- ► **Tapered Handle Allows Rapid Rotation**
- ► **Blade Is Chrome-Vanadium-Molybdenum-Steel, Hardened, Chrome-Plated**
- ► **Tip Is Precision Ground for Exact Fit**

Model 26090. 6 piece set. Set contains 1 each precision slotted: 1.5 (1/16) × 40 mm; 2.0 (5/64) × 40 mm; 2.5 (3/32) × 50 mm; 3.0 (1/8) × 50 mm; 3.5 (9/64) × 60 mm; 4.0 (5/32) × 60 mm.
962-6090. 26090 .... **PER SET 21.59**

Model 26190. 7 piece set. Set contains 1 each precision slotted/Phillips: 1.5 (1/16) × 40 mm; 2.0 (5/64) × 50 mm; 2.5 (3/32) × 50 mm; 3.0 (1/8) × 60 mm; #00 × 40 mm; #0 × 50 mm; #1 × 60 mm.

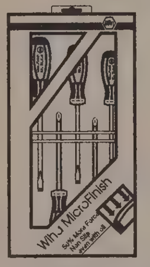
WIHA® Micro-Finish Handle Kits
— NEW —



52090

53390

- ► **Exact Fit Precision Ground Tip**
- ► **Blade Is Chrome-Vanadium-Molybdenum, Hardened and Tempered Tool Steel Blades for Exceptional Tool Life, Wear Resistance and High Torque Performance**
- ► **Safe High Density Material — Eliminates Risk of Sharp Objects Becoming Embedded in the Handle**
- ► **Micro-Finish Handle Is the WIHA® Ergonomic PowerHandle Combined with Micro-Finish Surface for Maximum Comfort and Exceptional Torque**

WIHA® Micro-Finish handle has a patented non-slip surface — it won't peel, crack or deteriorate. Oil and moisture flow away from the handle surface for a powerful, non-slip grip. You get maximum force and comfort with dry, oily or wet hands. Cellulose-acetate, impact resistant, non-slip, oil and grease resistant, black, cadmium free. **Blade:** Chrome-vanadium-molybdenum-steel, hardened, chrome-plated.

Model 52090. 5 piece set. **Slotted:** 4.0 mm — 100 mm shaft length; 5.5 mm — 125 mm shaft length; 8.0 mm — 150 mm shaft length. **Phillips:** 1 — 80 mm shaft length; 2 — 100 mm shaft length. **Weight:** 1.2 lbs.
962-5209. 52090 .... **PER SET 31.96**

Model 53390. 5 piece set. Hex blade extending through handle with striking plate. Hex bolster for wrench. **Slotted:** 5.5 mm — 100 mm shaft length; 6.5 mm — 125 mm shaft length; 8.0 mm — 150 mm shaft length. **Phillips:** 1 — 80 mm shaft length; 2 — 100 mm shaft length. **Weight:** 1.6 lbs.

Hand Tools

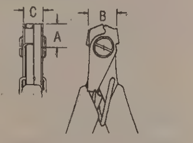
Pliers and Cutters With Red Cushion Grip Handles

- The Exceptional Strength and Performance Of Xcelite® Pliers and Cutters Are The Result Of Forged Alloy Steel Construction, Precision Machining, and Scientific Proportioning
- Handles Designed To Fit The Hand Comfortably and To Provide Maximum Leverage
- Cleanly Machined and Perfectly Aligned Jaws Grip Tightly and Surely While Easy Cutting Is Assured By Hand-Honed, Mated Cutting Edges
- For Extra Working Comfort All Models Have Permanent, Red Plastic-Coated "Cushion-Grip" Handles
- These High Quality Pliers and Cutters are Featured In Xcelite® Attachê Tool Cases
- Note: When Using Cutting Pliers Always Wear Safety Glasses To Protect Eyes From Wire Clippings

Hard Wire (Piano and Music) Cutter — 134CG



- Captures Material On Both Sides Of Jaw, Eliminates Flying Segments
- Patented Spring Loaded Hold-Down Keeps Material At 90° To Tool Blade
- Shear Cutting Action
- Ensures Square Cut Ends
- Prevents Material From Forcing Jaws Apart
- Wire Capacity: .062
- Stranded Cable Capacity: 1/16 in.

Series 99® Service Kits

Series 99 service kits and sets are made up primarily of various screwdriver, nutdriver, and other blades which can be used interchangeably in Series 99 handles. All blades are high quality steel, hardened and tempered for optimum performance. Plastic handles have a patented spring device that holds blades firmly, yet permits quick, easy insertion and removal. Regular handles accommodate all blades, single and reversible. Stubby, Tee, and Ratchet handles can only be used with single-end blades.

NOTE: Most of the tubes in this listing were purchased by their generic number from the manufacturer with the best price at the time of purchase. Should you desire a specific manufacturer or quantity pricing, please contact the Allied Facility nearest you at 1-800-433-5700.

Receiving, Industrial, and Special Purpose Tubes

RAYTHEON

With increasing demands on replacement tubes and the need to satisfy those demands becoming increasingly more difficult, we ask that you contact Allied for any requirements you may have. The list below is only a sampling of the many tube types we can supply.

Mfr.'s Type	Tube Type	EACH	
		1-9	10-24
0A2	Volt Regulator	7.31	6.75
0B2	Volt Regulator	7.31	6.75
0D3	Volt Regulator	17.51	16.16
C1K/6014	Thyratron	139.59	130.29
1P39	Photo Tube	102.00	94.50
2D21	Thyratron	8.42	7.77
2X2A	Rectifier	19.04	17.58
C3J/5632	Thyratron	131.40	121.30

LCD Graphics Displays Dot Matrix Modules with Super Twist

Tight dot-to-dot spacing of the displays on a uniform background for excellent readability. All displays include built-in Controller/ RAM (T696C). A 30 suffix indicates transflective, EO suffix on type indicates electroluminescent panel installed (separate inverter required). Both have direct interface to external controller. **Operating Temperature Range:** 0°C to +50°C. CCFL designates Cold Cathode Fluorescent Lamp Backlighting.

LCD Character Displays with Built-in Controller/RAM-STN and TN

Close dot-to-dot spacing for excellent readability. Has 160 alphanumeric characters symbols and 'kana' letters, and 8 custom characters. Direct interface to 4- or 8- bit CPU. 11 control commands. 5 × 7 dot format plus cursor line. **Power:** Single 5 V. **Operating Temperature Range:** 0°C to +50°C. All types except AND241 have Super Twist (ST) and Super Twist with backlighting (ST-LED) options.

Chicago Miniature Lamp

Chicago Miniature Lamp, Inc., an American owned American manufacturer, is proud to offer one of the broadest, most comprehensive lines of miniature lighted components in the industry. Chicago Miniature Lamp supports you with over 80 years of concept design and manufacturing leadership. Chicago Miniature Lamp's vast and intimate knowledge of incandescent lamps, neon lamps, halogen lamps, indicator lights and light emitting diodes (LEDs) can prove to be a valuable technical asset in your product's design and manufacture.

Non-Relampable Indicator Lights

CML Series Cartridge Indicators

Indicators with T-1¾ incandescent lamps for instrumentation, telemetry and EDP equipment. Mount holes 0.375" D (9.53) to 0.219" (5.56) panel thickness. Meet MIL-L-3661. To complete unit, order cartridge holders, mounting clips and connectors separately on page 363.

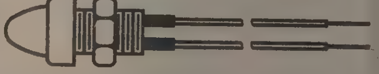
Subminiature Solid-State Indicator Lights



Submidget style with built-in bright LED; 70 viewing angle. Resistant to shock and vibration. Can be powered with low electrical energy supply or driven directly with solid-state circuity. Operates on 1.8 to 2.8VDC. Maximum DC current: 50ma. Mounts in 0.193" (4.90) dia. "D" hole in 0.188" (4.78) thick (max.) panel, on 0.344" (8.74) centers min. 6" wire leads, 105 C PVC insulation.

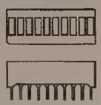
Fig. 7



Lamps use low power for IC compatibility, cool operation and long life expectancy. Shock-proof, solid lens, epoxy construction. Intense light sources available — up to 3000 mcd guaranteed luminosity. Leads are silver plated, eliminating soldering problems. Viewing angles (the angle between points where the light intensity falls to 50% of peak value) are available to 180. Order Panelmount grommets separately at bottom of page.

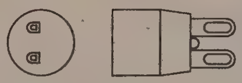
749-1404	CML10-204-1	Flat Solder Lug	**8.46**

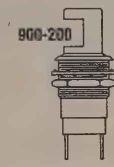


CML Series Indicator Connector

Cartridge indicator terminal pins plug into indicator connector, providing simple installations, changes, replacements. Fits CML series cartridge indicators types CML53, CML 63 and CML64, ordered separately. Sold in multiples of 10.

749-9906. CM21-3 .... **EACH 1.27**

900 Series Instrument Lights



Ideal for panel, switch, meter and legend plate applications where localized light is required. Type 900-200 has fixed hood, solder lug terminals, and mounts hole 0.688" diameter to 0.406" panel thickness. Rated 120 volts, 3 watts. Accepts T-3¹/4 miniature bayonet lamp. Type 900-006 has rotatable hood, screw terminals and mounts hole 1" diameter to 0.500" panel thickness. Rated 250 volts, 1 amp, 75 watts. Accepts S-6 or C-7 candelabra screw base lamp. Order lamps separately.

749-0645. 900-200. Fixed Hood, Solder Lug Terminals .... **EACH 17.44**

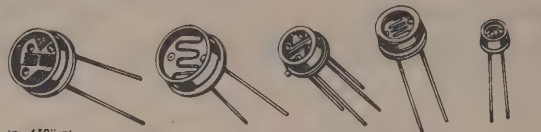
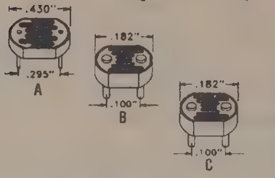
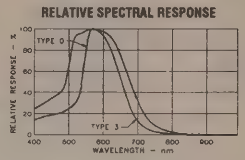
CdS Photoconductive Cells







Photoconductive cells provide a very economical and technically superior solution for many many light level sensing applications. They offer wide dynamic range and sensitivity to low light levels. EG&G Vactec is a major world supplier of photoconductive cells. Vactec's photocells are available in low cost plastic encapsulated packages as well as hermetic packages (TO-46, TO-5, TO-8). The following table lists a few of the standard packages and resistance ranges available.

Electrical/Optical Characteristics @ 25°C (16 Hrs. Light Adapt, Min. @ 30-50 fc)

Stock No.	Mfr.'s Type	Resistance (Ohms) 10 Lux 2850K			Dark		Peak Spectral Response	Sensitivity (γ, typ.) Log (R10/R100) / Log (100/10)	V_{Max} (V, pk)	Response Time @ 1 fc (ms, typ.)		EACH

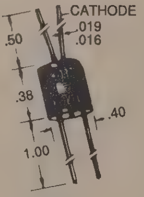
Analog Optoisolators — VACTROLS®



Combine a solid-state light source (LED) with a photoresistor to provide input-output isolation. Sealed in an axial plastic package. Use for photochoppers, linear isolators, SCR and Triac firing, logic circuit inputs, noiseless switching, proportional control circuits. External current limiting resistor required.

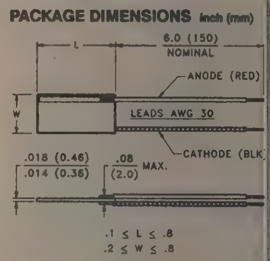
Photodiodes with Solderable Contacts



EG&G Vactec manufactures large area photodiodes with solderable contacts. They serve a variety of applications. Many of our customers have found it cost effective for us to do the value added assemblies, such as PCB assembly and/or custom testing. A sampling of popular solderable contact photodiodes is listed below.

IR Emitters and Phototransistors

EG&G Vactec offers a broad line of high performance IREDs and detectors in a variety of packages and specifications. Vactec makes both GaAs (940 nm) and GaAlAs (880 nm) IREDs. GaAlAs IREDs provide almost twice the power output at the same drive current. These IREDs are often used with solid state phototransistor or photodarlington detectors having internal gains from 100 to over 100,000. A sampling of available standard package styles is listed below.

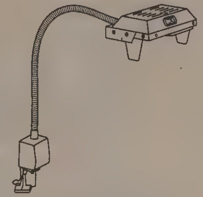
Worklights and Magnifiers

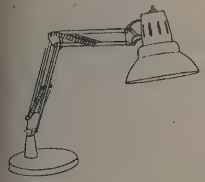
Model 7420 100 Watt Halogen Worklight



- Powerful 100 Watt Halogen Lamp (Included) Produces Crisp, Evenly Distributed Light Over Entire Work Surface
- Rugged Industrial Grade Flexible Steel Gooseneck Reaches a Full 30" In Any Direction
- Features a 700 Watt Convenience Outlet for Use with Other Electric Tools
- Comes with Fully Adjustable Zinc Cast Clamp and 9' 3-Conductor Cord
- Made in USA, UL Listed; Available in Black

593-7420.	7420. 100 Watt Halogen Worklight	EACH 114.00

Model 2225 Universal Desk Lamp



- Portable Work Or Desk Lamp with Heavily Weighted Steel Base
- Heavy Gauge, Hand Spun 6½" Diameter Vented Shade with Porcelain Socket for Use with 100 Watt Incandescent Lamp
- 28" Reach Spring Balanced Feather Touch Articulating Arms
- Made in USA, UL Listed; Available in Black or Beige

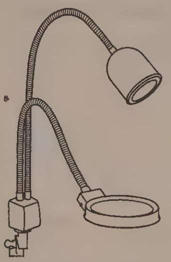
- 5" Diameter 3-Diopter (1.75X) Precision Ground, Distortion Free Glass Lens; for Additional Magnification, Add Mag-3 or Mag-10
- Powerful, 50 Watt Halogen Lamp (Included) Provides Bright, Clear Illumination Over Entire Work Surface
- Magnifier and Halogen Light Are Mounted on Independent Industrial Grade Flexible Steel Goosenecks for Maximum Adjustability
- Heavy Weighted Zinc Cast Base Integrates Safe, Low-Voltage Transformer
- Made in USA, UL Listed; Available in Black

593-7310.	7310. Halogen Dual-Flex Alpha	EACH 121.75

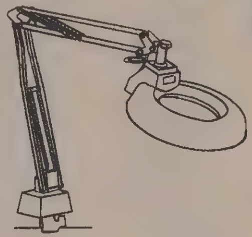
Model 7308 Halogen Long Reach Dual-Flex



- 5" Diameter 3-Diopter (1.75X) Precision Ground, Distortion Free Glass Lens; for Additional Magnification, Add Mag-3 or Mag-10
- Powerful, 50 Watt Halogen Lamp (Included) Provides Bright, Crisp Illumination Over Entire Work Surface for Detailed Inspection
- Magnifier and Halogen Light Are Mounted On Independent, 30" Reach, Industrial Grade Flexible Steel Goosenecks for Maximum Adjustability
- Comes with Fully Adjustable Zinc Cast Clamp and 8' Cord with Convenient Remote Transformer
- Made in USA, UL Listed; Available in Black

593-7308.	7308. Halogen Long Reach Dual-Flex	EACH 146.30

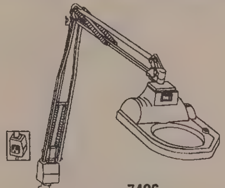
Model 7121 Fluorescent Magnifier



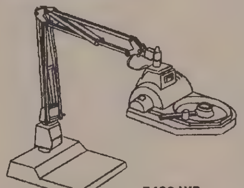
- 5" Diameter 3-Diopter (1.75X) Precision Ground, Distortion Free Glass Lens; for Additional Magnification, Add Mag-3, Mag-8, or Mag-10
- 45" Reach Feather Touch Articulating Arms with Adjustable Tension Control Knobs At All Joints
- Durable, Injection Molded, Scratch Resistant, Polycarbonate Shade
- For Use with Lamp Type 22 Watt Circline, See Accessory Chart to Order
- Comes with Fully Adjustable Zinc Cast Clamp and 9' 3-Conductor Cord
- Made in USA, UL Listed; Available in Black or Beige

593-7121.	7121. Black Fluorescent Magnifier	EACH 114.20
593-7122.	7121. Beige Fluorescent Magnifier	EACH 114.20

Model 7426 and 7426 With Base 100 Watt Halogen Magnifiers



7426



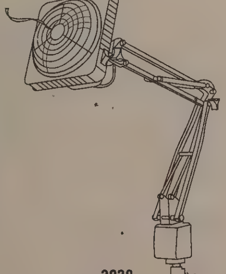
7426 WB

- 5" Diameter 3-Diopter (1.75X) Precision Ground, Distortion Free Glass Lens; for Additional Magnification, Add Mag-3, Mag-8, or Mag-10
- Powerful 100 Watt Halogen Lamp (Included) Produce Crisp, Evenly Distributed Light Over Entire Work Surface for Detailed Inspection
- 45" Reach Feather Touch Articulating Arms with Adjustable Tension Control Knobs at All Joints (30" Reach for with Base Model)
- 3-Position Hi-Lo Switch, Durable, Injection Molded Valox Shade with Built-In Handle for Easy Light Adjustment
- Comes with Fully Adjustable Zinc Cast Clamp or Heavily Weighted Base (with Base Model) and 9' 3-Conductor Cord
- Made in USA, UL Listed; Available in Black

593-7426.	7426. 100 Watt Halogen Magnifier	EACH 162.83
593-7427.	7426. 100 Watt Halogen Magnifier With Base	EACH 197.90

Fans

3037



3038

Model 3037 and 3038 Compact Adjustable Fans

- Powerful, Compact Portable Fan or Fume Remover Measures 7½" × 6"
- Great for Workstations and Desk Tops
- Blows Air at 130 Cubic Ft./Min.
- Ratchet Mechanism for Adjustment of Air Flow Angles
- Extension Arm Model Has 30" Reach and Comes with Fully Adjustable Zinc Cast Clamp

593-3037.	3037. Portable Fan	EACH 32.11
593-3038.	3038. Extension Arm Fan	EACH 103.93

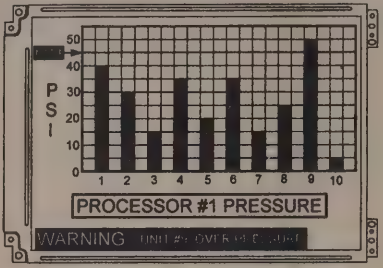
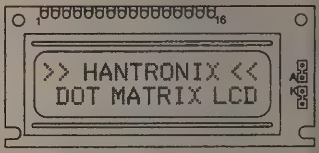
Character and Graphic LCD Modules



Applications

- Portable Computer Terminals
- Telecommunications
- Electronic Calculators
- Display Devices
- Automobile Displays
- Medical Instruments
- Hand Held Instruments



Features

- Very Low Power Consumption
- EL, LED, CCFL Back Lights
- TN, STN, FSTN, DSTN, TFT
- Monochrome or Color
- Sizes from 8 × 1 Characters to 800 × 600 Color SVGA
- Extended Temperature

General Purpose Motion Control ICs

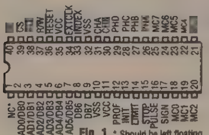

Fig. 1 * Should be left floating.

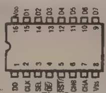

Fig. 2

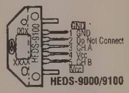
HCTL-1100 is a general purpose motion control CMOS IC that provides closed loop control of DC, DC Brushless, and Step Motors, using a digital incremental encoder for feedback. 5 V operation. TTL compatible. 24 bit position counter. 4 control modes. Programmable digital filter and brushless motor commutator. 40 pin plastic DIP package. **Row Spacing:** 0.600". **Operating Temperature Range:** –20°C to +85°C. HCTL-2000/2016 are CMOS ICs that interface digital incremental encoders to microprocessor systems. The ICs include a 4X quadrature decoder, binary up/down counter, and tristate bus interface. 5 V operation. TTL compatible. Operates at clock frequencies up to 14 MHz. 16 pin plastic DIP package. **Row Spacing:** 0.300". **Operating Temperature Range:** –40°C to +85°C. HCTL-2000 has a 12 bit binary counter, HCTL-2016 has a 16 bit binary counter.

Stock No.	Mfr.'s Type	Fig.	Description	EACH
782-2000	HCTL-1100	1	CMOS Motion Controller 100KHz to 2 MHz clock	40.70
782-2005	HCTL-2000	2	CMOS 12 Bit Quadrature Decoder/Counter	12.75
782-2010	HCTL-2016	2	CMOS 16 Bit Quadrature Decoder/Counter	12.75

Two-Channel Encoder Modules



HEDS9000/9100 are high performance, optical-incremental encoder modules. When operated in conjunction with a codewheel, the modules detect rotary position. **Supply Input:** 5 V. Five 0.025" square pins located on 0.1" centers. **Operating Temperature Range:** –40°C to +100°C. TTL compatible HEDS-5120 are precision metal codewheels for use with the HEDS-9000/9100 encoder modules.

Stock No.	Mfr.'s Type	Optical Radius	Resolution	EACH

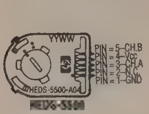
782-2065	HEDS-9100 G00	11 mm	360 cpr	23.67

2 and 3 Channel Encoders



HEDS-5500/5540 are high-performance optical incremental encoders, 2-channel/3-channel digital outputs and single 5 V supply input are accessed through five 0.025" square pins on 0.1" centers. **Operating Temperature Range:** –40°C to +100°C. These series are TIL compatible and no mechanical or electrical adjustments are needed.

For options of various CPR and shaft diameter, please consult Hewlett-Packard OED Motion Control Catalog.

Alphanumeric LED Display

Solid-state alphanumeric LED displays are available in 16 segment monolithic smart, 5 × 7 dot matrix smart, and 5 × 7 dot matrix intelligent versions. Low power on-board CMOS IC contains memory, ASCII decoder and driver circuitry. Dual-in-line (DIP) packaging, TTL compatible, wave solderable and end-stackable. Types HPDL-1414 and HPDL-2416 decode 64 ASCII characters. Types HPLR-, HPLO-, HDLA-, and HDLG-2416 decode 128 ASCII characters. Types HDSP-2110 through -2113 decode 128 ASCII characters, have an on-board RAM that stores up to 16 user-definable characters, and feature flashing characters, full display blinking, multi-level dimming and self test. All of these devices are ideal for a variety of applications in avionics, industrial control and instrumentation.

Solid-state LED numeric displays for applications such as instruments, weighing scales, meters and point-of-sale terminals. Dual-in-line package. Available in character sizes from 7.62mm (0.3") to 20mm (0.8") and colors, red, AlGaAs deep red, high-efficiency red (HER in tables below), yellow and high-performance green, AlGaAs displays are tested and selected for their excellent low current characteristics to ensure that the segments match at low currents. Type numbers ending in "1" are Common Anode; Type numbers ending in "3" and "0" are Common Cathode.

LED light bars designed for fixed message annunciation. All are configured in a dual-in-line DIP package except types HLMP-2300, -2350, -2400, -2450, -2500, -2550 which are SIP packages. Each of the eight X-Y stackable package styles offers one, two or four large, uniformly illuminated light emitting surfaces. 0.100" centers; flush mountable. Available in high-efficiency red, yellow and high-performance green colors. Diffused lens. Ideal use for backlighting legends or simple indicators. For panel and legend mount capabilities, order corresponding part separately in table below. Replace the X in stock number with following color code: 1 (Red), 2 (Yellow), 3 (Green).

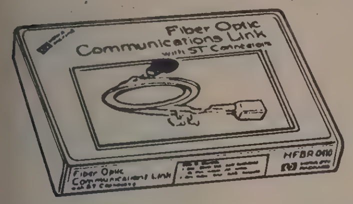
Miniature Link Fiber-Optic Components

Interface directly with industry-standard ST and SMA connectors. Designed for auto insertion and wave soldering. No mounting hardware required. These components provide cost effective, high performance fiber-optic communication links for computers, central office switch, PBX, local area network and industrial-control applications.

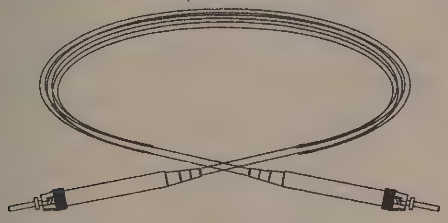
Type HFBR-0410 Miniature Link ST Evaluation Kit



Fiber Optic Communications Link with ST Connectors
HFBR-0410
Fiber Optic Communications Link

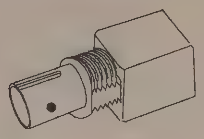
HFBR-0410 ST evaluation kit is used with ST type HFBR-1400 transmitters and type HFBR-241X-T receivers, both of which are listed separately on this page. Kit contains one each of the following: HFBR-1412 transmitter; HFBR-2412 five megabaud TTL receiver; three meters of ST connectored 62.5/125 µm fiber-optic cable with plastic ferrules; HFBR-0400 series data sheets; HP application bulletin 73; ST connector and cable data sheets.
782-2200. Type HFBR-0410.......**EACH 52.45**

Connectored Glass Fiber-Optic Cable for Miniature Link ***— NEW —***



Connectored Simplex cable is constructed of a single graded-index glass fiber surrounded by a silicone buffer, secondary jacket and aramid strength members. The cable is UL-recognized and passes UL VW-1 flame retardant specifications. **Length:** 10 m.
782-2285. Type HFBR-BXS010. ST Connector. 62.5/125 Fiber ....**EACH 136.99**

The Miniature Link Package (HFBR-0300/0400/0600 Series) ***— NEW —***



The Miniature Link family is available with 650-nm, 820-nm and 1300-nm technology. Signal rates range from dc to 175 MBd with distances up to 3 km. This family consists of separate transmitter and receiver ports with standard connectors such as ST™, SMA, SC or FC.

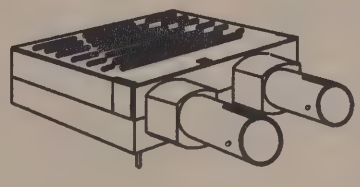
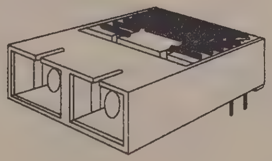
Transceivers and Fiber-Optic Evaluation Kits ***— NEW —***

The 1 × 9 Transceiver Package (HFBR-5100/5200/5300 Series)





The 1 × 9 transceivers are highly integrated devices for duplex links from 10 MBd up to 266 MBd and distances up to 4,000 meters. The "1 × 9" means that they have a footprint of one row of 9 pins. The transceivers are available with duplex-SC or ST™ connectors.

Series 5300E, 5300H, 5302H, and 5308H

- ► Easy to Mount
- ► High Contrast Ratio
- ► Includes Board Standoff to Prevent Flux Entrapment — Permits Easy Washing
- ► TTL Compatible — Requires No External Current Limiting Resistors (Series 5302H-5 V Only)
- ► Housing: Black Nylon UL94V-0

Series 5350T LEDs

- ► Small Size Enables These to be Stacked on 0.100" Center
- ► High-Intensity Light Output
- ► Ideal for Use Where LEDs Must Align with Opening in a Cover Panel
- ► Housing: Black Nylon UL94V-0
- ► Sub-Miniature 2.0 mm LED Right Angle Mounted Simplify PC Board Mounting — Saves Assembly Time and Costs
- ► Low Current — Only 2 mA
- ► Built-in Resistor Chip; Operates at 5 Volts Without External Resistor

Series 5640H Circuit Board Indicators

- ► Quad Assembly With Four T-1¾ LEDs Allowing For Easy Installation — Assures Matched Height and Center to Center Spacing — Reduces Assembly Time and Costs
- ► Low Current — Only 2 mA Available
- ► Super Brite LEDs Feature High Light Output and Diffused Lenses
- ► Standoffs Prevent Flux Entrapment
- ► Housing UL94V-0 Black Nylon

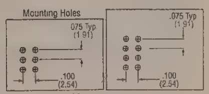
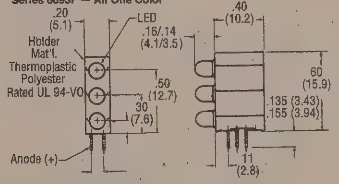
*Super Brite 30 mcd. **Note:** Allied and IDI can also supply the user who may have a special requirement, calling for various color/elec. specs.

PC Board, 3-Up and 4-Up T-1 LED Lamps

High Density — Right Angle Mounting

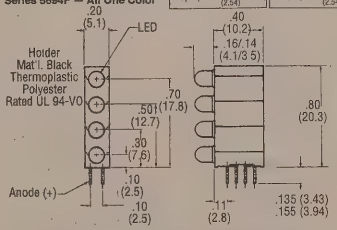


Series 5693F — All One Color



All Dimensions are in Inches (MM)

Series 5694F — All One Color



- ► 3 and 4 T-1 LEDs Stack Mounted in Single Block Saves Space and Assembly Time
- ► Black Plastic Mounting Block for High Contrast Ratio
- ► Colors Can be Mixed and Matched as MFG Specials
- ► High Brite and Super Brite Light Output
- ► Meets UL94V-0 and Bellcore Flammability Specifications
- ► Standoffs Prevent Flux Entrapment

Incandescent and Solid State Indicators

Series 1090 is identical to Series 1050 except these indicators are incandescent and are available in 6, 12, or 28 volt types. Series 1091M is solid state, complete with built-in current limiting resistor and rectifier diode. For solid state lens colors, insert 1-Red, 2-Green, 3-Yellow, where X appears in the stock number. For incandescent lens colors, insert 1-Red, 2-Green, or 3-Yellow, 4-White.

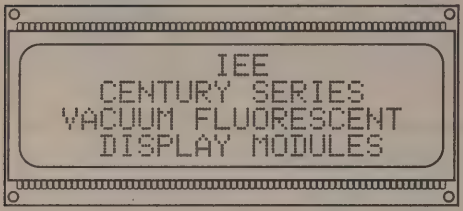
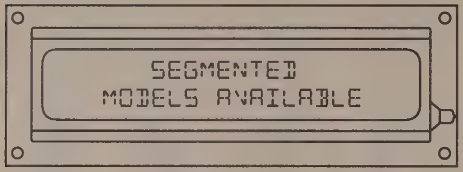
FLIP Century Series™ Premiere Line of Vacuum Fluorescent Display Modules





Software Control Features

- ► Selectable 5 × 7 Dot Matrix Character Sets: ASCII, European, Katakana, Cyrillic and Hebrew (Dot Matrix Units Only)
- ► Segmented Displays Have Standard ASCII 64-Character Set
- ► Ten User-Defined, Downloadable Characters (Dot Matrix Units Only)
- ► Vertical and Horizontal Scroll Modes
- ► Eight Software and Hardware Controlled Dimming Levels
- ► Variable Blink Fields and Rates
- ► Screen Saver Control Mode For Increased Tube Life
- ► Bell Alarm Output (Dot Matrix Units Only)

Key Features

- ► 100% Surface Mount Technology
- ► Low 5 VDC Power
- ► Interface to Intel or Motorola Host Processors
- ► Emulate Hitachi 44780 Data Input (Dot Matrix Units Only)
- ► Parallel 8-Bit or Serial EIA-232 Data to 19.2 Kb
- ► Standard Temperature Range: –20° to +70°C
- ► Extended Range Available: –40° to +85°C
- ► Hardware and Software Self-Test Modes

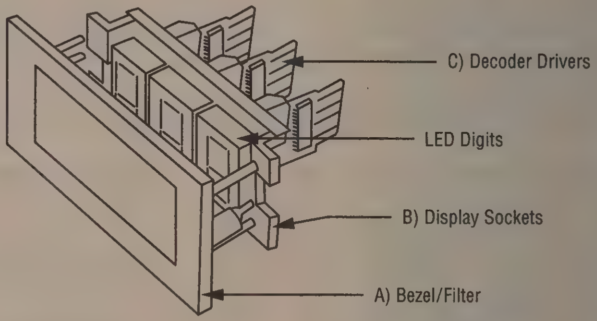
Universal Mount LED Hardware Assemblies

The Universal Mounting Hardware listed below can be used with most manufactured LED digits and can be used to construct three different LED assemblies. Each assembly starts with a socket, which accepts 1 to 8 LEDs of 0.3" or 0.6" pin row spacing. After mounting LEDs on socket, a molded bezel with integral mounting bolts and color filter is attached. This 3-piece LED mounting hardware assembly can be used alone or mounted to a decoder/driver.

For assembly using 0.27" through 0.3" high character, 0.3" standard DIP row spacing LED displays, use one DMH22463 bezel/filter, one DMH22464 socket, 2 to 8 LED displays, DMD1760 decoder/driver (order 1 per LED).

For assembly using 0.4" through 0.43" high character, 0.3" standard DIP row spacing LED displays, use one DMH23441 bezel/filter, one DMH22464 socket, 2 to 8 LED displays, DMD1760 decoder/driver (order 1 per LED).

For assembly using 0.63" through 1.02" high character, 0.6" double DIP row spacing LED displays, use one DMH24036 bezel/filter, one DMH24038 socket, 1 to 5 LED displays, DMD1760 decoder/driver (order 1 per LED).



DMH Series Bezel/Filters (Refer to A on Diagram)

DMH22463R Series Bezel/Filters. Accommodate 0.27" and 0.3" character LED displays.

Lighting Components and Design products cross to all major manufacturers. The listed lampholders and indicator lights are only a sample of some common standard products; we offer other standard and custom products with alternate termination and mountin choices. Call Allied for more information.

Candelabra Bayonet Lampholders for G-6, S-6 and NE-48 Lamps

Series 11-200 Single-Contact, Series 12-200 Double-Contact

- ► **UL Recognized**
- ► **CSA Certified**

11-200 Series. Features one center contact; one #18 AWG 6" wire lead, stripped 1/2"; mounting brackets grounded to shell. Can be supplied with wire grounded to internal spring for customers that need second wire lead for ease of installation. **12-200 Series.** Features two center contacts, two #18 AWG 6" wire leads, stripped 1/2", mounting brackets and wire leads grounded independent of contacts. Plug Button Type Lampholders 11-240 and 12-240 snap into 15/16" hole. **Maximum Ratings:** 11-200 Series — 25 watts, 12 volts; 12-200 Series — 75 watts, 125 volts.

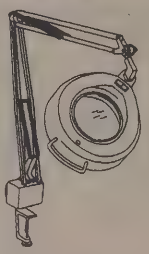
Ledu Taskmaster Magnifiers



- Stamped Metal Shade Houses a 5" Diameter Lens, Available In a 3-Diopter (1.75X) and Includes a 22-Watt Fluorescent Tube
- Swivel Joint in Neck Permits Head to Rotate 90-Degrees to Left or Right of Direction Arm Faces
- A 42" Arm with External Springs Is Mounted in a Drafting Board Style Clamp
- Comes with a 3-Conductor Cord, a Built-In Convenience Outlet (Rated for 600 Watts), and Is UL Listed
- Available in Matte Black or White

Stock No.		Mfr.'s Type	Description	EACH

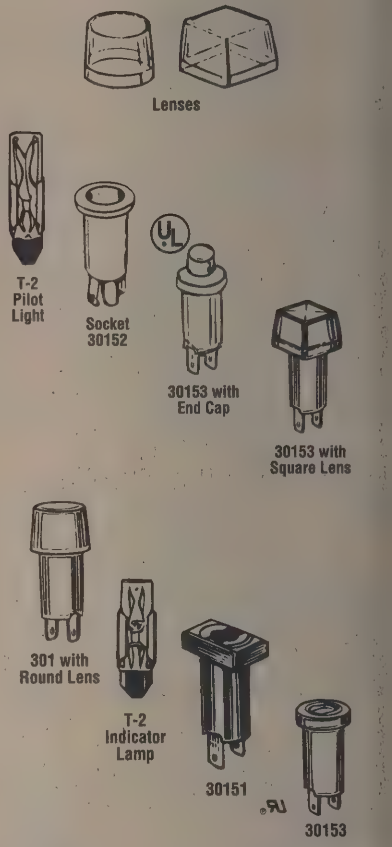
Single Socket Assembly

Three Easy Steps

- ► STEP 1 — Choose Lens or Cap
- ► STEP 2 — Add a Lamp
- ► STEP 3 — Insert into Socket



STEP 1 — Lenses

Lenses, Round and Square

Stock No.	Mfr.'s Type	Description	PER PKG./10	
			1-9	10-49
937-6265	30160	Round, Red	4.80	4.40
937-6275	30170	Square, Red	4.80	4.40
937-6276	30173	Square, White	4.80	4.40
937-6274	30174	Square, Green	4.80	4.40

Note: [1]Polycarbonate end caps are press fit to lamp; cannot be used with lam rated over 1.1 watts. [2]Pyrex end caps must be cemented to the lamp v translucent silicon adhesive.

STEP 2 — Pilot and Indicator Lamps

For Pilot Lamps, select a Fig. 7 lamp from the miniature lamps left. For Indicator Lamps, select a Fig. 9 lamp from the miniatu lamps at left.

STEP 3 — Pilot and Indicator Lamps

Pilot Socket

Dimensions. Round Lens: 0.70" dia × 0.48" high. **Square Le** 0.70" × 0.70" × 0.48" high. **Socket:** 1.31" M.O.L. **Mounting Ho** 0.50" diameter.

Stock No.	Mfr.'s Type	EACH	
		1-99	100-499
937-6152	30152	1.06	.97

Indicator Socket

Dimensions. Round Lens: 0.70" dia × 0.48" high. **Square Le** 0.70" × 0.48" high. **Socket:** 1.14" M.O.L. **Mounting Hole:** .0 diameter. **Material:** Zytol #101.

LED/Photocell Optoisolators

Axial lead LED/CdSe photoresistive cell modules for use as audio limiters, AGC, noiseless potentiometers and analog output circuits. Digital to analog isolation. NSL-32 series also available with radial conversion platform for PCB mounting. Quantity pricing always available.

Planar Photodiodes

Planar, passivated silicon photodetectors designed to operate either in photovoltaic mode or in a reverse-bias mode. Series available in five standard ID sorts. SLD-65 and SLD-87 series are available with isolated case (-J).

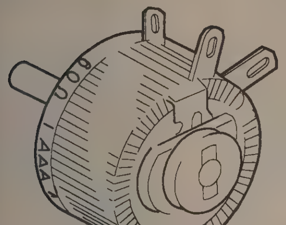
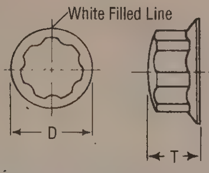
Rheostats and Hardware





Knob No.	Knob Thick. (T)	Knob Dia. (D)
452	7/16	3/4
552	3/4	1 1/2
952	1 1/32	3

These vitreous enameled power rheostats are designed to provide exceptional reliability through the application of modern manufacturing techniques and the use of sophisticated materials. The base and ring are molded of high density ceramic. The winding is uniform to maintain maximum resolution and power dissipation. The insulator is molded of high density, porcelain/ceramic. Three terminals permit use as a potentiometer or a rheostat. Vitreous enamel provides the bonding medium necessary to securely attach the ring and base together and to lock the windings from shifting. 300° rotation. MP06A has 1/8" shaft; MP10A, MP15A, MP25A, and MP30A have 1/4" shaft; MP40A has 3/8" shaft. Standard position for the locating tab is at 6 o'clock with the terminals down. Additional features, wattages, values, and configurations available as custom orders. Manufacturer's literature available upon request.

12.5 Watts 7/8" Dia.

Model 7276
10-Turn Wirewound Potentiometers

The Model 7276 is a 7/8" diameter, 10-turn, wirewound precision potentiometer. They are economical, long lasting and feature a plastic 1/4" dia. shaft is 13/16" long and the plastic 3/8" dia. bushing is 5/16" long. **Rotational Load Life:** 500,000 shaft revolutions + 900 hours at rated wattage at 25°C. Rated 2 watts at 25°C derating to 0 watts at 105°C. **Electrical and Mechanical Travel:** 3600° +10° –0°. **Resistance Tolerance:** ±5%. **Operating Temperature Range:** –25°C to +105°C. **Nominal Weight:** 0.42 oz. Special features such as center tap, linearity tape, shaft lock or tighter tolerances are available as special order items. Manufacturers literature available upon request.

Model 7286
10-Turn Wirewound Potentiometers

The Model 7286 is a 7/8" diameter, 10-turn, wirewound precision potentiometer. These economical, long lasting potentiometers feature a rotational load life of one million shaft revolutions + 900 hours at rated wattage at 70°C. The metal 1/4" dia. shaft is 13/16" long with a metal 3/8" dia. bushing that is 5/16" long. Rated 2 watts at 70°C derating to 0 watts at 125°C. **Electrical Travel:** 3600° +10° –0° > 100 ohms; 3600° +10° –5° ≤ 100 ohms. **Mechanical Travel:** 3600° +15° –0°. **Resistance Tolerance:** ±5%. **Static Operating Temperature Range:** –55°C to +125°C. **Dynamic Operating Temperature Range:** –40°C to +125°C. **Nominal Weight:** 0.75 oz. Special features such as center tap, linearity tape, rear shaft extension, flatted shaft, shaft lock, high torque, or dual ganged are available as special order items. Manufacturers literature available upon request.

Model 7486
5-Turn Wirewound Potentiometers

The Model 7486 is a 7/8" diameter, 5-turn, wirewound precision potentiometer. These economical, long lasting potentiometers feature a rotational load life of 500,000 shaft revolutions + 900 hours at rated wattage at 70°C. The metal 1/4" dia. shaft is 13/16" long with a metal 3/8" dia. bushing that is 5/16" long. Rated 1.5 watts at 70°C derating to 0 watts at 125°C. **Electrical Travel:** 1080° +10° –0° > 100 ohms; 1080° +10° –5° ≤ 100 ohms. **Mechanical Travel:** 1080° +15° –0°. **Resistance Tolerance:** ±5%. **Static Operating Temperature Range:** –55°C to +125°C. **Dynamic Operating Temperature Range:** –40°C to +125°C. **Nominal Weight:** 0.75 oz. Special features such as center tap, linearity tape, rear shaft extension, flatted shaft, shaft lock, high torque, or dual ganged are available as special order items. Manufacturers literature available upon request.

Model 8146
10-Turn Hybrid Potentiometer

The Model 8146 is a 7/8" diameter, 10-turn, hybrid precision potentiometer and position sensor. These economical, long lasting potentiometers feature a rotational load life of 5 million shaft revolutions + 900 hours at rated wattage at 70°C. The metal 1/4" dia. shaft is 13/16" long with a metal 3/8" dia. bushing that is 5/16" long. Rated 2 watts at 70°C derating to 0 watts at 125°C. **Electrical Travel:** 3600°. **Mechanical Travel:** 3600° +15° –0°. **Resistance Tolerance:** ±10%. **Operating Temperature Range:** –55°C to +125°C. **Nominal Weight:** 0.75 oz. Special features such as center tap, linearity tape, rear shaft extension, flatted shaft, shaft lock, high torque, or dual ganged are available as special order items. Manufacturers literature available upon request.

Model 6187
Single-Turn Conductive Plastic Potentiometers

The Model 6187 is a 7/8" diameter, continuous rotation, single-turn, conductive plastic precision potentiometer and position sensor. These economical, long lasting potentiometers feature a rotational load life of 5 millions shaft revolutions. The metal 1/4" dia. shaft is 7/8" long with a metal 3/8" dia. bushing that is 3/8" long. Rated 1 watt at 70°C derating to 0 watts at 125°C. **Electrical Travel:** 340°. **Mechanical Travel:** 350°. **Resistance Tolerance:** ±10%. **Static Operating Temperature Range:** −65°C to +125°C. **Dynamic Operating Temperature Range:** −40°C to +125°C. **Nominal Weight:** 0.53 oz. Special features such as center tap, slotted or flatted shaft, linearity tape, shaft lock and a stop are available as special order items. Manufacturers literature upon request.

Model 7246
10-Turn Wirewound Potentiometers

The Model 7246 is a 7/8" diameter, 10-turn, wirewound precision potentiometer. These high precision, long lasting potentiometers feature a rotational load life of 1 million shaft revolutions. The metal 1/4" dia. shaft is 13/16" long with a metal 3/8" dia. bushing that is 5/16" long. Rated 2 watts at 25°C derating to 0 watts at 85°C. **Electrical and Mechanical Travel:** 3600° +10° −0°. **Resistance Tolerance:** ±5%. **Operating Temperature Range:** −25°C to +85°C. **Nominal Weight:** 1.25 oz. Special features such as linearity tape, shaft lock, center tap, rear shaft extension and flatted shaft are available as special order items. Manufacturers literature available upon request.

Model A
10-Turn Wirewound Potentiometer

The Model A is a 1 13/16" diameter, 10-turn, wirewound precision potentiometer. These precision, long lasting potentiometers feature a rotational load life of 2 million shaft revolutions + 900 hours at rated wattage at 40°C. The metal 1/4" dia. shaft is 13/16" long with a metal 3/8" dia. bushing that is 5/16". Rated 5 watts at 40°C derating to 0 watts at 85°C. **Electrical and Mechanical Travel:** 3600° +4° −0° **Resistance Tolerance:** ±5% < 100 ohms; ±3% ≥ 100 ohms. **Static Operating Temperature Range:** −65°C to +85°C. **Dynamic Operating Temperature Range:** −40°C to +85°C. **Nominal Weight:** 4.40 oz. Special features such as linearity tape, shaft lock, center tap, rear shaft extension, color coded, slotted shaft, flatted shaft, shaft lock, and dual or triple ganged units are available as special order items. Manufacturers literature available upon request.

Model C
3-Turn Wirewound Potentiometer

The Model C is a 1 13/16" diameter, 3-turn, wirewound precision potentiometer. These precision, long lasting potentiometers feature a rotational load life of 2 million shaft revolutions + 900 hours at rated wattage at 40°C. The metal 1/4" dia. shaft is 13/16" long with a metal 3/8" dia. bushing that is 5/16" long. Model 64 Series 1/4" Sq. Multi-Turn Trimmer

The Model 64 is a 15-turn cermet trimming potentiometer. These essentially infinite resolution trimmers are 1/4" square. They are 1/4-watt at 85°C derating to 0 at 125°C. The metal electrical adjustment screw has a slot .02" wide × .02" deep. **Standard Tolerance:** ±10%. They are sealed to have no leaks in 85° Florinert® test. **Maximum Temperature Coefficient:** ±100 ppm/°C. **Operating Temperature Range:** –65°C to +150°C. **Rotational Life:** 200 cycles. **Load Life:** 1000 hours at 85°C at 0.25 watts. Clutch action mechanical stops at both ends. Solderable terminal pins. **Resistance to Solder Heat:** 260°C for 10 seconds. **Nominal Weight:** .014 oz. Additional pin configurations available as special order item. Manufacturer literature available upon request.

The Model 78 is a 22-turn cermet trimming potentiometer. These essentially infinite resolution trimmers are 1¹/4" rectangular. They are 1-watt at 70°C derating to 0 at 125°C. The metal electrical adjustment screw has a slot .025" wide × .031" deep. **Standard Tolerance:** ±10% (< 100 ohms = ±20%). They are sealed to have no leaks in 85° Florinert® test. **Maximum Temperature Coefficient:** ±100 ppm/°C. **Operating Temperature Range:** –55°C to +125°C. **Rotational Life:** 200 cycles. **Load Life:** 1000 hours at 70°C at 0.5 watts. Clutch action mechanical stops at both ends. Solderable terminal pins. **Resistance to Solder Heat:** 260°C for 10 seconds. **Nominal weight:** .09 oz. **56BW** adapter is used for panel mounting the **78 Series**. Additional pin configurations available as special order item. Manufacturer literature available upon request.

These single turn cermet trimmers are 3/8" square in a variety of lead styles. They are 1/2-watt at 85°C derating to 0 at 125°C. The flush electrical adjustment is .13" long × .03" wide × .038" deep. **Actual Electrical Travel:** 244°. Essentially infinite resolution. **Standard Resistance Tolerance:** ±20% < 10 ohms and ±10% ≥100 ohms. They are sealed to have no leaks at 85° Florinert®. **Maximum Temperature Coefficient:** ±100 ppm/°C. **Operating Temperature Range:** –55°C to +125°C. **Rotational Life:** 200 cycles. **Load Life:** 1000 hours at 70°C at 0.5 watts. Solid mechanical stops. **Resistance to Solder Heat:** 260°C for 10 seconds. **Nominal Weight:** .025 oz. Optional adjustment knob is available as a special order. Manufacturer literature available upon request.

Model 66 Series 3/8" Sq. Multi-Turn Trimmer

The Model 66 is a 20-turn cermet trimming potentiometer. These essentially infinite resolution trimmers are 3/8" square. They are 1/2-watt at 70°C derating to 0 at 125°C. The metal electrical adjustment screw has a slot .02" wide × .025" deep. **Standard Tolerance:** ±10% (< 100 ohms = ±20%). They are sealed to have no leaks in 85° Florinert® test. **Maximum Temperature Coefficient:** ±100 ppm/°C. **Operating Temperature Range:** –65°C to +150°C. **Rotational Life:** 200 cycles. **Load Life:** 1000 hours at 70°C at 0.5 watts. Clutch action mechanical stops at both ends. Solderable terminal pins. **Resistance to Solder Heat:** 260°C for 10 seconds. **Nominal Weight:** .04 oz. Additional pin and adjustment configurations available as special order item. Manufacturer literature available upon request.

Model 93 Series Single Turn Trimmer

These single turn cermet trimmers are 1/2" in diameter with a solderable PC Pin lead style. They are 1-watt at 70°C derating to 0 at 125°C. The arrow slot is .25" long × .03" wide × .035" deep. The arrow is used to indicate slider position. The arrow and graduations are in contrasting colors for easy readability. **Actual Electrical Travel:** 270°. Essentially infinite resolution. **Standard Resistance Tolerance:** ±10% (<100Ω ±20%). They are sealed to have no leaks at 85° Florinert® test. **Maximum Temperature Coefficient:** ±100 ppm/°C. **Operating Temperature Range:** –55°C to +125°C. **Rotational Life:** 200 cycles. **Load Life:** 1000 hours at 70°C at 1-watt. Solid mechanical stops. **Resistance to Solder Heat:** 260°C for 10 seconds. **Nominal Weight:** .052 oz. Manufacturer literature available upon request.

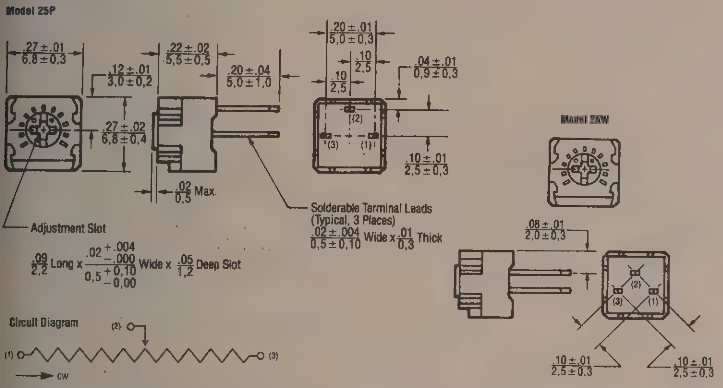
Model 25 Series Single Turn Trimmer



These single turn cermet trimmers are 1/4" square with a solderable PC Pin lead style. They are 1/2-watt at 70°C derating to 0 at 125°C. The flush adjustment slot is .09" long × .02" wide × .05" deep and is blade or Philips screwdriver adjustable. **Actual Electrical Travel:** 210°. Essentially infinite resolution. **Standard Resistance Tolerance:** ±20%. They are sealed to have no leaks at 85° Florinert® test. **Maximum Temperature Coefficient:** ±100 ppm/°C (<200 ohms = ±250/ppm/°C). **Operating Temperature Range:** –55°C to +125°C. **Rotational Life:** 100 cycles. **Load Life:** 1000 hours at 70°C at 1/2-watt. Solid mechanical stops. **Resistance to Solder Heat:** 260°C for 10 seconds. **Nominal Weight:** .01 oz. Manufacturer literature available upon request.

Absolute Contacting Encoder (ACE)

— NEW —

- Elimination of the A/D Converter That Is Required with a Potentiometer
- Compact, Robust Design in 22 mm Package
- Simplified Design — Single-Track Gray Code
- Detented Lower Resolutions Could Be Used As Function Control Switches
- Ability of the Component to Retain Position If a Power Failure Occurs

The new absolute contacting encoder is an absolute position input device. It is an absolute encoder implemented in a contacting technology. It offers 128 unique angular positions that are directly converted to an 8-bit binary output housed in a low cost, low profile package. The special feature is that they assign a unique, digitally encoded signal to each measured increment which prevents erroneous readings. For example, if a power failure or transient malfunction occurs, the position can be read when the power is restored without moving back to a reference position, as would be required with an incremental encoder. The absolute digital output simplifies the electronic circuit by allowing the microprocessor to be directly linked to the ACE encoder. Because the ACE encoder offers a unique absolute output from a single track, the resulting lower sample rate requires much less microprocessor time, resulting in lower overall power consumption. **Specifications. Output:** 8-bit gray code with 128 absolute states. **Closed Circuit Resistance:** 5 ohms max. **Open Circuit Resistance:** 100 K ohms minimum. **Electrical Travel:** Continuous. **Contact Bounce (60 RPM):** 2.7 milliseconds max. **RPM (Operating):** 120 max. **Rotational Life:** 25,000 shaft revolutions. **Mechanical Angle:** Continuous. **Weight:** Approx. 0.5 oz.

EC Encoders — Incremental Digital Contacting Encoder

The sturdy construction and exceptionally long life of the digital contacting encoder make it a good choice where reliability and dependability are required. The EC encoder produces a 2-channel, 2-bit gray code quadrature signal which is suitable for digital systems where both magnitude and direction of adjustment must be provided. Channel A leads Channel B by 90° (electrical) with clockwise rotation. The output of this device is a digital gray code signal, rather than a conventional potentiometric voltage ration output. The advantage of the digital contacting encoder is that it permits the direct entry of digitized analog data into a digital circuit without A/D conversion. The 2 channel gray coded signal of this incremental encoder allows the user's decode circuit to sense analog direction of rotation as well as up-down counter capabilities. This is done without the time and cost of A/D conversion. This approach can reduce memory overhead, wiring and wiring interconnects, and can provide greater MPU program speed. Electrical travel and mechanical angle are continuous. **Weight:** 0.75 oz. Additional configurations available as special order. Call for pricing, delivery and ordering conditions. Manufacturer literature available upon request.

- Miniature Package for Design Flexibility
- Long Operating Life
- Conductive Plastic Element

The 9 mm square model 3315 is a sealed encoder with bushing or PC board mount. The -001 has a plastic bushing and the -002 has a metal bushing. **Electrical Output:** 2-bit gray code, channel A leading channel B turning clockwise at 6 PPR (pulses per revolution). The plastic shaft is 12.7 mm FMS. **Contact Bounce (15 RPM):** 5 ms max. **Closed Circuit Resistance:** 2 ohm max. **Open Circuit:** 100 K ohms min. Continuous electrical and mechanical travel. **Temperature Rating:** –55°C to +125°C.

3310

3310 Series — 9 mm Square Sealed Panel Controls

This single turn linear conductive plastic panel control uses compact size to save board and panel space. The control may be panel mounted with the threaded bushing or PC board mounted using the PC pins. Sealed to withstand typical industrial washing processes. 0.25-watt power at 70°C. **Tolerance:** ±20%. Request manufacturer's literature describing other options including mounting details and multiple functions such as switching.

Modular Potentiometers

Model 81. Combines design versatility and advanced modular construction with factory assembled reliability and quality assurance. The net result is a consistently high quality ⅝" square panel control. **Temperature Range:** –55°C to 125°C. **Temperature Coefficient:** ±1000 ppm/°C. **Running Torque:** 0.2 to 1.5 oz.-in. 1000 VAC dielectric with standing voltage @ sea level. **Minimum Resistance:** 2 Ohms. **Infinite Resolution:** Single Turn.

Model 83/84. The only 10 turn precision modular control in the industry. **Resistance Tolerance:** ±5%. 1000 VAC dielectric withstanding voltage @ sea level. **Temperature Range:** –55°C. to 125°C. **Temperature Coefficient:** ±50 ppm/°C. **Load Life:** 1000 hrs. Moisture resistant. Compatible with all Model 80 Series. Resistance value available only up to 10K.

Model 91. Construction features include a one-piece molded shaft and rotor. The one-piece rotor shaft provides virtually infinite electrical circuit isolation. **Temperature Range:** –55°C to +125°C. **Temperature Coefficient:** 1000 ppm/°C. **Load Life:** 1000 hrs. 1000 VAC dielectric withstanding voltage @ sea level.

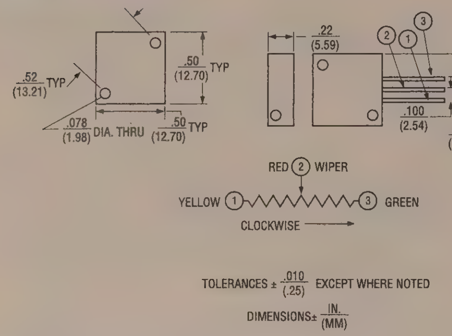
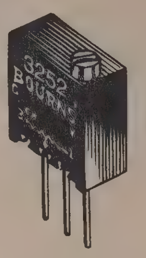
Models RJ22/3252 Multi-Turn, Cermet





Stable, infinite resolution cermet element. Listed on the DESC QPL for style RJ22 pe MIL-R-22097. Low temperature coefficient ±100 ppm/°C over entire temperature and resistance range. High temperature, all plastic case. Superior humidity-proof performance under the most severe conditions. **Temperature Range:** –65° to +150°C. **Power Rating:** .75 Watt at 85°C. **Resistance Tolerance:** ±10%.

This 1/4" square trimming potentiometer is ideal for industrial applications. It is sealed to withstand harsh environments and immersion cleaning processes. The rotor is designed for automatic machine adjustment interface. The miniature package saves space on the circuit board. **Resistance Tolerance:** ±10%. **Rated:** 0.5 watt @ 70°C. **Temperature Range:** −55°C to +125°C. **Temperature Coefficient:** ±100 ppm/°C. **Mechanical Angle:** 270°. Terminals are solderable pins. **Rotational Life:** 200 cycles.

MIL JA1N/JA1L Carbon Potentiometers

— NEW —

Type J hot-molded carbon composition potentiometers are used in industrial and military applications for reliable, dependable and exceptional service requirements. Meet MIL-R-94. JA1N Series has 3/8" bushing length with 1/4" dia., 7/8" long slotted shaft. JA1L Series has 1/2" bushing with 1/4" dia., 5/8" long slotted shaft. They are dust, corrosion and splash resistant. Made of non-magnetic material. Coated terminals. **Tolerance:** 10%. Linear taper. 2.25 watts. 100,000 rotations cycle life. Supplied with locating pin and hardware.

MIL-R-94 RV4 2-Watt and Commercial 53C Series Conductive Plastic Potentiometers

Crafted of the finest materials available to insure long, reliable service. Provides extra long life with very low noise level. Rated 2 watts. Precision construction is completely enclosed. Conductive plastic element. RV4L and 53C2 designate 5/8" screwdriver slotted shaft FMS with 1/2" split locking bushing. RV4N and 53C3 designate 7/8" screwdriver slotted shaft FMS with 3/8" long bushing. 53C1 designates 2" long round shaft FMS with 3/8" long bushing. All have 1/4" diameter shaft. **Average Shipping Weight:** 4 oz.

Specifications. Resistance Tolerance: 100 to 1 Meg — ±10%; over 1 Meg — ±20%. **Rotation:** 312° ±3%. **End Resistance:** Per MIL-R-94. **Working Voltage:** 500 VDC across end terminals. Linear Taper. **Tolerance:** ±20%.

RV6/392M Series 1/2-Watt MIL Potentiometers

Military Potentiometer. 1/2-watt conductive plastic. Economical sealed potentiometers meet the flow solderability and washability test requirements, and MIL-R-94 apply where appropriate. QPL listed. Highly stable unit with high resolution for applications requiring miniaturization and reliability. 1/8" dia. metal shaft (7/8" long STD; 5/8" long on locking). 1/2" body diameter. **Dynamic Noise:** 1.5%. **Rotational Life:** 50,000 cycles. **Operating Temperature:** –40° to +120°C. Other shaft lengths and styles, tolerances and tapers, resistance values and bushings available as special order items.

Specifications. Resistance Tolerance: ±10%. **Power Rating:** 0.5 watt @ 70°C. Derated to zero power @ 120°C. **Electrical and Mechanical Rotation:** 295° ±5°. **Effective Rotation:** 265° +0° –10°. **End Resistance:** 5 max. — up to 750; 10 max. — above 750. **Functional Output:** Linear. **Dielectric Strength:** 750 VAC for 60 seconds @ ATM; 350 VAC for 60 seconds. 3.44 in H.G. **Working Voltage:** 350 VDC maximum, but power not to exceed rating. Available with standard or locking type bushing. RV6L — locking bushing; RV6N — standard bushing.

Series 43 2-Watt Wirewound Potentiometers

— NEW —

The Series 43 wirewound potentiometers are both economical and versatile. The 43C1 has a 1/4" diameter, 2" long FMS shaft in a 3/8" long bushing with 3/8-32-NEF-2A threads. The 43C2 has a 1/4" diameter, 5/8" long FMS screwdriver slotted shaft in a 1/2" long split locking bushing with 3/8-32-NEF-2A threads. **Specifications. Electrical and Mechanical Rotation:** 300°±5°. **Resistive Tolerance:** ±10%. **Operating Temperature Range:** –55°C to +105°C. Hardware not supplied.

Series 58 4-Watt Wirewound Potentiometers

58C Series potentiometers are an industrial grade 4-watt potentiometer. 58C1 Series has 1/4" dia., 2" long round shaft FMS with 3/8" long bushing with 3/8-32 NEF-2A threads. 58C2 Series has 1/4" dia., 5/8" long screwdriver slotted shaft FMS with 1/2" long split locking bushing with 3/8-32 NEF-2A threads. **Specifications. Operating Temperature:** –55°C to +105°C. **Tolerance:** 5%. **Standard Effective Rotation:** 280°. **Electrical Rotation:** 300°. Hardware not supplied.

308/309/408/409 Series Potentiometers

The 308 and 309 series potentiometers are high performance, low cost potentiometers. The 408 and 409 series are high performance potentiometers designed for wave soldering applications for mounting to PC boards. The 308 and 408 are 0.5 watt with conductive plastic element and the 309 and 409 are 1.0 watt with thick film cermet element. All feature a compact 1/2" miniature, modular size. They are cost effective with design simplicity through fewer component parts. Horizontal or vertical mounting with support plates. Nickel-plated brass shaft and bushings in various diameters and lengths. Insert molded gold plated terminals for strength. The conductive element is precision made using screen printed conductive elements. The stability for the 308 and 408 series is –40° to +150°C. Both the 308 and 309 have solvent resistant housing, but are not immersion sealed. Both the 408 and 409 have O-ring shaft seal and the entire unit is sealed for wave solder and wash processing. 295° ±5° electrical rotation. 350 VDC across end terminals, but power not to exceed rating. N=non-locking 1/4" dia. × 1/4" long bushing with 1/8" dia. × 3/4" long (FMS) slotted shaft. L= locking 3/8" dia. × 1/4" long bushing with 1/8" dia. × 7/16" long (FMS) slotted shaft. NS = S.P.D.T. rotary switch. PPS = push-pull S.P.D.T. switch. 309 for 409 locking bushing available as special order. Also available as special order with S.P.S.T. or S.P.D.T. switches up to three multiple sections, log tapers and reverse log tapers.408 and 409 available with PC pins as special order. Call Allied for price and delivery info on custom parts. Manufacturers literature and catalog available on request.

Claroknobs

JD

DD

DDS

HD

The Claroknob is a high quality knob fabricated from machined aluminum. Manufactured to enhance products, the Claroknob comes is a variety of styles for your requirements. HD series is a control knob with a sawcut indicator. JD series is a straight knurl with top and side indicator. DD series is a straight knurl with side indicator. The DDS series is a straight knurl with arrow on skirt. Stainless-steel setscrews are standard. One setscrew for HD series and two setscrews for JD, DD, DDS series. For use with 1/8" or 1/4" diameter shafts. Anodized in clear or black, gloss or matte finishes.

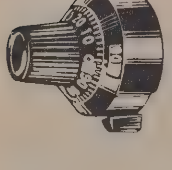
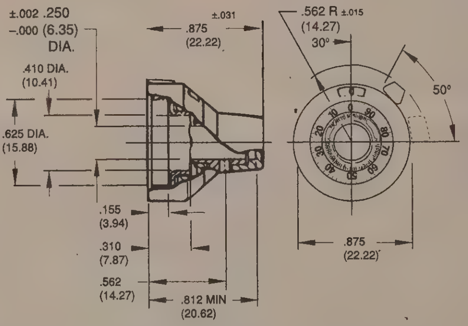
*NOTE: To complete stock number replace the letter with the number of the option desired. For X: 5=1/4" shaft; 6=1/8" shaft. For Y: 1=Clear, 2=Black, 3=Matte Clear, 4=Matte Black.

Clarodials





A high quality concentric scale dial designed to be used in conjunction with the **73JB** multiturn potentiometer, the series **316** is available in clear brushed metal design or black anodized metal with white numerals at slightly higher cost. Price inducements are available when the **73JB** and **316** dial are purchased together as a set.

Readout and Operation: Unit shall register a total count of 15 turns. The number in the window (0-14) indicates completed number of turns of the drive sleeve. Graduated circular dial indicates the percent of a partial turn of the drive sleeve. **Transfer Point:** The number in center of window shall change as graduated dial rotates between 94 and 0. **Rotation:** Readout shall increase with clockwise and decrease with counterclockwise rotation. **Brake Lever Operation:** 1st Position (15° movement of Brake Lever) operates a high torque system for fine adjustment; 2nd Position (15° additional movement of Brake Lever) actuates brake. **Accuracy:** Backlash shall be zero between graduated dial and drive sleeve. **Mounting:** Install mounting bracket between panel and panel nut. Clarodial shall mount directly to shaft with No. 2-56 spline socket set screw, located adjacent to No. 50 on graduated dial. **Numeral Size:** 0.075 high. **Graduation Size:** Numeral graduations .045 long (1,14) intermediate graduations .030 long (0.76). **Finish:** Exposed metal parts–Brushed metal finish; Turning knob and brake lever knob–Black plastic. **Numerals:** Graduated Dial–black; Turns Counter–white on black background. **Weight:** 0.7 oz. max. (19.84 gm).

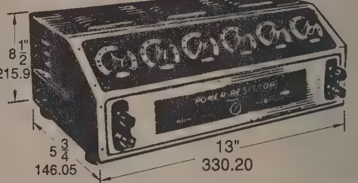
Resistor Decade Box



- ► **1 to 999,999 Ohms in One-Ohm Intervals**
- ► **Terminals Accept 3 Kinds of Connections**
- ► **Dissipates Up to 225 Watts**
- ► **Wirewound Resistors Used Throughout**

Model 240-C Bench Type
Allows selection of any value from 1 to 999,999 ohms in one-ohm increments. Six dials read Rx1, Rx10 Rx100, Rx1 K, Rx10 K and Rx100 K for quick setting and quick readout. Dissipates up to 225 W; max VDC 1000, or 660 VAC per decade, 2% tol. except Rx1 decade, 5%. Max. current rate range from 5 A fo Rx1 to .005 A for Rx100 K. Rugged, long-lasting wirewound power resistors used throughout. Two sets of terminals accept any of the following: banana plugs, spade lugs or plain wire connections. 8 1/2" × 13" × 5 3/4". **Shipping Weight:** 1 3/4 lbs.

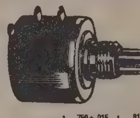
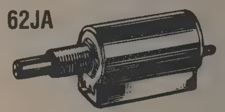
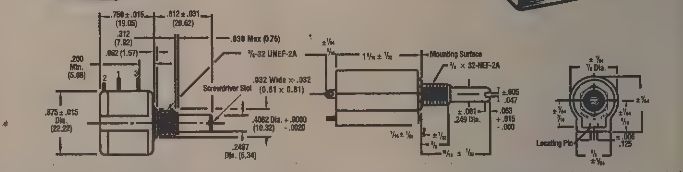
2 Watt Wirewound Precision 10-Turn Potentiometers

73JA/73JB



62JA





The 73 series is a 2-watt precision 10-turn potentiometer. The 73JB is the economical version of th 73JA, offering all the electrical features of the 73JA, but employing a long life nylon shaft constructio The 73JB has a metal bushing with glass filled black nylon shaft. The 73JA has a stainless steel sha and metal bushing. Both shafts are 1/4" dia, 13/16" long FMS and have 5/16" plain threaded bushing screwdriver slots, and 50,000 cycles rotational life. End resistance is 0.3% of total resistance or 1Ω whichever is greater. 5% tolerance. 500 WV max. **To complete stock number, see table B.**

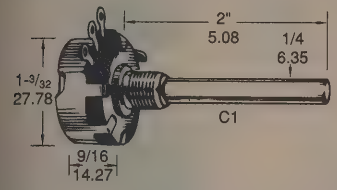
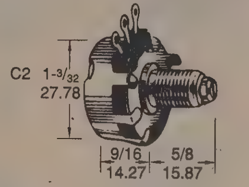
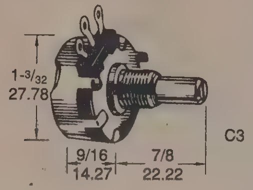
2-Watt Series 380 Thick Film Conductive Plastic Called the "Quiet Ones"







These quiet, precision-made potentiometers are made by a controlled process that virtually insures a reliable, homogeneous and strain-free resistance element with 1% dynamic noise and 5% independent linearity. All have stainless steel shafts. **Type C1** has 2" round shaft FMS. 3/8" long bushing with 3/8" × 32. NEF-2A thread.

Type C2 has 5/8" screwdriver slotted shaft FMS with a 1/2" split locking bushing. **Type C3** has 7/8" screwdriver shaft FMS 3/8" long bushing with 3/8" × 32-NEF-2A thread. **Resistance Tolerance:** up to 1 megohm ±10%, above ±20%. **Dielectric Strength:** 1000 VAC. **Weight:** 1 oz.

Series 392 Immersible 0.5 Watt Potentiometers

Economical potentiometer designed to meet wave soldering applications for mounting to PC boards. Meets flow solderability and washability test requirements. MIL-R-94 standards apply where applicable. **Resistance Tolerance:** Linear, up to 1 Meg ohm ±10%, above 1 Meg to 5 Meg ±20%. Tapers, up to 250K ±10%, above 250K to 5 Meg ±20%. **Resistance Range:** 100 ohm to 5 Meg ohm, linear; 500 ohm to 2 Meg ohm, tapered. **Power Rating:** 0.5 watt maximum continuous power rating for linear taper, but voltage not to exceed rating. **Working Voltage:** 350 VDC across end terminals, but power not to exceed rating. **Linearity:** ±5% Independent. **Torque Range:** .20 to 2.0 oz. in. **Shafts, Standard:** .125 dia. **Solvent Resistance:** Housing resistant to trichlorethylene, chlorethene, NU Freon TMS, Freon TMC, carbon tetrachloride, toluene, MEK ethyleacetate and gasoline.

Series CR Rheostats

The CR series of rheostats is ideal for use over long periods of time. Features vitreous enamel to bond the core and base, wiper tracks are buffered to assure smooth rotation and uniform contact, three terminals for potentiometer applications, and minimum backlash. The series is made in accordance to MIL-R-22. The 25 and 50 watt models are UL approved. The 12.5 watt units are not UL approved. ±10% resistance tolerance. High strength ceramic hub insulates the shaft and bushing from all line parts.

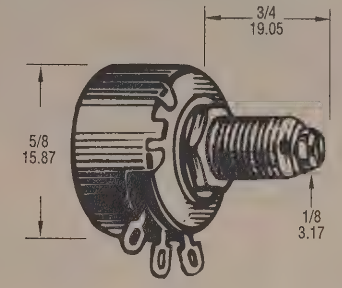
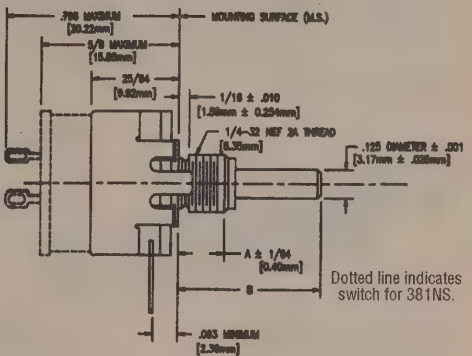
Series 381
1-Watt 5/8" Diameter Thick Film Conductive Plastic



381L



Dotted line indicates switch for 381NS.

381N, 381NS, 381NZ

- ► **Precision Machined from Corrosion Resistant and Non-Magnetic Materials**
- ► **Rotational Life 100,000 Cycles Under Load**
- ► **Homogeneous, Strain-Free Thick-Film Resistance Element with 1% Dynamic Noise, 5% Independent Linearity**
- ► **Meets Stringent MIL-R-94 Specifications**

381N has plain 1/4" long bushing with 1/4-32NEF-2A thread and 1/8" dia. 3/4" (FMS) long shaft. 381L is a locking bushing that has 3/8" long bushing with 1/4-32NEF-2A thread and long 1/8" dia. 7/16" (FMS) shaft. D381 is the same as the 381N but is dual ganged using the same resistance value for both sections. Dimensions are the same as 381N except total depth is 49/64" (±1/32). 381NS is the same as the 381N except it includes a factory attached SPST switch (1 A, 125 V AC/DC). 381N-Z is the same as the 381N except using a Z-taper. Dust and splash proof housing. Cover is sealed to base with epoxy seal. Terminals are molded into base and sealed for solderability per MIL-STD-202, Method 208B. **Resistance Tolerance:** ±10% through 500 K; ±20% above 500 K.

Clarotrim Trimmers

- **Superior Setability and Stability**
- **Temp. Coeff. of ±100% PPM/°C**
- **CRV of 3% or 3Ω**
- **Sealed for Cleaning in Common Solvents**

Specifications. Per MIL-R-22097 where (para.) is noted. **Series 335.** 0.5 Watt. Single turn. **Tolerance:** ±10%. **Effective Travel:** 230° nominal. **Weight:** .03 oz. **Series 343P.** Low profile, .5 Watt. Rectangular cermet. **Effective Travel:** 20 turns nominal. **Resistance Tolerance:** ±10%. **Power Rating:** 0.75 Watt at 70°C. **Stops:** Wiper idles against stops. **Weight:** 0.04 oz. (1.2 g) maximum. **Series 363.** 3/8", .5 Watt Cermet. **Effective Travel:** 270 nominal. **Resistance Tolerance:** 20% (±10% available). **Power Rating:** 0.5 Watt at 70°C. **Stops:** Solid. Weight: 0.03 oz. (0.85 g) maximum. **Series 364.** 3/8" square, .5 Watt. Multiturn cermet. **Effective Travel:** 25 turns nominal. **Resistance Tolerance:** 10%. **Power Rating:** 0.5 Watt at 85°C. **Stops:** Contact idles at stops. **Weight:** 0.04 oz. (1.13 g) maximum. **Series 370.** High stability, 1 Watt. Multiturn cermet. **Effective Travel:** 20 turns nominal (para. 3.8). **Resistance Tolerance:** 10% (para. 3.7.1.). **Power Rating:** 1.0 Watt at 85°C. **Stops:** Wiper idles against stops. **Weight:** 0.116 oz. (3.3 g) maximum. 363, 364 and 335 series have 0.10" line spacing.

- **TTL Compatible All Models**
- **Only 1.125" Diameter × .484" Deep**

Specifications. Input Power: 5 volts DC ±5% @ 30 MA max. plus external requirements. **Output Rate** 128 pulses/revolution per channel-standard; Other pulses/revolution between 60 and 128 are available. **Channels:** Two separate output channels in quadrature, 90° ±45°. **Output Voltage:** High level voltage — 2.4 volts min. with 10 KΩ load to ground; Low level voltage — .4 volt max. **Operating Temp:** –20°C to +65°. **Vibration:** 10 to 2000 Hz, 15 G peck; MIL-STD-202 method 204 test C. **Shock:** 100 G @ 6 ms MIL-STD-202 method 213 condition 1.

The series 600 controls are manually operated, rotary, optical encoders that output two square waves in quadrature at a rate of 128 pulses per channel per revolution as a standard with other resolutions down to 60 pulses available. The outputs are TTL compatible. The variation in this series is in the terminal configuration: either pin leads or cable leads.

Mechanical Characteristics. Shaft Rotation: Continuous in either direction. **Operating Speed:** 300 rpm max. **Rotational Life:** 10 million revolutions. **Rotational Torque:** 1.5 oz. in max. **Shaft:** 1/4 diameter standard, stainless steel. **Bushing:** 3/8 diameter standard, brass, nickel plated. **Terminals:** P/C Type — 0.25 by 0.12 thick brass, gold plated to facilitate soldering. Cable Type — Four lead ribbon cables, color-coded, with .050 spacing, 28 AWG stranded copper wire, 0.39 diameter. **Strength:** Terminals withstand 2 lb. push and pull and a 90° bend. **Mounting Hardware (not supplied):** For 3/8 bushing, use hex mounting nut 3/8 × 32 thread, 1/2 across flats, 3/32 thick; internal tooth lockwasher 11/16 O.D. by .022 thick. **Seals:** Mounting seal and shaft seal available. Controls are not sealed for board washing. **Weight:** P/C type or cable type. 1 in. FMS shaft and 3/8 bushing-.046 lb. (21 G). **Loc. Pin (Not Standard):** Single pin located 17/32 from center can be supplied.

No. 600-128-CBL. (Cable style) a four lead ribbon cable ± color coded with .050 spacing, 28 AWG stranded copper wire. .039 diameter. Length 7.5".

388E Mechanical Encoders

Only one half inch square, the Series 388E is a direct digital, contacting, mechanical encoder for low resolution limits in such applications as sensing, cursing, scanning or robotics. Meets those requirements for a digital output component for limited space applications. **Bushing:** 1/4 × 1/4 inches. **Shaft:** 1/8 dia. × 3/4 in. FMS lg., screwdriver slotted. **Terminals:** .875 in. lg., P.C. Pins. **Locating Pin:** 9 o'clock.

The Series 500 Controls are manually-operated, rotary, mechanical encoders that provide a 2-bit grey code for relative reference applications and a 4-bit grey code for absolute electrical reference applications. In 2-bit grey code, the L channel leads the R channel by 90° electrically in CW position. Continuous electrical travel. It has a rotational life of more than 100,000 shaft revolutions, a positive detent feel and can be combined with a second modular section in a concentric-shafts construction. This series is small sized (.83" sq. × .343" thick) and commonly used in limited-space, panel-mounted applications where the need for costly front-panel displays can be completely eliminated. Direct digital output, which eliminates A/D converts. Up to 36 electrical and mechanical detented positions. –55°C to +105°C operating temperature. PC type terminals on .100" grid lines. Molded housing/bushing and shaft are polyester PBT, chosen for heat resistance and electrical characteristics. Program code board is glass epoxy, copper clad with nickel plating. Horizontal or vertical mountings relative to the PC board as well as metric shafts and bushings are available as special order. Also available as special order is dual constructions with concentric shafts. Hexadecimal, BCD, and counting codes and rotational position stops are available as special order.

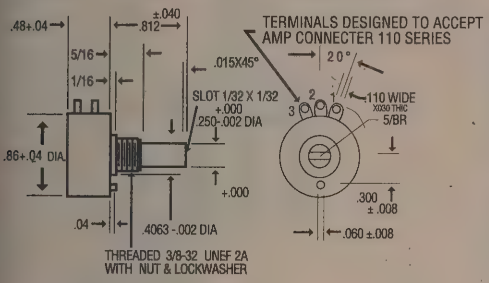
Single Turn 1-Watt Potentiometers



Model SP22E. This conductive plastic single turn features 10,000,000 turns life, ±1.0% linearity. High-quality molded plastic element gives superior performance over film-type elements. Also available with wirewound element (SW22E), featuring 500,000 turns life, ±0.5% linearity. Both are 7/8" dia., with 320 deg. electrical angle, 1/4" shaft. Other resistance values, multi-ganged continuous rotation available. Call for pricing and delivery info.

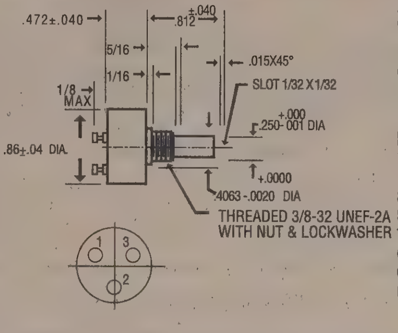
Single Turn 1-Watt Rear Terminals



Model SP22D. Conductive plastic features 10,000,000 turns life, ±1.5% linearity, all metal housing and solder terminals. Also available in wirewound (SW22D series, 500,000 turns life, ±0.5% linearity, lug terminals). Both have 7/8" diameter, 320 deg. electrical angle, 1/4" shaft. Also available with continuous mechanical rotation, non-standard resistance values and multi-ganged.

Mini-Linear Motion Potentiometer — Conductive Plastic

"Mini-Lini" LCP8-10. Smallest linear motion potentiometer in its class! Features .433" electrical stroke, with .472" mechanical stroke. Conductive plastic element provides 20,000,000 shaft reciprocating motions. **Resistance Tolerance:** ±15%. **Independent Linearity:** ±2%. 0.2 Watts power rating. **Operating Temperature Range:** –30°C to +105°C. **Housing Size:** only .287" high × .322" wide × 1.259" long. **Also Available:** threaded shaft, special shaft modifications.

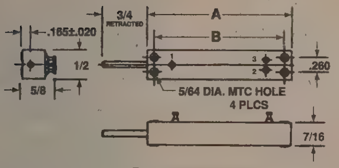
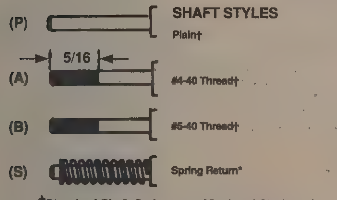
Linear Motion Potentiometer —1/2" to 4" Conductive Plastic and Wirewound





†Standard Shaft Styles *Optional Shaft Styles

The LCP12 series conductive plastic element and the LW12 series wirewound element both feature essentially infinite resolution, high precision, a contact resistance variation less than 2%, 500 VAC dielectric strength, and a choice of shaft styles. The LCP12 offers a long life of 20,000,000 strokes, output smoothness less than 0.1% input voltage, and 10% resistance tolerance. The LW12 offers excellent high speed tracking, 100 ohms max. noise, life of 100,000 strokes, and 5% resistance tolerance.

200*	22	1K	29	5K	38	20K	44	—	—

*NOTE: 100 and 200 ohms only available in SW22 series. Please contact Allied for available application assistance, custom and special designs.

10 Turn or 3 Turn Pots

Model MW22B-10. Wirewound element, ⅞" diameter × ¾" long, 10 or 3 turns. Ten turn unit features 1,000,000 turns life, 2 watt power rating and .25% linearity. Three turn unit features 300,000 turns life, 1 watt power rating and 0.5% linearity. Both units have extremely smooth rotation, brass bushing and gold plated terminals. **Operating Temperature Range:** –55°C to +105° C. Slotted shaft. **Also available:** 5 turn, multi-ganged and high-torque units. Also: see our page on turns counting dials.

10 Turn Potentiometer (2 Watts) Hi-Rel

Model MW20B-10. Highest-quality ten-turn Potentiometer. **Power Rating:** 2 watts at 70°C ambient. High temperature plastic with stainless steel shaft. **Operating Temperature:** –55°C to +105°C. **Life Shaft Revolutions:** 2,000,000. **Independent Linearity:** ±.25%. **Dielectric Strength:** 1000 VAC. **Insulation Resistance:** 1000 megohms at 1000 VDC. **Running Torque:** 0.6 oz.-in. maximum. **Stop Strength:** 96 oz.-in. minimum. **Also Available:** Hybrid element (10,000,000 turns life), multi-ganged models, 3 and 5 turns, and high-torque units. Also see our page on turns counting dials.

Precision Ten-Turn Potentiometers ±.1% Zero-Based Linearity (5 Watts)

Model MR46B-10. Features ±0.1% zero-based linearity. Ten-turn precision pot., long life, with all metal case. Rated 5 watts at 40°C. **Operating Temperature Range:** –55°C to +105°C. Aluminum housing, stainless steel shaft. **Life Shaft Revolutions:** 2,000,000. **Insulation Resistance:** 100 megohms minimum at 1000 VDC. **Dielectric strength:** 1000 VAC minimum. **Running Torque:** 2.8 oz.-in. maximum. **Stop Strength:** 125 oz.-in. minimum. **Also Available:** Up to 30 turns, oil-filled units (up to 20 turns), 5 AMP limit switches, rear shaft extensions. Also: see our page on turns counting dials.

Type MC20-1. Motor-Controlled 10-Turn Potentiometer gives the design engineer new latitudes in speed controls and temperature and valve positioning. This single-ganged, ten-turn pot operates from 6 or 12 VDC input, from an operational amplifier or external power supply. Slip clutch allows for manual adjustment of pot, plus prevents stop breakage. Panel mounts in a .407" diameter mounting hole. **Potentiometer RPM:** 1, 3, 10, and 18. **Potentiometer Power Rating:** 3 Watts at 70°C. **Resistance Tolerance:** ±3%. **Independent Linearity:** ±.25%. **Rotational Life:** 2,000,000 turns. **Modifications Available:** 3 and 5 turn pots; 24 VDC inputs; other RPMs; hybrid element for 10,000,000 turn life. Allow 2-8 weeks delivery. Call for pricing.

Combo® 3— 10-Turn Dial/Pot Combination

Model DW22-10 (Combo® 3). Reduce assembly costs by eliminating the time-consuming mounting and calibrating of dial to pot. The COMBO 3 is a pre-mounted and pre-calibrated digital dial mounted to an ETI Systems Model MW22B-10MM precision 10 turn potentiometer. Gold plated terminal lugs. ±5% resistance tolerance. ±0.5% read-out accuracy. 1,000,000 turns life, 2 watts.

Series 200-P 2-Watt Solid Molded Element Conductive Plastic Potentiometers

2-Watt Solid Molded Element Conductive Plastic Potentiometer

Single Turn 2-Watt Conductive Plastic, Bushing Mount Potentiometer
The raised resistance track is molded to the nonconductor base. Unique contact design minimizes track contact wear, resulting in rotational life far exceeding conventional film type potentiometers. Material selection insures trouble-free operation in applications where oil, dust, moisture and other contamination is present. Rated 2 watts at 40°C. **Resistance Tolerance:** ±20%. **Operating Temperature:** –55°C to 150°C. **Independent Linearity:** ±2%. Bronze bearings. **Life Expectancy:** 20,000,000 revolutions at 40 rpm. **Model 200-P445.**

Single Turn 2-Watt Conductive Plastic Servo Mount Potentiometer
The molded raised track and special wiper material combine to create a quality potentiometer with a minimum life expectancy of 100,000,000 revolutions at 40 rpm. Rated 2 watts at 40°C. Provides trouble-free operation in applications where oil, dust, moisture and other contamination is present. **Resistance Tolerance:** ±10%. **Independent Linearity:** ±0.5%. **Operating Temperature:** –55° to 105°C. Stainless steel ball bearings. **Model 200-P446.**

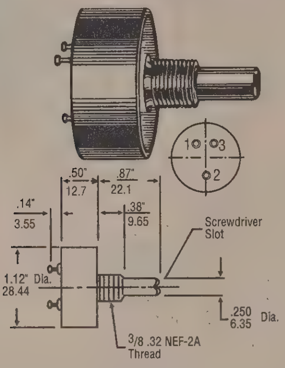
Series 112-P16 1-Watt Solid Molded Element, Single Turn, Conductive Plastic, Bushing Potentiometer



Unit has infinite resolution, with a mechanical life of 20,000,000 revolutions at 40 rpm. Economical. This size is the workhorse for a multitude of military and industrial applications where its relative small size and reliability have been proven. Gold plated terminals, beryllium copper wiper spring, stainless steel shaft, machined bushing. Rated 1 watt at 40°C. **Resistance Tolerance:** ±20%. **Operating Temperature Range:** –55°C to 105°C. **Independent Linearity:** ±2%.

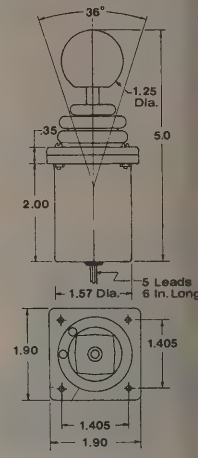
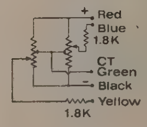
Induction-Type Joystick





Equivalent Circuit

The JSE 2304 non-contacting inductive joystick control offers extremely long life, infinite resolution and zero noise. The unit is protected from moisture and dust by a shaft boot. Anodized aluminum case seals the electronic circuitry. **Specifications. Operating Voltage:** 4.5-15 VDC. **Current:** 15 ma at 10 VDC. **Output Impedance:** 1800 ohms (signals). **Center Tap Impedance:** 340 ohms. **Temperature Range:** –30° to +105°C. **Center Tap Voltage:** 50% of input voltage. **Resolution:** Infinite. **Life:** 20,000,000 cycles. **Leads:** 6" standard length, color coded. Knob has spring return to center.

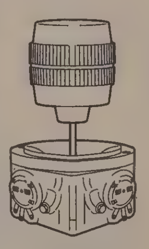
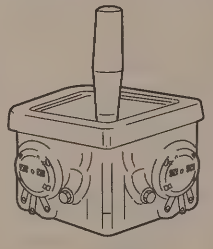
Precision Joystick Controls with Potentiometers



JSP3083



JSP3081

The JSP3000 series joystick controls have been proven in a wide variety of industrial applications. They are ideal for X-Y table controls and remote control equipment. These units provide proportional voltage output and feature essentially infinite resolution. This two-axis joystick is designed with long life conductive plastic potentiometers. The JSP3081 series incorporates a unique feature allowing for calibration of up to 180° by means of a simple thumb tab. It is readily mounted with the screws provided in panels of 0.05" to 0.1875" thick. It is supplied with a snap on bezel that conceals the mounting screws. A round rubber boot kit is available as a special order option. The JSP3082 series provides all the features of the JSP3081 with the addition of a 1/4 amp (115 VAC) momentary normally open push button switch on the top of the handle. It is supplied with a rubber boot seal and mounting ring. Handle height 2.75" above the mounting surface of the joystick. The JSP3803 is a three-axis unit with the handle height 2.35" above the mounting surface of the joystick. All are 5 K units with ±20% resistance tolerance. The potentiometer wipers are phased at the center of resistance. Life is 5,000,000 cycles minimum. The main ball pivot is stainless steel, the lever is 3/16" chrome plated brass, the housing is wellamid, and the springs are stainless steel. All are spring return to center. **Max Power:** 1 watt @ 25°C. **Temperature Range:** –20°C to +65°C.

Single Axis Joystick Controls with Potentiometer

The type SAJ2515 single axis joystick control is the ideal choice for those industrial applications where a single direction of travel is to be controlled. Such devices are used to control the speed of a single motor or to determine the back and forth motion of a hydraulic or pneumatic cylinder. This unit is spring return to center of input voltage for reference. center tap is standard. The conductive plastic bushing type potentiometer facilitates installation.

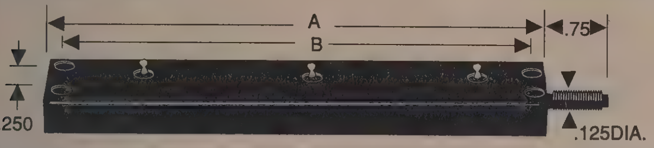
Linear Motion Potentiometers

MAUREY
INSTRUMENT CORP.

M1326 Wirewound

AMERICAN MADE



The M1326 linear motion wirewound potentiometer enjoys a unique position. It combines the best electrical characteristics in the smallest size at the lowest cost. A solid precious metal contact, engaging the precision wirewound mandrel, produces exceptional linear and resolution characteristics. For applications where forces are limited, such as in instrumentation, the M1326 is ideal because of its low shaft frictional force as well as small size and light weight Nylon bearings.

The P1613 linear motion conducive plastic potentiometer is designed with simplicity in mind. It combines all the excellent features of the more expensive transducers yet is the smallest available in the market as well as the least costly. The molded raised track, combined with the special formulated contact, results in phenomenal life—the life expectancy at 60 inches/min. is 50,000,000 strokes. **Total resistance tolerance:** ±20%. **Operating Temperature Range:** –55° to 105°C. Nylon bearings.

M2078

Wirewound Type. These miniature precision transducers have the smallest size at the lowest cost. Created for use in laboratory test equipment, light industrial applications, and automation, these units offer high accuracy of electrical output. Features spherical ball ends for flexibility in mounting.

P2080

AMERICAN MADE

Conductive Plastic Type. These precision transducers feature molded, raised tracks and graphite composition contacts for long life in a hostile environment. They are impervious to dust, water, and oil. High contact pressure offers resistance to severe vibration and shock effects. Trouble-free operation in factories and mills. **Operating temperature range:** –55° to 105°C.

Conductive Plastic Slide Potentiometer P2333

AMERICAN MADE

This slide action linear motion potentiometer was developed for applications requiring high reliability, infinite resolution and long life. The range of electrical strokes is 1 to 4 inches. Repeatability is 0.2%; taper is linear. The combination of a raised molded resistive track and a compatible formulated contact, make this unit practically impervious to dust, oil or moisture. It therefore is suitable for use in the hostile environment often found in a steel mill, tire factory or mining operation. In addition, this construction makes possible the exceptionally long life of 5,000,000 cycles. With the knob removed, the lever arm may be attached to machinery to monitor the position of any linear motion.

Vitreous-Enameled Rheostats

- Choose from 12½ to 300 Watts in a Wide Range of Resistances
- U. L. Approved
- Highly Reliable and Economical

All porcelain vitreous-enameled, silicon-ceramic for smooth action and electrical control. Choose from 12½ to 300 watts in a wide range of resistances. Rheostats are highly reliable and economical; cannot smoke, char, shrink or shift . Metal-graphite contact brushes, varied to fit current and resistance. Ratings at full setting. U.L. approved 25 watts and up. Less knobs; see knobs, dial plates and handwheel below. Other resistances available as special order items.

25 Watt — Type R25

Wiper tracks on this rheostat are buffed and polished to assure smooth rotation and uniform wiper contact. A high strength ceramic hub is used to insulate the shaft and bushing from live parts. The wiper design assures minimum backlash. A vitreous enamel bonds core and base together for uniform heat dissipation and structural integrity. Cores on the larger sizes are enameled prior to winding to increase core strength and improve bond between wire and core. UL approved. 1/4" dia. shaft. **Resistance Tolerance:** ±10%. **Running Torque:** .25 to .5 inch-pound. **Rotation:** 300° ±5%. **Mounting for Panels:** up to 1/4". **Standard Resistance:** 1-10 K ohms. **Shipping Weight:** 1/2 lb.

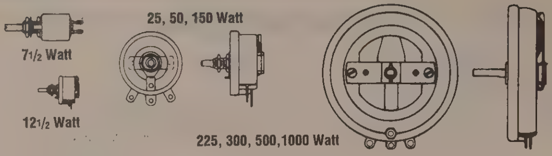
Rheostats



These rheostats are designed and manufactured to operate smoothly and reliably over long periods of use. All models are constructed with metal and ceramic and are coated with protective vitreous enamel or Ohmicone silicone-ceramic. Used for motor speed controls, light dimmers and for equipment requiring convenient variable resistance settings. Windings are linear taper on stock models. Tapered windings available as custom order. Ceramic body, high grade resistance alloy windings, vitreous enamel coating (some models silicone-ceramic), metal spring contact arm, metal graphite composition and solder coated terminals. **Tolerance:** ±10%. Wattage based on 25°C.

7½ Watt. Core Diameter: .515". Shaft Diameter: ⅛".

Dials

Handsomely finished dials for rheostats. Figures and lines are etched on a black background for contrast and ease of readability. Divisions, which indicate approximate percentage of rheostat resistance in circuit, are marked from 0 to 100.

Models 248 and 249 Panel Control Potentiometers

The model 248/249 is a value priced panel control and has proven high performance characteristics in a cost effective package. They are designed to become the choice when seeking high quality, inexpensive panel or PCB mounting potentiometers. The model 248 is conductive plastic with ±20% resistance tolerance and the 249 is cermet with ±10% tolerance. The 248 is 0.5 watts at 70°C with a temperature coefficient of 1000 ppm/°C. The 249 is 1.0 watts at 70°C with a temperature coefficient of 100 ppm/°C. Both have 295° (±5°) mechanical rotation with 265° (±5°) electrical rotation. **Rotational Life:** 50,000 cycles. **Shaft:** Plated brass. The housing and rear lid are flame retardant plastic. **Terminals:** Phosphor bronze with solder plated. **Operating Temperature:** –55°C to +125°C. **Load Life:** 1000 hours at 70°C. Additional configurations such as rear standoffs, solder hook terminals, rear locating lugs, audio taper and various shaft lengths in plastic or metal are available as special order items. Manufacturer's literature available upon request.

Model 157 Precision Industrial Potentiometer

The model 157 features a rugged moisture resistant one piece aluminum anodized metal housing with a rear lid, stainless steel shaft, long 2,000,000 turns rotational life, wide operating range and solderable terminals. These 1.0 watt at 40°C are derated to 0 watts at 125°C. **Load Life:** 900 hours. **Electrical Travel:** 340° (±4°). **Mechanical Travel:** 360° continuous. The bushing uses a sleeve bearing. **Resistance Tolerance:** ±20% with 600 ppm/°C temperature coefficient. **Operating Temperature:** –55°C to +125°C. Optional features that are available as special order items include mechanical stops at 340°, internal shaft seal, high torque, 1/8" diameter shaft, shaft slot, special shaft lengths, no locating pin and special electrical angles. Manufacturer's literature available upon request.

Model DE2 Incremental Encoder

This incremental encoder uses a patented silver-in-glass switching technology. It features a two channel quadrature output. The 32 pulses per revolution can be resolved to 128 increments per revolution. Internal active CMOS de-bounce circuitry provides clean, high level outputs. **Rotational Speed:** 200 RPM continuous and 400 RPM periodic. **Housing:** Molded glass filled thermoplastic. **Shaft:** Stainless steel in a nickel plated brass bushing. **Terminal Pins:** Phosphor bronze and are solderable. **Weight:** 1 ounce maximum. Channel Z is an optional index output available as special order item. Optional 64 pulses per revolution which can be resolved to 256 increments per revolution is also available as special order item.

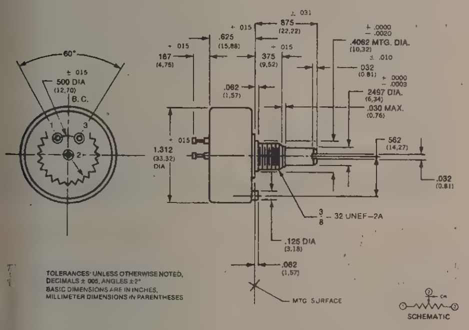
Model 132 Wirewound Single Turn Potentiometer



Thermo plastic housing with nickel plated brass bushing and ¼" dia. stainless steel shaft. Solderable brass terminals. Wirewound element. Moisture resistant. **Power Rating at 40°C:** 2.75-watt. **Resistance Tolerance:** 3%. **Linearity Tolerance:** 0.5%. **Operating Temperature:** –55°C to +125°C. 1.312"D × 0.625"L. **Rotational Life:** 2,000,000 turns. **Weight:** 1.0 oz.

Trimmer Hardware and Adjustment Tool

Spectrol's standard 3/4" and 1 1/4" rectangular trimming potentiometers (models 43 and 70), may be easily panel mounted through the use of the Model 6 Panel Mount Adapters. These standard trimmer models can be quickly, easily, conveniently and economically converted into panel mount trimmers. Assembly is accomplished with the trimmer by snap-in, providing for minimal installation time. Adjustment tool is used to adjust trimmers. Can be used without magnetic or capacitance influence on the circuit.

Model 76 1/4" Sq. Single Turn Cermet Trimmer

Model 76 single turn cermet trimming potentiometers are 1/4" square with standard features which include the ability to withstand immersion cleaning processes, a multi-finger wiper to minimize CRV and a rotor designed for automatic adjustment. They are rated at 1/2 watt at 70°C derated to 0 watts at 125°C. **Resistance Tolerance:** ±10% with a temperature coefficient of ±100 ppm/°C. **Angle Of Rotation:** 270° nominal. **Rotational Life:** 200 cycles. Terminal Pins are solderable. **Load Life:** 1000 hours at 0.5 watt at 70°C. **Temperature Range:** –55°C to +125°C. **Weight:** 0.02 oz. Manufacturer's literature available upon request.

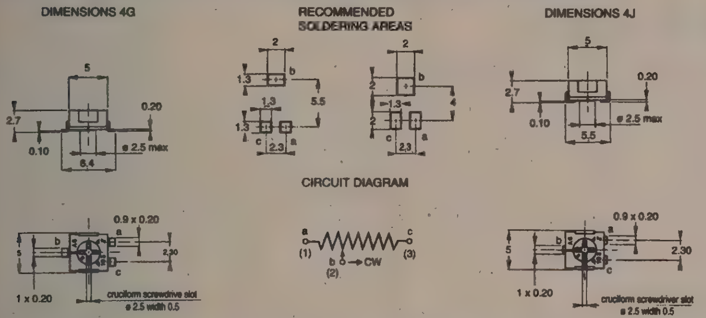
Model 4G/4J 4 mm Surface Mount Cermet Trimmers



The models 4G and 4J are single turn 5 mm cermet trimming potentiometers that have been designed for high performance and stability with optimum packaging density. Both the J-lead (4J) and the gull wing (4G) are fully sealed for wave, vapor phase, reflow soldering and immersion cleaning processes. Designed for both manual or automatic operation, and fitted with mechanical stops, both models are available as standard on tape and reel or in bulk (as special order item). **Electrical Travel:** 220°C ±15°. **Mechanical Travel:** 270°C ±10°. **Linear Power Rating:** 0.2 watts at 85°C. Logarithmic taper not available. **Resistance Tolerance:** ±20%. **Temperature Range:** –55°C to +125°C. **Load Life:** 1000 hours at 0.2 watt at 85°C. **Rotational Life:** 100 cycles. **Max. Unit Weight:** 0.15 grams. Manufacturer's literature available upon request.

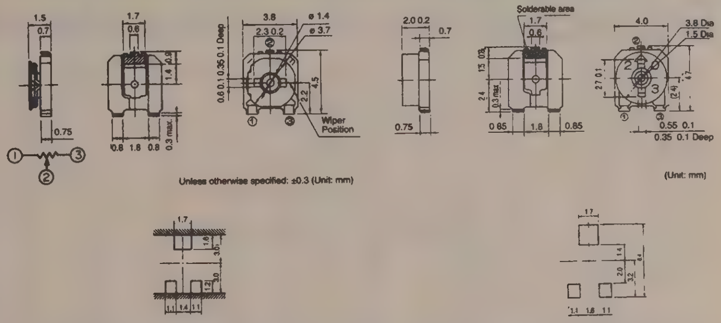
Model 4H/4M 4 mm Surface Mount Cermet Trimmers



The model 4H is an open frame 4 mm single turn cermet trimming potentiometer that has excellent solder wetability and excellent solder heat resistance as well as high solder leaching resistance with the nickel barrier layer construction. The model 4M is a single turn, miniature, superthin (4.7 × 4.0 × 2.0 mm), highly reliable sealed cermet trimming potentiometer. It is suitable for flow and reflow soldering and is sealed to withstand immersion cleaning process. No cleaning process is necessary after soldering. **Max. Working Voltage:** 50 VDC. **Resistance Tolerance:** ±25%. **Power:** 0.1 watt at 70°C. **Effective Rotational Angle:** 4H — 270° ± 10°; 4J — 240° ±10°. **Temperature Range:** –55°C to +125°C. **Rotational Life:** 20 cycles. Manufacturer's literature available upon request.

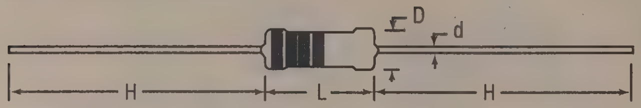
Carbon Film Resistors



- ► Tolerance: 5%
- ► Manufacturing and Quality Control to International Standards
- ► Meeting or Exceeding the Applicable Requirements of EIA-RS-196-A, JIS-C-6402, and IEC-115
- ► Product Recognition Throughout the World
- ► Prompt Delivery from Local Stock
- ► Feeds to All Automatic Machines the Same as Tape/Reel
- ► Saves Shelf Space Compared to Tape/Reel
- ► More Cost Effective than Tape/Reel
- ► Box Dimensions: Width (W) — 85 mm; Height (H) — 118 mm; Length (L) — 260 mm

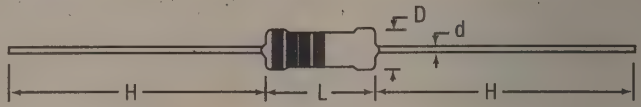
Mini Series Metal Oxide Film Resistors



- ► Tolerance: 5%
- ► Small Size and High Performance
- ► Uniform Quality, and High Reliability
- ► Flame Proof
- ► Long Term Stability
- ► Low Noise
- ► Max. Working Voltage: RSS-1 — 300 V; RSS-2 — 350 V; RSS-5 — 500 V
- ► Max. Overload: RSS-1 — 600 V; RSS-2 — 700 V; RSS-5 — 800 V
- ► Dielectric Withstand: 500 V
- ► 1 W and 2 W Supplied in Tape and Box: 1000 Pcs./Box
- ► 5 W Supplied in Tape and Box: 500 Pcs./Box

Metal Oxide Film Resistors have been developed for application in circuits where stability under high temperature conditions is required.

Model L-Series Networks

These single in-line thick film resistor networks are conformal coated and low profile. The power dissipation at 70°C per package is 0.6 watts for L06; 0.8 watts for L08; 1.0 watts for L10. They are derated from 100% at 70°C to 0 watts at 125°C. **Standard Tolerance:** 2% at 25°C. **Temperature Coefficient:** ±100 ppm/°C (<100 ohms = ±250 ppm/°C). **Operating Temperature Range:** –55°C to +125°C. **Substrate Material:** Alumina. **Resistor Material:** Cermet. **Body Material:** Conformal epoxy resin. The leads are steel alloy for most economy (lowest resistances are copper alloy) and have a lead finish of 90/10 tin-lead. Package has UL-94V-0 flammability rating.

Model 627, 628 Series SMD DIP Networks

These dual-in-line (DIP) thick film resistor networks are small outline surface mount devices (SMD). The A configuration is isolated resistors and the B configuration is bussed resistors. They are 1.28-watts per package at 70°C derated to 0 at 150°C. **Resistance Tolerance:** at 25°C is 2% (<33 ohm = ±1 ohm). **Resistance Temperature Coefficient:** ±100 ppm/°C (<100 ohms = 250 ppm/°C). **Resistance to Solder Heat:** 280°C for 10 seconds. **Operating Temperature Range:** –55°C to +125°C. **Lead Material:** Copper alloy dipped in 60/40 tin-lead solder. Leads are in a gull-wing configuration. An alumina substrate material is used with cermet resistor material enclosed in epoxy body material. Additional tolerances and packaging available as special order items. Manufacturer's literature available upon request.

Package Length ("L")

Model 664, 668 Series SMD DIP Networks

These dual-in-line (DIP) thin film precision resistor networks are small outline surface mount devices (SMD). The A configuration is for isolated resistors. The 664 is .4-watts per package and the 668 is .5-watts per package at 70°C derated to 0 at 125°C. **Resistance Tolerance (and ration):** at 25°C is A = 0.1%/0.05%; B = 0.1/0.1%; D = 0.5/0.1%; F = 1.0%/0.5%. **Resistance Temperature Coefficient:** ±25 ppm/°C. **Resistance to Solder Heat:** 280°C for 10 seconds. **Operating Temperature Range:** –55°C to +125°C. **Lead Material:** Copper alloy dipped in 85/15 tin-lead solder. Leads are in a gull-wing configuration. An alumina substrate material is used with nichrome resistor material enclosed in a molded epoxy body material. Manufacturer's literature available upon request.

Model 694, 698, 699 Series DIP Networks

These dual-in-line (DIP) thin film precision resistor networks are thru-hole devices. The 694 is .4-watts per package, the 698 and 699 are .6-watts per package at 70°C derated to 0 at 150°C. **Resistance Tolerance (and Ration):** at 25°C is A = 0.1%/0.05%; B = 0.1/0.1%; D = 0.5/0.1%; F = 1.0%/0.5%. **Resistance Temperature Coefficient:** ±50 ppm/°C. **Resistance to Solder Heat:** 280°C for 10 seconds. **Operating Temperature Range:** –55°C to +125°C. **Lead Material:** Copper alloy dipped in 60/40 tin-lead solder. Leads are in PC-pin configuration. An alumina substrate material is used with nichrome resistor material enclosed in a molded epoxy body material. Manufacturer's literature available upon request.

Model 898, 899 Series DIP Networks

These dual-in-line (DIP) thick film precision resistor networks are thru-hole devices. The 898 is 2-watts per package and the 899 is 1.28-watts per package at 70°C derated to 0 at 125°C. **Resistance Tolerance:** at 25°C is 2% (<100 ohm = ±2 ohm). **Resistance Temperature Coefficient:** ±100 ppm/°C (<100 ohms = ±250 ppm/°C). **Resistance to Solder Heat:** per MIL-STD-202, method 210, cond. B. **Operating Temperature Range:** –55°C to +125°C. **Lead Material:** Copper alloy dipped in 60/40 tin-lead solder. Leads are in PC-pin configuration. An alumina substrate material is used with cermet resistor material enclosed in a molded epoxy body material. Custom circuit configurations are available as special order items. Manufacturer's literature available upon request.

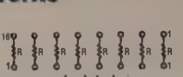
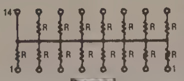
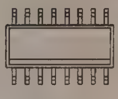
MiniNet Resistor Networks



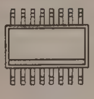
Isolated



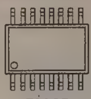
Bussed



Narrow SOIC



QSOP



TSSOP

This new series of miniature MiniNet Resistor Networks is based on a Tantalum Nitride (TN) thin film deposited on a silicon substrate to create the smallest resistor networks available. One of the key factors to consider when selecting these networks is the long-term stability of thin film metalization and lower noise levels compared to thick film ink systems. They offer excellent matching, are the most precise, lowest noise, excellent TTRC and the best TCR available. They are made using IC processing techniques, resulting in networks that are even smaller than an equal number of chips resistors. Package dimensions are based on JEDEC standards. Packages include QSOP (Quarter Sized Outline Package), TSSOP (Thin Shrink Small Outline Package) and Narrow SOIC (Narrow Small Outline Integrated Circuit). With 25 mil. lead spacing for the QSOP, they can be put very close to IC outputs minimizing transmission line mismatching problems. The TSSOP has 25.6 mil. lead spacing and Narrow SOIC has 50 mil. lead spacing. These networks are ideal for applications where space is at a premium. Applications include computers (portable, handheld, notebooks, workstations), telecom (DBS receivers, networks, routers), wireless (pagers, radio, PCN handheld, cellular, LAN), instrumentation (test equipment, controls, sensors), medical (implants, mobile, portable). Manufacturer's literature available upon request.

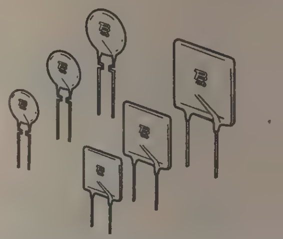
Multifuse PTC Resettable Overcurrent Protectors



Multifuse products are made from a conductive plastic formed into thin sheets with electrodes attached to either side. The conductive plastic is manufactured from a non-conductive crystalline polymer and a highly conductive carbon black. The electrodes ensure even distribution of power through the device and provide a surface for leads to be attached. The conductive carbon black filler material is dispersed in the polymer. When the polymer is at room temperature, there are numerous carbon chains forming conductive paths through the material. Under a fault condition, I^2R heating causes the plastic material's temperature to rise, resulting in a phase transformation of the polymer matrix to an amorphous stricture. This is accompanied with a small expansion. As the conductive particles move apart, most of them no longer conduct current and the resistance of the device increases sharply. The device will remain in this condition until the fault is cleared, allowing the carbon chains to reform as the polymer re-crystallizes. The resistance quickly returns to its original value. While fuses work well only once, replacement is not an option in many applications due to inconvenience, warranty cost or damaged reputations. Applications for resettable devices include computers and PDAs, motors, audio equipment, test and measurement equipment, security and fire alarms, medical, POS equipment, industrial controls, automotive and marine electronics, and battery-operated toys. **Maximum Voltage:** 30 volts. **Maximum Current:** 40 amps. Manufacturer's literature available upon request.

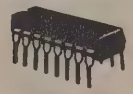
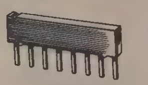
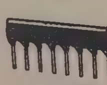
Single and Dual In-Line Resistor Networks



Model 4100



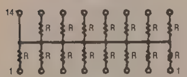
Model 4300



Model 4600

Isolated

Isolated



Bussed

Bussed

The model 4600 is a conformal coated and the model 4300 is a molded single in-line package resistor networks. Their low profile is compatible with DIPs. They are recommended for rosin flux and solvent clean or no clean flux processes. The 4100 series is a molded dual in-line network. Gold Epoxy provides excellent marking contrast for permanent laser marking on all three series. All are compatible with automatic insertion equipment. All are also available in additional values, dual terminators, additional pin count and additional profiles. Call for quote. Manufacturer's literature available upon request.

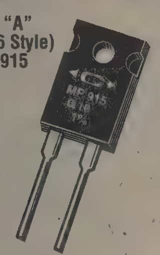
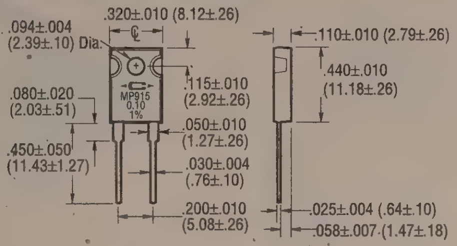
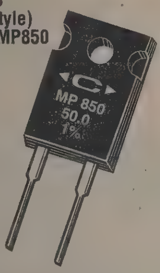
MP Series Heat Sink Mountable Resistors in the TO-126 and TO-220 Style Power Packages

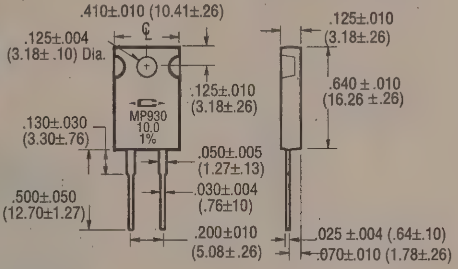
Case "A"
(TO-126 Style)
MP915





Case "B"
(TO-220 Style)
MP930 and MP850





All dimensions in inches and (millimeters)

Standard Tolerance: 1%. **Temperature Coefficient.** TC taken at 25°C and 150°C. **MP850:** 5 ohms and above, 0 to +50 ppm/°C; below 5 ohms down to 0.5 ohm, 0 to +100 ppm/°C; below 0.5 ohm down to 0.2 ohm, 0 to +200 ppm/°C. **MP915/MP930:** 0.50 ohm and above, 0 to +100 ppm/°C; 0.05 ohm to 0.49 ohm, 0 to +200 ppm/°C. **Dielectric Strength:** 1500 Vrms AC. **Measurement Note:** Below 1 ohm the resistance measurement shall be made at a point 0.2 inch (5.08 mm) from the resistor body. **The MP915 and MP930 feature an exposed ceramic heat dissipating mounting surface. The MP850 has a copper heat sink integral in the molded package.**

Stock No.	Mfr.'s Type	Case Type	Power Rating	Max. Voltage	Ohms/ Range	EACH 1-24	EACH 25-49	EACH 50-99

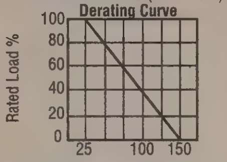
†5K and 10K will be supplied as MP925.

Ohms	XX	Ohms	XX	Ohms	XX	Ohms	XX	Ohms	XX
.05	005	1	020	20	098	100	202	2K	400
0.1	010	2	028	25	115	200	243	5K	465
0.2	012	5	050	50	158	500	306	10K	522
0.5	015	10	060	75	185	1K	356	—	—

Derating (Thermal Resistance):
MP915: 0.12W/°C (8.33 °C/W)
MP930: 0.24W/°C (4.17 °C/W)
MP850: 0.40W/°C (2.50 °C/W)

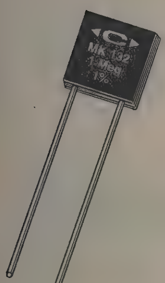


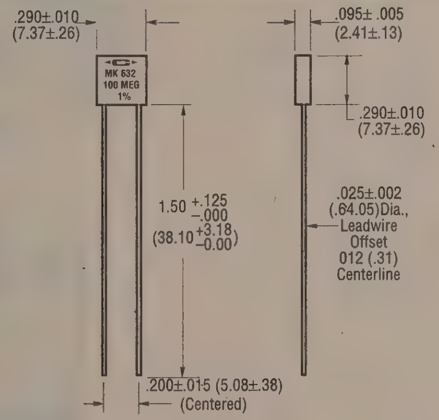
***Power Rating:** The case temperature is to be used for purposes of establishing the maximum applied power. See Derating Curve. The case temperature measurement is made with the thermocouple contacting the bottom insulated mounting surface of the package (center of bottom surface), the device mounted on a heat sink, thermal grease applied at a mounting torque of 8 in-lbs (0.90 N-m) maximum. **Without a heat sink, when in free air at 25°C, the MP930 and MP850 are rated for 2.25 watts, the MP915 is rated for 1.25 watts.**

8

Mounting Note: The MP915/MP930 and MP850 must be mounted using a screw and compression washer mounting technique. This will provide sufficient pressure on the package over time and through large temperature variations to maintain the maximum power dissipation capability. Maximum torque to be applied to mounting screw is 8 in-lbs (0.90 N-m) maximum. **See Power Rating Note** for instructions on determining maximum power dissipation on your heat sink.

Type MK Radial Lead Precision Power Resistor, CK06 Size, 1 Ohm to 100 Meg, 0.75 Watt Rating





Standard Tolerance: 1%. **Temperature Coefficient:** 5 ohm to 5 Meg, ±50 ppm/°C; <5 ohm ±200 ppm/°C; >5 Meg, ±80 ppm/°C; TC referenced to +25°C, ΔR taken at –15°C and +105°C. **Operating Temperature:** –55°C to 175°C, 100% rated power at 125°C derated linearly to zero at 175°C. **Leadwire:** Tinned Copper.

Century Resistor Kits

CEC kits contain the most popular component selections (types and values) and ship fully assembled with labels, clearly showing product type, wattage/voltage, component value and other specification information. No assembly required.

Carbon Film Resistor Kit

Resistor have conformal multi-coating, EIA std. color coding and exceed MIL-R-11F performance characteristics. **Tolerance:** ±5%.

Fixed Types

These precision wirewound resistors are especially designed to meet a wide variety of military, industrial and general consumer applications. They offer long life and extremely reliable service. For use as voltage droppers, bias resistors and bleeders in applications where resistance need not be varied. Feature fine alloy wire, wirewound on quality ceramic cores and covered with vitreous enamel coatings — the best conductor of heat for a material which must also be a good electrical conductor. Resistance Tolerance: ±5% for values 1 ohm or higher. Wattage ratings are for use in free air. See Table B (Below) Before Ordering. Mounting brackets and extra slider bands sold separately.

Adjustable Types

For voltage dividing networks, power supplies, transmitters–anywhere adjustable resistance is required. These resistors feature fine alloy wire, precision wound on high quality ceramic cores and insulated by vitreous enamel coatings. Slider lug included with each resistor. Resistance tolerance is ±10% of the total resistance value. Wattage rating applied only when the entire resistance is in the circuit; with adjustable lug at intermediate point, rating is reduced in the same proportion. Wattage ratings are for free air mounting. Important — See Table B (below) Before Ordering. Mounting brackets and extra slider bands sold separately.

Silicone Coated—SC Series

The Clarostat SC Series of precision silicone coated power resistors is manufactured in complete accordance with all applicable portions of MIL-R-26. These precision resistors provide an outstanding degree of reliability and stability in ratings of 1, 3, and 5 watts. All standard precision resistors are offered with a 1% tolerance and in standard MIL Styles RW70U, RW79U, and RW74U. **SC1A Terminal Strength:** Pull Test 7 Lb. Max., Approx. Weight .33 Grams. **SC3D Terminal Strength:** Pull Test 15 Lb. Max. Approx. Weight 1.3 Grams. **SC5E Terminal Strength:** Pull Test 15 Lb. Max. Approx. Weight 4 Grams. All resistors have Copperweld, Tinned leads and solderability conforms to MIL-R-26E.

Note: Not all values available in all wattages or types.

3, 5 and 10 watt wirewound resistors adapted to printed circuit, terminal board and point-to-point wiring applications. Through elimination of mounting brackets and terminal lugs there are considerable space-saving aspects. **Standard Resistance Tolerance:** ± 5%. **Lead Length:** 1½". **Lead Diameter:** .032" for Type VC3D; Types VC5E and VC10F are .036" Diameter. See table below before ordering. Replace XX (last two numbers of stock number) with ohms value. **Example:** Mfr.'s Type VC3D, 7.5 ohms is stock number 880-4007. **Note:** Not all values available in all wattages or types.

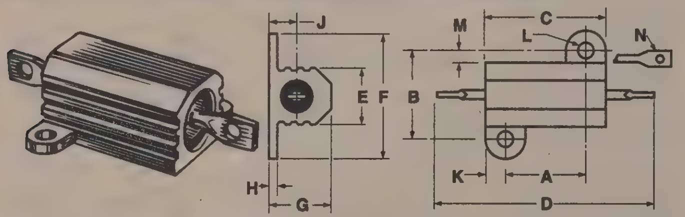
CMC Series Chassis Mounted Power Resistors



Standard Specifications. Power Rating: 5-50 watts depending upon style. 275° C maximum hot-spot at 25°C ambient. Conforms to MIL-R-18546. 1% maximum Δ R in 1000 hour load life. Proper heat sinks as follows: CMC-5 and CMC-10—4 x 6 x 2 x 0.040 aluminum chassis; CMC-25 and CMC-50—5 x 7 x 2 x 0.040 aluminum chassis. **Temperature Range:** –55°C to +275°C. **Standard Temperature Coefficient of Resistance:** <1 ohm = ± 90 ppm; > 1 ohm to <10 ohms = ± 50 ppm. 10 ohms = ± 20 ppm. **Construction:** Windings are wound on ground ceramic cores. Terminals are electronically welded to end caps for maximum strength. A high temperature silicone encapsulant is used to mold the wound assembly. **Standard Terminal Material:** Copperweld, tinned (Material Code 9) 5-50 watt sizes. **Standard Resistance Tolerance:** ± 1.0% order code F. **Dielectric Withstanding Voltage:** 1000 volts for CMC-5 and CMC-10; 2500 volts for CMC-25 and CMC-50. **Note:** Not all resistance values available in all wattages.

Film and Chip Resistors

Model RN Metal Film Resistors

Small size, flame retardant epoxy conformal coating with excellent high frequency characteristics. Low noise, low voltage coefficient and controlled temperature coefficient. 1% tolerance. Fire-cleaned high purity ceramic core with vacuum-deposited nickel-chrome alloy element. Standard lead material is solder-coated copper. Leads are solderable and weldable. Resistance shifts due to storage at room temperature are negligible. Additional values, tolerances, temperature coefficients, terminal material, special pre-conditioning, fusible and flameproof versions available as custom orders. Call for price and delivery quotes. Manufacturer literature available upon request.

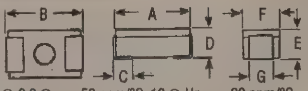
WSC Wire Wound Surface Mount Resistors



These precision power surface mount wirewound resistors have molded epoxy encapsulation, copper-nickel alloy or nickel-chrome alloy element (depending on resistance value) with nickel-silver alloy end caps and tinned copper alloy standard terminals. **Resistance Tolerance:** ±1%. **Temperature Range:** –65°C to +170°C. **Temperature Coefficient:** 0.1 Ω-0.99 Ω — ±90 ppm/°C; 1.0 Ω-9.9 Ω — ±50 ppm/°C; 10 Ω-Up — ±20 ppm/°C.

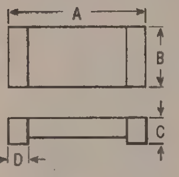
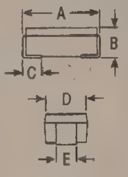
WSL and WSR Low Ohm Resistors



WSL



WSR

These extremely low resistance value power metal strip resistors have properties better than wirewound resistors. Providing ultra-precise and ultra-stable chips that are insensitive to the effects of temperature. They are ideal for current sensing, voltage division and pulse applications including switching and linear power supplies, instruments, power amplifiers and low voltage lighting. They also have very low inductance (.5 nH to 5 nH), excellent frequency response and low thermal EMF. **Resistance Tolerance:** ±1%. **Temperature Range:** WSL — –65°C to +170°C. WSR — –65°C to +275°C. **Temperature Coefficient:** ±75 ppm/°C.

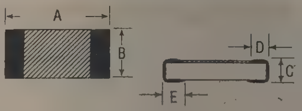
CRCW Thick Film Chip Resistors



Internationally standardized size assures automatic placement compatibility. Flow solderable. Thick film element. Wraparound termination. Inner electrode protection. **Operating Temperature:** –55°C to +150°C. Supplied on 7" reels.

Silicone Coated Wirewound Resistors

High-temperature silicone coating and welded construction. High power/size ratio. RS series has ceramic, steatite or alumina core (depending on size) and stainless steel end caps. CW series has a heat conductive ceramic core and weldable metal alloy end caps. Both have copper-nickel or nickel-chrome alloy element (depending on resistance value) and tinned Copperweld® terminals. Additional values, tolerances, wattages and other specifications available as custom orders. Call for price and delivery quotes. Manufacturer literature available upon request.

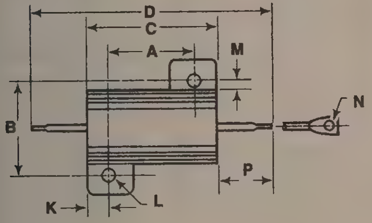
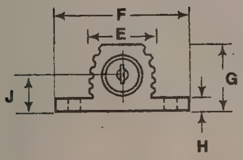
Aluminum Housed Wirewound Resistors





Complete welded and molded construction for total environmental protection in aluminum housed wirewound chassis mount resistor. Mounts on chassis to utilized heat-sink effect. High stability at conventional power ratings. Flat marking surface for easy identification. Series has ceramic, steatite or alumina core (depending on size). Copper-nickel, manganese copper or nickel-chrome alloy element (depending on resistance value) with stainless steel end caps and tinned Copperweld® terminals. –55°C to +275°C operating temperature range. Additional values, tolerances, wattages and other specifications available as custom orders. Call for price and delivery quotes. Manufacturer literature available upon request.

HL series resistors for inexpensively dissipating larger amounts of power in DC or low frequency AC circuits. Special applications include grid resistors, voltage dropping resistors, high voltage bleeder resistors in power supplies, bias supply resistors, voltage divider networks, filament dropping resistors, load resistors, and shunt resistors. Steatite core is chemically inert and will withstand severe thermal shock and is impervious moisture. Element is highest quality copper-nickel alloy or nickel-chrome alloy, depending on ohm value. Special high temperature silicone coating, cured at much lower temperatures than vitreous enamels. Tinned leads. 5% resistance tolerance. Adjustable types, styles, tapped, non-inductive, additional ohm values, wattages, tolerances and lead styles available as custom order. Contact Allied for price and delivery info and manufacturer's literature.

Single-Inline and Dual-Inline Thick Film Resistor Networks

CSC Thick Film Resistor Network Series

Resistor elements protected by tough epoxy conformal coating. Highly stable thick film resistor element. Reduces total assembly costs. Tin-lead plated copper alloy leads. 0.100" lead spacing. 0.195" maximum seated height. Bussed style typically used for pull-up/pull-down applications. Isolated style typically used for pull-up/pull-down, LED current limiting, line termination, and long-line impedance balancing. ±100PPM. 2% tolerance. **Power Rating:** For bussed style, .20-watt; for isolated style, .30-watt. **Operating Temperature:** –55°C to +125°C. **Dimensions. A:** 6-Pin — .59; 8-Pin — .79; 10-Pin — .99. **B:** 6-Pin — .60; 8-Pin — .80; 10-Pin — .90.

MDP Thick Film Resistor Network Series

Rugged, molded epoxy case construction is compatible with automatic surface mounting equipment. Uniform performance characteristics. Highly stable thick film element. Leads are tin-lead plated copper alloy. 0.100" lead spacing. 0.160" maximum seated height. Reduces total assembly costs. Bussed style typically used in pull-up/pull-down applications and digital pulse squaring. Isolated style typically used in pull-up/pull-down circuits, line termination and impedance balancing. ±100PPM. 2% tolerance. **Power Rating:** For bussed style, .125-watt; for isolated style, .250-watt. **Operating Temperature:** -55°C to +125°C. **Dimensions. A:** 14-Pin — .75; 16-Pin — .85. **B:** 14-Pin — .60; 16-Pin — .70.

MSP Thick Film Molded Resistor Network Series

Resistor elements protected by tough epoxy molded coating. Highly stable thick film resistor element. Reduces total assembly costs. Compatible with automatic insertion equipment. Tin-lead plated copper alloy leads. 0.100" lead spacing. 0.195" maximum seated height. Bussed style typically used for pull-up/pull-down applications. Isolated style typically used for pull-up/pull-down, LED current limiting, line termination, and long-line impedance balancing. ±100PPM. 2% tolerance. **Power Rating:** For bussed style, .20-watt; for isolated style, .30-watt. **Operating Temperature:** -55°C to +125°C. **Dimensions. SOMC Thick Film Resistor Network Series

Rugged, molded epoxy case construction is compatible with automatic surface mounting equipment. Uniform performance characteristics. Highly stable thick film element. Leads are tin-lead plated copper alloy. 0.050" lead spacing. 0.090" maximum seated height. Reduces total assembly costs. Bussed style typically used in pull-up/pull-down applications and digital pulse squaring. Isolated style typically used in pull-up/pull-down circuits, line termination and impedance balancing. ±100PPM. 2% tolerance. **Power Rating:** For bussed style, 0.08-watt; for isolated style, 0.16-watt. **Operating Temperature:** -55°C to +125°C.

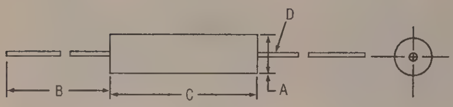
Axial-Lead Vitreous Enamel Resistors



- Low Cost Wirewound Resistor with Vitreous Enamel Coating
- Popular Small Size for Circuit Board, Point-to-Point, or Terminal Board Applications
- Welded Terminations and Lead/End Cap Assembly Assure Maximum Reliability
- Low Temperature Coefficient

Uniform winding and coating assure uniform heat dissipation and excellent appearance. Balanced thermal expansion between core, wire and high temperature vitreous enamel assures reliable performance. Uniformly tinned leads assure reliable electrical and mechanical connections. **Resistance Tolerance:** 5%. **Temperature Coefficient:** ±150 PPM. Available in non-inductive winding, lower TC, closer tolerance and additional resistance values as special order items. Call for pricing and delivery information. Manufacturer literature available.

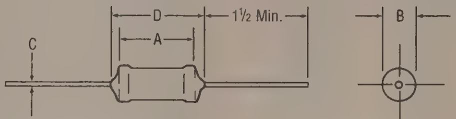
Silicone Coated Power Resistors



- Complete Welded Construction
- High Temperature Silicone Coating and Molding
- Meets Applicable Requirements of MIL-R-26
- 1% Tolerance

SL-1 (MIL-RW70U); SL-3 (RW79U); SL-5 (MIL-RW74U). Made with ceramic, steatite or alumina core, depending on size. Copper-nickel alloy or nickel-chrome alloy, depending on resistance value. Stainless steel end caps. Standard terminals are tinned copperweld. Also available in non-inductive styles with Aryton-Perry winding, various elements available for special TC, special configurations, closer tolerances, special matching TC and tolerance. Call for pricing and delivery information. Manufacturer literature available.

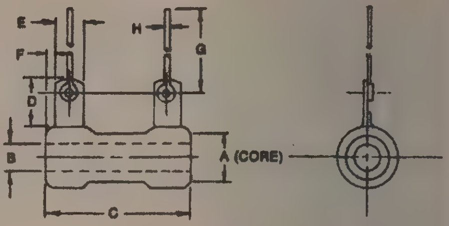
Tubular Vitreous Lug/Leaded Resistors



- Tubular Construction Provides Excellent Heat Dissipation
- Welded Terminals and Termination Guarantees Positive Electrical Connections
- Tinned Terminals

Balanced thermal expansion between core, wire and high temperature vitreous enamel assures reliable performance. Long term stability results from firing at temperatures exceeding 1000°F. Uniform winding and coating assure uniform heat dissipation and excellent appearance. Supplied with 1½" solder leads. **Resistance Tolerance:** ±5%. **Temperature Coefficient:** ±100 PPM. Available in non-inductive winding, lower TC, closer tolerance and additional resistance values as special order items. Call for pricing and delivery information. Manufacturer literature available.

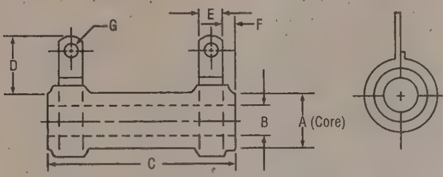
Fixed and Adjustable Wirewound Power Resistors

MEMCOR-TRUOHM INC.

Fixed Resistors



► **Long Term Stability** ► **Tubular Construction** ► **Excellent Heat Dissipation**

Used for voltage dropping or dividing, bias, bleeders, power supplies and other military, industrial, commercial and general consumer applications. Uniform winding and coating provides uniform heat dissipation and excellent appearance. Tinned terminals provide reliable solder or mechanical connections. Balanced thermal expansion between core, wire and high temperature vitreous enamel assures reliable performance. Tubular construction provides excellent heat dissipation. Welded terminals and termination guarantees positive electrical connections. Long term stability results from firing at temperatures exceeding 1000°F. **Resistance Tolerance:** ±5%. **Temperature Coefficient:** ±100 PPM. On adjustable resistors, the wattage rating applies when the entire resistance is in the circuit. With the adjustment lug at an intermediate point, the wattage is reduce in the same proportion. Wattage ratings are for free air mounting. Quick disconnect terminals, other/additional mounting hardware, closer tolerances, lower TC, and other resistance values available as special order. Manufacturer literature available. Units are not supplied with mounting hardware; see mounting hardware listed below each wattage listing. Two (each) are required to mount each resistor.

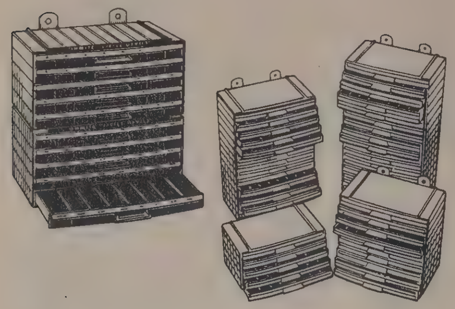
Resistor Assortment



Each cabinet contain the most popular resistance values, including "Mil" specified resistors. Each cabinet is an organized system designed for research and development, prototype laboratory work, education instruction, maintenance and replacement. All cabinets are labeled to identify the resistor series contained and all the drawer compartments identify the resistance values. The cabinets have interlocking bases and tops which permits stacking and helps conserve space. Cabinet models composed of two or more cabinets are stacked and reinforced with metal braces which allow mounting onto walls or pegboards. Each individual cabinet is 9" wide × 4¾" high × 5¼" deep.

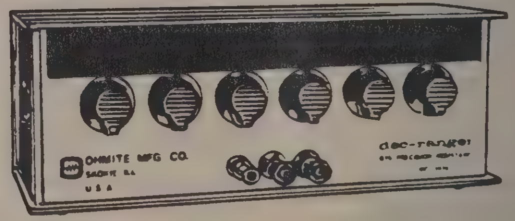
Decade-Ranger Model No. 3416

A precision, ±1% accuracy, 6 decade resistance box. This unit eliminates the guesswork and aids in the determination of appropriate resistance values. The substitution box is an easy-to-use, dedicated unit which facilitates circuit design, breadboarding, and resolving circuitry problems. The unit has sturdy metal housing, universal binding posts and a grounded metal post for effective shielding. Rotary tap switches operate in either direction. Direct digital readout. 1/4" watt per resistor. **Range:** 1 ohm thru 1,111,110 ohm in 1 ohm increments. **Switch Life:** In excess of 50,000 operations. **Dimensions:** 10.5"W × 3.75"H × 4.675"D. **Weight:** 3 lbs. 10 oz.



296-1195. Model 3416..**EACH 378.93**

Ohm-Ranger Model No. 3420

An economical, portable 7-decade resistance selector with a range of over 11 Meg ohms in 1 ohm increments. This unit eliminates the guesswork and aids in the determination of appropriate resistance values. The substitution box is an easy-to-use, dedicated unit which facilitates circuit design, breadboarding, and resolving circuitry problems. Has three binding posts, one to ground the case. The handy slimline size is housed using rugged metal construction. Slide switches are used to change the resistance values. **Power:** 1/2 watt (not to exceed 250 V). **Accuracy:** ±1% over 10 ohms, ±5% under 10 ohms. **Size:** 4" × 6" × 1". **Weight:** 13 oz.

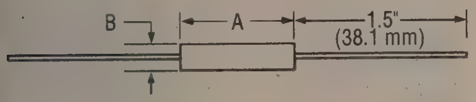
296-1200. Model 3420..**EACH 161.25**

Cap-Ranger Model No. 3430

An economical, portable capacitance selector with 3 binding posts, one to ground the rugged metal case. This unit eliminates the guesswork and aids in the determination of appropriate resistance values. The substitution box is an easy-to-use, dedicated unit which facilitates circuit design, breadboarding, and resolving circuitry problems. Slide switches provide range of 100 picofarads to 11.111 microfarads in 100 picofarads. **Accuracy:** ±2%. 200 VDC maximum. **Residual Capacitance:** 60 pf (typical). **Size:** 4" × 6" × 1". **Weight:** 13 oz.

296-1205. Model 3430..**EACH 186.00**

Vitreous Enamel Conformal Wirewound Resistors



Dimensions

Power Rating	Max. Length-A		Max. Dia.-B		Leads Ga.	Weight (g)

Features

- **Rugged Vitreous Enamel Coating Withstands High Humidity And Temperature Cycling**
- **Durable Construction, Recommended For Industrial Applications Where Reliability Is Paramount**
- **All-Welded Construction**
- **Flame Resistant Vitreous Enamel Coating**
- **5% Tolerance**

Rugged and flame resistant vitreous enamel coating withstands high humidity and temperature cycling. Durable all welded construction ideal for industrial applications where reliability is paramount. These resistors offer the durability of a silicone-free conformal coated resistor and ideal for computer, communications and industrial applications in which cost, quality and reliability are key considerations. Ceramic core with solder coated axial leads. **Tolerance:** ±5%.

11 W	1.796	45.6	.343	8.7	20	6.40

Features

- ▶ Molded Construction Provides Consistent Shape And Size (Permits Mounting In Clips Which Extends Power Rating)
- ▶ Meets Mil-R-26 Requirements For Insulated Resistors
- ▶ All-Welded Construction
- ▶ Flame Resistant Vitreous Enamel Coating
- ▶ 5% Tolerance

Molded construction provides consistent shape and size which permits mounting in clips to extend power rating. Mechanical integrity is enhanced by the all-welded construction and the vitreous enamel coating is flame resistant. The durable vitreous enamel coating, which is silicone-free, permits the resistors to maintain a hard coating while operating at high temperatures. Ceramic core with solder coated axial leads.

- ► **Stability Under High Temperature Conditions**
- ► **All-Welded Construction**

Economical conformal silicone-ceramic coated resistors. These all-welded resistors are characterized by low temperature coefficients and resistance to thermal shock, ideal for communications and a wide range of electrical and electronic applications. Ceramic core and solder coated axial leads.

Silicone-Ceramic Conformal Wirewound Resistors
High quality conformal silicone-ceramic coated resistors for applications requiring high precision, power and stability. These resistors have a low temperature coefficient and maintain a high degree of stability under demanding conditions. They feature all-welded construction and have the ability to maintain accurate resistance values due to being stabilized. Meet or exceed MIL-R-26 specifications. Ceramic core with solder coated axial leads. Parts are marked with both Mil designation and Ohmite stock part number.

TA Series Power Chip Resistors

The Ohmite Power Chip Resistor is a thick film resistive ink resistor. These resistors are lightweight, economical, non-inductive, have high power density and require minimal board space. It is constructed on an alumina substrate with copper plated silver conductors, ruthenium oxide resistance material, and a glass passivation layer. The resistors have very low inductance of 50 nH measured at 1 MHz. The thin profile and low inductance are specifically designed for switch mode power supplies. Repetitive transient withstand capability is 5 times peak as long as the one second average dissipation remains equal to or less than rating. Terminals are solder plated brass. Not all values are available in all wattages.

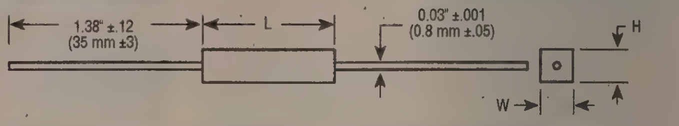
TUW/TUM Ceramic Housed Axial Lead Power Resistors

— NEW —



- **Economical Commercial Grade for General Purpose Use**
- **Square Shape Instead of Round**
- **Wirewound or Metal Oxide Construction**
- **Flameproof**

Ceramic housing for fiberglass or metal oxide core with cement based filling. **Tolerance:** 5%. Short time overload (10x rated wattage for 5 sec.; metal oxide 5x rated wattage for 5 sec.) results in ±2%. Derate linearly from 100% @ 70°C to 0% @ 275°C. Incombustibility at 16x rated wattage for 5 min. is not flamed. Not all values are available in all wattages.

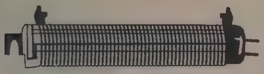
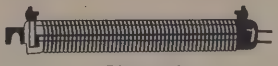
Edgewound/Round Wire Power Resistors



Roundwire



Edgewound

Powr-Ribs™ are designed to handle 700-1000 watts of power. Their construction consists of thick, heavy resistance alloy wound around porcelain ceramic core insulators supported by a metal mounting bar. The bar is slotted on each end to facilitate installation. Edgewound Powr-Ribs™ provide low resistance at high current ratings, while Round Wire Powr-Ribs™ provide higher resistance at lower current ratings. Clamp-type terminals on the Edgewound units permit a reliable connection which can be moved along the resistive element to obtain intermediate values. **Tolerance:** ±10%. **Average Weight:** 3 lbs. 16.25" long between mounting centers..

Fixed/Adjustable Vitreous Enamel High Power Corrib Resistors

Corrib resistors are ideal for applications involving high currents at very low resistance values – as low as 0.1 ohm at 300 watts. These large, heavy-duty resistors are designed to withstand frequent start-stop cycles characteristic of motor starting, dynamic breaking, and other similar applications. They are manufactured with corrugated resistive wire. Ribbed construction aids in rapid cooling. To accelerate cooling, the wire is securely fused to the ceramic core by a protective vitreous enamel coating to improve durability. Corrib resistors are hollow-core units which can be securely fastened to chassis surfaces with the same thru bolts and brackets used with the 210/270 series resistors. **Tolerance:** ±10%. **Core Diameter:** 8.5" long × 1.125". **Overall Height:** 1.895".

Metal-Mite Aluminum Housed Axial Lead Wirewound Resistors

These molded-construction metal housed axial-lead performance resistors are available in higher power ratings than standard axial-lead resistors and are better suited to withstand shock, vibration and harsh environmental conditions. Metal-Mite resistors are aluminum housed to maintain high stability during operation and to permit secure mounting to chassis surfaces. The metal housing also provides heat-sinking capabilities, allowing the units to exceed the power ratings set by Mil specifications. Meets or exceeds MIL-R-18546 specifications. Solder coated axial lead terminals. **Tolerance:** ±1%. Power rating based on chassis mounting area and temperature stability. Proper heat sink for wattage is: 4" × 6" × 2" × .040" aluminum chassis for 5 and 10 watt units; 5" × 7" × 2" × .040 aluminum chassis for 25 watt units; 12" × 12" × .059" aluminum panel for 50 watt units.

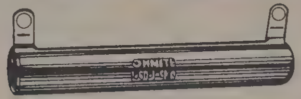
Type 270 Fixed Vitreous Enamel Power Resistors



Suitable for applications requiring higher wattage ratings from 12½ to 225 watts. The rugged vitreous enamel coating provides electrical insulation, excellent heat conduction, and is flame resistant. These wirewound resistors are wound on a high quality ceramic core with lug terminals suitable for soldering or sturdy bolt connection. For sturdy mounting, the hollow core permits fastening with spring-type brackets, thru bolts or thru bolts with slotted-steel brackets. **Tolerance:** ±5%. Power rating based on 25°C free air rating. Mounting brackets, thru bolts and hardware sold separately on page 444.

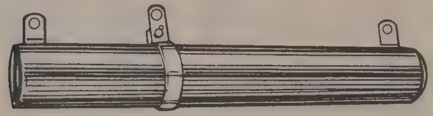
Type 210 Adjustable Vitreous Enamel Power Resistors



Type 210 adjustable resistors are used for applications requiring settings at different resistance values. These wirewound resistors are equipped with a screwdriver adjustable lug, making them ideal for adjusting circuits, obtaining odd resistance values and setting equipment to meet various line voltages. These resistors have a vitreous enamel coating with a strip of uncovered wire that makes contact with the adjustment lug. One screwdriver adjustment lug is provided with each resistor. The hollow core permits secure fastening with spring-type clips, thru bolts or thru bolts with washers. They also offer the durability and flame resistance of vitreous enamel coating and all-welded construction. **Tolerance:** ±10%. **Note:** The stated wattage rating applies only when the entire resistance is in the circuit. Setting the lug at an intermediate point reduces the wattage by the approximate same proportion. Mounting brackets, thru bolts and hardware sold separately on page 444.

Stackohm Power Resistors

— NEW —

- ► Small Size to Power Ratio
- ► Low Profile and Stackable to Conserve Space
- ► All Welded Construction
- ► Integral Mounting Bracket Conducts Heat to Mounting Surface

These oval shaped ceramic core resistors feature vitreous enamel coating and low profile to permit installation in spaces with minimal height. They are also equipped with integral mounting brackets so they can be fastened to a chassis and stacked in locations with limited surface area. When properly fastened, the mounting brackets add a heat sinking benefit resulting in smaller size per watt. The terminals are tinned lug with a hole. **Tolerance:** 5%.

Miniature Thin Resistor with Stacking-Type Box Bracket

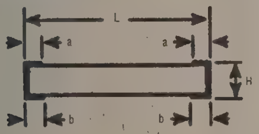
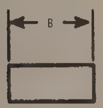
Surface Mount Thick Film Chip Resistors 1% Tolerance

- ► 1/10, 1/8, and 1/4, Watt Sizes
- ► Available in 100 and 1000 Piece Packs or on Tape and Reel; Cabinet Assortments Available
- ► 1% Tolerance Standard
- ► 200 ppm/°C Temperature Coefficient





Specifications. Load Life (1000 Hrs.): ±1% R. **Terminal Strength:** DIN 45921 T 1015 board bend test. **Solderability:** DIN 45921 T 1015 solder bath test (95% coverage). **Temperature Range:** –55°C-125°C. **Resistance to Soldering Heat (260°C for 10 Sec.):** ±1%.

200 Series Vitreous Enamel Wirewound Power Resistor

These resistors have a rugged, fire resistant vitreous enamel coating to ensure successful performance under high temperatures. Small, exceptionally durable power resistors use all-welded construction and have a self supporting lead mounting option. **Tolerance:** ±5%. Power rating based on 25°C free air. Can be mounted using mounting hardware for 210/270 series resistors or by using attached leads.

5¹/₄ Watt

Length: .625. **OD:** .250. **ID:** .135.

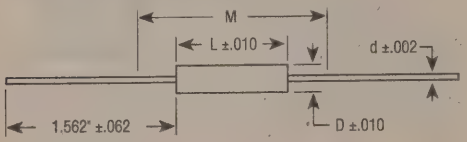
10 Series Molded Silicone Axial Lead Wire Element Resistors



These molded silicone resistors are ideal for current sensing applications. They have low inductance (non-inductive below 0.25 µ). Terminals are constructed of solder-plated copper leads or copper clad steel depending of ohm value with silicone molding encapsulation compound. **Tolerance:** 1%. Power rating based on 25°C free air. **Temperature Range:** 55°C to +275°C.

Hardware for Power Resistors

Brackets fit inside cores of 210 Type and 270 Type resistors and remain in place by spring tension. Standard brackets are plated steel. Thru bolt kits along with plated steel brackets, centering washers and insulating washers (included) allow for secure perpendicular mounting of these resistors to panels up to ¹/₄" thick.

CR-Series Carbon Film Resistors

CR-Series resistors are high-performance, high-reliability low cost carbon film resistors. They are particularly well suited to those applications that require significantly better performance than can be obtained with carbon composition resistors. These resistors feature very low noise, excellent stability, and wide operating frequency range, in minimum size for their power ratings. These resistors have high temperature and time stability approaching those of industrial metal film resistors. This series features durable design rugged epoxy coating, are well suited to automatic assembly, wave soldering, conveyorized handling and easily withstand industrial solvents used in cleaning circuit boards. Marked using 4 color bands. Tape and Reel product available in multiples of 5000 pc/reel as custom order. Call for price and delivery.

Type SFR-Series Metal Film Resistors

Designed for high value manufacturing and automatic insertion, this series provides an economic way to upgrade circuits with stability, low noise, low reactance, and temperature coefficient. Color band marking for ease of identification after mounting. The SFR25 series is designed to replace carbon composition (RCR 07 and 20), carbon film, and older design metal film resistors (RL 07 and 20). The SFR25H series is a replacement for RC20, RN60 and RL20 in Mil styles in applications not requiring qualification. Tape and reel product available in multiples of 5000 pc/reel as custom order. Call for price and delivery.

Series 9C Commercial SMD Chip Resistors

The surface mounted chip resistor consists of a glass passivated thick film resistive paste screened onto a high purity alumina ceramic substrate. The nominal resistance value is achieved by varying the composition of the paste prior to the screening process and by laser trimming the film after it has been screened on. To insure mechanical and environmental integrity, the chip is covered with a silicon based "procoat." The conductive layer consists of a precious metal and a wrap around termination is deposited at each end to allow mechanical and electrical attachment. These chip resistors and adaptable to high speed automated mechanization assembly. They allow excellent printed circuit board density as well as utilization of both board sides. Zero ohm jumper available as custom order in full reels only.

Series 9B Precision MELF Surface Mount Resistors

The MELF resistor consists of a high alumina core on which metal film is deposited. A cap is applied at each end and the resistor is spiralled to value. The resistor is then coated, color coded, and end caps treated to facilitate soldering. Zero ohm jumper available as custom order in full reels only.

Silicone Coated Series 100 Wirewound Resistors

The RCD 100 Series of precision silicone coated power wirewound resistors is manufactured to provide highly reliable continuous operation under MIL-R-26 and MIL-R-39007. Load life stability after 1000 hrs. is typically below ± 0.25% ΔR at full rated power. Improved performance results from single layer, tension free windings of premium grade resistance wire. Special ceramic cores feature optimum thermal conductivity, resulting in a reduced temperature rise over conventional wirewounds. The coating is resistant to most solvents but should not be brushed while wet. **125 Terminal Strength:** Pull test 7 lb. max., approx. weight: .33 Grams. **135 Terminal Strength:** Pull test is 15 lb. max., approx. weight: 1.3 grams. **160 Terminal Strength:** Pull Test 15 lb. max., approx. weight 4 grams. All resistors have tinned leads and solderability conforms to MIL-R-26E. Non-inductive, extended resistance range, and radial leads available on special order. Call for price quote and availability.

Series 600 High Power Resistors – Highest Quality

RCD Series 600. Compact power wirewound resistors offer continuous high-power dissipation. These devices are molded in high density aluminum heat sink for a maximum heat dissipation. Maximum environmental protection provided by a hard anodized housing (per MIL-A-8625 Type 2). Inside the rugged housing, accurate concentricity of the resistive element allows a high level of voltage protection. Other features include complete welded construction (terminal to terminal), oxide-free premium grade resistance wire windings, low noise and thermal EMF. Meets or exceeds MIL-R-18546 requirements. Non-inductive, extended resistance range, tighter tolerances and temperature coefficients, and other modifications available as special order items.

► **Outperforms Carbon Comp MIL-R-11** ► **Flame Retardant Coating And Color-Banding**

Series CF resistors provide improved performance over industry standards without increasing costs. Load life stability at a typical 1000 hrs. is less than 0.5%ΔR. These quality standards are achieved through strict process controls and highest grade materials. Cores are high thermally conductive ceramic, creating superior heat dissipation and overload capability which allows reduced sizes unavailable until now. Specially electroplated leads for faultless soldering, even after lengthy storage times. Industrial solvent-resistant multilayer epoxy coating and color-banding. **Note:** 1/8, 1 and 3 Watt sizes available from factory in 1000 pc. multiples as custom order.

- ► **Equivalent to MIL Wirewound Sizes**
- ► **Exceptional Stability and Overload Dissipation**
- ► **Negligible Noise and Inductance**
- ► **Extremely Durable and Insensitive to Temperature Extremes**
- ► **Flameproof Coating Resists All Industrial Solvents (Should Not Be Brushed When Wet)**
- ► **Price Savings Over Conventional Resistors**
- ► **Excellent Replacement for Carbon Composition, Commercial Wirewound, Carbon Film, Metal Oxide and Metal Film Resistors**

Special construction of the Series RSF resistors allows performance characteristics previously unavailable in film resistors and reduced sizes which are interchangeable with wirewound resistors. Designed specifically for increased power and surge dissipation. Proprietary film is a thick complex-oxide material deposited on high grade ceramic for optimum heat dissipation, negligible inductance, low temperature coefficient and long-term stability. Exceptional insensitivity to high temperature and thermal shock. Terminations are welded for increased durability and negligible noise levels. Marking is stamped or color-banded. Detailed performance report available. **Note:** 5, 7 and 9 watt available with 200 piece minimum as custom order. Call for price and delivery info.

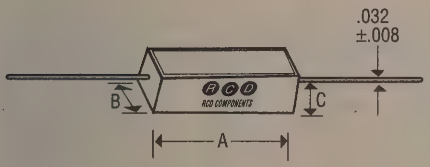
Types PW5/5-Watt and PW10/10-Watt Resistors



Axial lead resistors. Welded cap to lead for improved noise levels and long term stability. Precisely wound element with glass fiber core and sealed in rectangular ceramic case. **Tolerance:** ±5%. **Wide resistance range:** .1Ω to 5K. **Improved TCR:** ±200 PPM Typ. (Values above 1Ω). **Power rating:** 25°C ambient. **Maximum operating temperature:** 275°C. Other values available in 100-piece multiples as custom order. 2; 3, 7, 15, 20, 22, and 25 watt sizes available in 100 piece multiples as custom order. PW series utilizes either wirewound or film elements. Specific type may be requested at time of order as special order item with 1000 piece multiples. If not specified, either may be shipped.

*910K and larger are a higher price. **Note:** Tape and reel and large quantity pricing available.

Metal Oxide Mini Series Resistors

SEI Type RSM

- ► Ideal Substitute Where Size Restraints Apply
- ► Low Cost Alternative for Power Carbon Composition and Wirewounds
- ► Flameproof — Meets Overload Test of UL #1412
- ► Meets Solvent Test of Method 215 of MIL-STD 202
- ► Temperature Coefficient of ±200 ppm/°C
- ► Performance Tested Per MIL-R-22684 Rev. C
- ► Available on 2500 Piece Tape and Reel as Special Order Item
- ► Available From .1 Ohm to 9.1 Ohm as Special Order Item

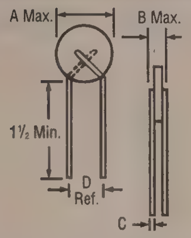
NTC, PTC Thermistors and Inrush Current Limiters

Precision Thermistors ±0.2°C from 0°C to 75°C

Keystone precision units are the designers' choice for low cost, close-tolerance temperature measurement. These ultrastable thermistors are accurate to ±0.2°C from 0°C to 75°C. They are widely used in OEM applications because they offer close-tolerance temperature measurement without requiring individual calibration. A protective coating is standard for all precision thermistors listed in the table below.



Stock No.	Mfr.'s Type	Ro @ 25°C Ω	α @ 25°C (%/°C)	Material	A		B		C	D		ϑ (mW/°C)	τ (sec.)	EACH

NTC Thermistors

Negative temperature coefficient thermistors decrease in resistance as temperature increases. Temp. coefficients range from –2%/°C to –5%/°C @ 25°C. **Max. Operating Temperature:** 150°C+. **Max. Temperature:** 125°C.

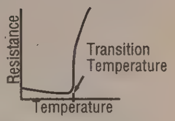
*CL-11, CL-21 and CL-101 are approx. 1/3 the capacitance value of CL-10, CL-20 and CL-100.

PTC Thermistors



Positive temperature coefficient thermistors are characterized by an extremely large resistance change in a small temperature span. Temperature at which resistance begins to increase rapidly is referred to as the transition temperature (°C).

Cryogenic Thermistors

Keystone cryogenic thermistors are extremely useful for liquid level detection in various cryogenic liquids. In this application, the thermistor is slightly self-heated by passing a small current through the unit. The heat generated in the unit is more easily dissipated when the thermistor is immersed in cryogenic fluid than when the fluid level falls below the thermistor. The resulting change in thermistor temperature is easily detected by the change in resistance.

Dissipation Constant in mW/°K

Electrical Input (mW)	O_2	N_2
1.0	2-4	2-7
10.0	5-15	4-14

Glass Encapsulated Thermistors

- ▶ **Temperature Range: –50°C to +204°C**
- ▶ **Time Constant: 3 Seconds**
- ▶ **Dissipation Constant: 2.0 mW/°C**
- ▶ **Tolerance: ±10% @ 25°C**

Keystone glass encapsulated NTC thermistors are tiny pellets of thermistor material hermetically sealed in glass bodies. The hermetic seal makes these parts extremely stable in applications up to 204°C (400°F).

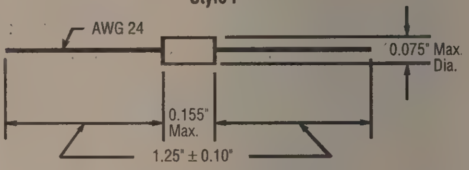
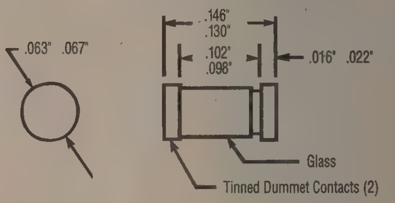
Note: For KCC type for Style II Delete AL prefix and add G100 suffix. Not stocked at Allied. *Max. Application Temp. is 150°C.

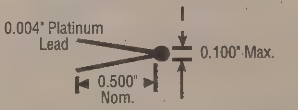
Style I



Style II (Surface Mount)



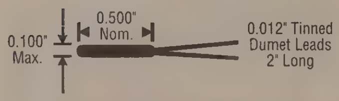
Glass Bead — Model G1



Time Constant
16 Sec.

Dissipation Constant
0.75 mW/°C

Glass Probe — Model G15



Maximum Operating Temperature = 260°C

Time Constant
17 Sec.

Dissipation Constant
1.20 mW/°C

Glass Beads and Glass Probes

Glass bead thermistors are exceptionally stable because the glass seal protects the thermistor from hostile environments.
